Agricultural.

THE FARMER.

BY WILLIAM HAINES LYTTLE. From golden morn to dewy eve, When the sky gleams bright and red, With many a strong and sturdy stroke, I labor for my bread. No sickly fits or ills I dread, My chest is deep and broad, And though I work the livelong day,

No lilly hue is on my brow, No rings on my hard hand, I wield the axe I drive the plow, Or when black war shrouds the land, I seize my father's well-tried band, And that for Freedom's sod It is my glorious right to bleed-

I rise and thank my God.

I rise and thank my God. And when my daily task is o'er, And the sun is sinking low, As faint with work and honest toil, To my humble roof I go,

I see the perfumed city beau With his ebony walking rod, And that I am not a thing like him, I rise and thank my God. The widow's prayer's upon my ear

Unheeded never fall, I ne'er beheld the Orphan's tear But my own heart's fount would swell. I never, heaven for gold would sell, Nor for wealth would stoop to fraud, A poor-but yet an honest man,

I rise and thank my God. And when the good sun floods with light This land of liberty,

And spreads around my happy sight, As in prayer I bend the knee, That I am strong, and bold, and free,

In the land my father's trod, With quivering lips and outstretched arms, I rise and thank my God.

Garden Manures applied in Fall and Winter.

Frequent complaints are made by those who are limited in their gardening operations, that whatever manures they do apply to their gardens, burn up their crops when the heat of summer comes on. We have felt this inconvenience too, and in looking around to find a remedy, have come to the conclusion that whenever a garden requires active stimulating mapures, they should be applied in the fall or winter; in this way rank stable manure may be applied, and spaded or plowed under immediately. It will have become by spring the proper food of plants, and as all manures leech upwards, the surface soil will be in fine condition for the growth of vegetables; whereas, if the manure is applied at planting time, especially the

Amugement.

A Yankee at the Adams House.

Some weeks ago, a very long brown Down Easter, attired in one of those costumes which are nowhere to be met with except upon the stage, a tall bell crowned hat, short waisted blew coat, with enormous pewter buttons, a vest as yeller as a barberry blossom, a pair of corduroys whose highest ambition seemed to maintain their ascendancy over a pair of enormous cowhides that had trodden many a hundred miles of logging-paths, "might have been seen," Jack-knife and shingle in hand wending his way up Long wharf, in the realization of his life-long anticipations of "seein' Boston." At the corner of Merchants' Row, his progress was arrested by the lumbering transit of a twostory house on wheels, drawn by half a dozen yoke of oxen, with the people inside pursuing their usual avocations.

What un arth is that ere? he asked a by-stander. Oh! nothing, replied the "towney;

the folks are only moving-that's all.-When we move down here-we do it, house and all. Je-rusalem! Wall! that beats all na-

tur. Wall, cap'n what's that 'ere big stun house over the left? That's the new Custom House. It's a

mighty bad location-but they're going to move it next week. Thunder and Molasses! it'll take all the oxen in creation for to start her!

Oh! they use elephants for moving such large buildings. And how many elephants it'll take?

Upwards of a hundred. The Yankee cut a deep gash in his

shingle and walked on. He next inquired for the Adams House, determined "to progress during his juvenility, aware of the impossibility of do-

ing so at a more advanced age." He soon found the "tavern" and the "deacons," liberally "darning the ex-pense." Having "slicked up" a little, he witnessed with some amazement the operations of a servant on the gong, simly remarking that "he know'd what sheet ightnin' was, but this was the fust time he'd ever heard of sheet thunder." He followed the crowd into the dining hall, and was ushered to a seat, where he ensconced himself, tucking his towel under

his chin with a sort of desperation, as if he was going to be shaved or scalped. The sight of the covered dishes added to his amazement. Dod dern it! he exclaimed, ef I ever heerd of cookin' on the table! but here they've gone and sot tin kitchens all over the lot. Whar's the fire to come from-that's what I'd like to

know? He got along with the soup very well,

worked when I never seed one of 'em

afore? You've hatched this up agin me I know i. Whar's the landlord ?-fetch your bill on-I'll get out of this .- I haint eat ten cents worth, but I'll pay up like a book-and cuss and quit. And if ever I set to eat a meals vittels in Boston town again-you may take my hide and tan it. Darn your castors-and your castorileand you, too, one and all!" And flinging down a dollar on the table, he siezed his white bell-top from the hand of the trembling waiter and vamosed. Down Wash-

till he pulled up on board the Kennebec. "Captain," said he to the commander cast off your line jest as quick as you're a mind to, and ef ever you catch me wanting to see Boston agin, jest you take me by the slach and throw me right into that ere biler, boots and all.-Yankee

ington and State streets he streaked it

like a comet, and never slacked his pace

Killing Mice. Joe Bumstead was one of those uneasy, restless beings, who are never quiet a minute whether awake or asleep. He was always twisting and turning, always uncomfortable, and he was universally known among his companions as uneasy Joe .- Sometimes we used to rlay off practical jokes upon him for the fun of the thing, but generally speaking, if we at him have his own way, he made mirth enough by 'selling himself.' Among his numerous dislikes, Joe, despised rats and mice. Indeed he said they seemed born into existence only to tease and annoy him. When a child he was bitten by a mouse, and severely, too, for which reaso the always dreaded them. If Joe had occasion to visit any new house, or to sleep in a strange room, he never failed to for he had "hearn tell" of that, and was give the premises a careful inspection to assure himself that there were mouseholes about. We roomed together one night, in New York, and I laughed at Joe tor his watchfulness and close examina-

tion before retiring.
"Is it all right, Joe?" we asked, after
he had peeped behind the furniture, and in every corner of the room. "Yes, there can be no mice here, that's

sure," he said at last. "Well blow out that light, and go to bed then, will you, Joe?"

"Yes, here goes," and Joe suited the action to the word, and leaped into bed. It must have been nearly morning when Je awoke us with: "Hist! hist! don't you here that noise

there ?" "Not a bit of it, Joe. You are dreaming," we replied, turning over to get a

fresh nap. "There it is again." " What?"

" Why the noise."

and with profit in the spring, and yet how few ever use them, except to enrich the earth around their kitchens, and make family, is plainly perceptible whenever we find a well conducted garden; how highly important then that we should understand the proper food of plants. He to raise the fever higher and higher, until but a harvest will follow .- Columbus En-

It is sometimes said, that pasturing invariably improves the soil. This is not true, though it frequently does partially restore it, after severe cropping, to the extent, at least, of enabling it to bear better crops than the last taken from it .-But that one or more of its fertilizing ingredients may be abstracted, even to the extent of a considerable degree of impoverishment, is conclusively shown in the extensive grazing fields of Cheshire, Eng-

This is a favorite dairy region, which has given an enviable character to the cheese that bears its name. It has, for hundreds of years, been devoted to the pasturage of cows, whose milk has been converted into cheese, and sent to a distant market. Few persons would suspect, that the daily removal of those portions of the soil convertible into milk, must be felt in the soil, even after the lapse of centuries. Yet, the phosphate of lime, of which milk contains considerable proportions, is abstracted in such quanties, that the productiveness of those rich fee-

The comparatively recent application of bones as manure, has been made on some of these fields, and with the most astonishing success. Professor Johnson says that pastures, which before this application, rented at 5s. per acre, have since paid 40s., and left the tenant ample the oft-derided discoveries of science, so bours. richly repay their advocates .- American Agriculturiat,

Wall-why don't you fetch on some fresh fodder-darn ye !
