LEWIS' STRAW CUTTER. THE Undersigned takes this opportunity of stating to the public, that he will have another lot of his Machines ready for market, in the course of a few days. Persons wanting these Machines will do well to send in their orders early so as to ensure their being filled. He refers to the following Certificates, of the many which he has received, for additional testimony in their favor. WM. LEWIS, Hamburg, Oct. 1, 37

Certificates. WYSON, (Penn.) January 23d 1851. Mr. Lewis.—The Patent Straw Cutter which you invented, and are now offering to the public, is a most excellent article and deserves public favor. Two years since I purchased one and have had it in constant use—it has never broken out of repair in any respect, answering all the purposes you recommended it for. I most cheerfully commend it to farmers in all sections, and could not be induced to part with the one I have, without the prospect of obtaining another, for five times its cost. Respectfully, V. E. PIOLLET, AUGUSTA, (Ga.) Sept 16, 1851.

Mr. Lewis.—Dear Sir: Some time since I used one of your Straw Cutters to cut roots for my preparation of Georgia Sarsaparilla. Some of the roots were very hard and tough—I am happy to say your Straw Cutter has far exceeded my expectations. The public need not fear of its getting out of order by cutting straw or fodder, or by accidentally getting hard substances in it. Yours, respectfully, J. DENNIS, AUGUSTA, (Ga.) Sept 16, 1851.

Edgewfield C. H., Sept. 10, 1851. Mr. Wm. Lewis.—Sir: In your letter you ask how I like the Straw Cutter I bought from you. I say it excels any thing of the kind I have ever seen, and I could not be induced to part with it, without the prospect of getting another, for any common consideration. WM. F. BUTLER, Edgewfield C. H., Sept. 13, 1851.

DEAR SIR: I have been using one of your Straw Cutters for some three or four months, and am satisfied that its advantages over all others, are such that it will recommend itself to every observer. Its adaptiveness to cutting all kinds of grain, in any desirable length, its security to the operator, the minimum of power required to keep it in operation, the dispatch with which it executes its work, combined with its simplicity and durability, must make it invaluable to every one that may have use of it. A. G. TEAGUE, To Wm. Lewis, Esq., Hamburg S. C.
