Farmers' Department.

MESSRS. COLTER & SCOOTER, Editors.

"Let idle Ambition her baubles pursue,
While Wisdom looks down with disdain,
The home of the farmer has charms ever new,
Where health, peace and competence reign."

☞ The absence of the Editors of this Department will account for lack of editorial articles this week.

A GOOD SELECTION.

We are truly gratified to learn that our inside co-laborer, Col. Simkins, has been appointed Orator of the State Agricultural Society at its next assemblage. The *Carolinian* very truthfully observes, "We are satisfied he will do honor to the occasion."

FOR THE ADVERTISER.

MILLET AGAIN.

Messrs. Editors:—Millet will do well wherever cotton will, though a light soil, moderately rich, is the best for it. It should be sown about the time cotton is planted, and in the same way—that is, drilled in beds about three feet apart, and covered with a harrow. Two plowings and one hoeing is all the work that it needs; and if the season is favorable, it will be large enough to commence cutting by the 15th June, and you may continue cutting until frost. It is the most *determined* thing to grow I ever saw. In a week after you have cut it down, if the weather is not very dry, it is high enough to cut again.

An acre of it, on tolerably rich land, will furnish green food abundantly for the horses and hogs, on a common-sized farm, for three months of the twelve. Hogs thrive and grow on it amazingly, and horses and mules that do not work will keep in good condition on it alone.

I have never tried to make hay of it, and here is where I want instruction; for I am confident that more hay can be made from it, on a given quantity and quality of land, than from any thing else that I have ever seen grow, and equally as nutricious, if not more so. FARMER.

Higgins' Ferry, Aug. 30, 1855.

WORK FOR SEPTEMBER.

The Plantation.

Cotton will now begin to open fully, and all hands must be set to picking, without delay. See that the lint is picked clean, and free from trash; and do not gather it immediately after a rain. It will dry better upon the stalk, than any where else, and nothing is lost by letting it rest for a day or two. Let your Gin and Press be of the best patterns, and in complete order; and see that all operations connected with the ginning, pressing and getting ready for market are performed in the most thorough and perfect manner.

Cow Peas.—After a shower, and while waiting for your Cotton to become dry enough to pick, set the hands to gathering, drying and putting *Peas* away.

Rye, Clover, Lucerne, Barley and *Winter Oats* may be sown the latter part of this month.

Turnips.—If not already sown, or if your first sowing did not come up well, lose no time *now* in putting in Ruta Bega, Yellow Aberdeen, Strap Leaf Red Top, large Norfolk and other Turnips. (See directions in July and August numbers.)

Hay.—Cut, cure and put away an abundance of hay, for the winter food of stock. Should you be short of fodder, make hay from Sweet Potato vines. Do not cut them until just before the first frosts in October, at which time the tubers will probably have ceased growing—cure the vines well, put them away under cover, and you will find that your cows, mules and even horses, will eat them with a good relish. Good fodder may also be made from the tops of the Pindar or Ground Pea, if cut or pulled before they wither.

Weeds, Brush, &c., may now be cut up, swampy land drained, woodlands prepared for pasturage, &c., &c., as heretofore directed.

The Garden.

Turnips, of all kinds, if not already sown, ould be put in without delay. (See August number for full directions.) A full crop of *Onions*, to plant out in October, may v be sown. Sow *genuine European* seeds of *Carrots* and *Beets* any time this month. Sow, also, European *Cabbage* seed. Set out you all the *Brocoli* and *Cauliflower* plants and, may have on hand. Plant *Snap Beans*, if the weather is favorable, you will get a supply for pickles in October. *Spring*, Lettuce, *Radishes, Cress, Mustard, &c.*, may now be sown. *Celery* should be transplant ed, and in dry weather haul earth to the stems of that which you have heretofore transplanted.

Strawberry Beds.

Strawberry beds or patches may now be prepared, and vines planted at any time during the fall or winter. A cool, moist, soil, rich in vegetable matter, suits the Strawberry best, in our Southern climate. Subsoil the ground, or spade it as deep as possible, turning under an abundant supply of swamp muck, decomposed leaves, wood ashes, pulverized charcoal, and a little well rotted stable manure. Harrow or rake the surface, making it fine and even, and set your plants in rows 3 feet apart, and 1 foot to 18 inches in the row. After the plants become well rooted, cover the whole ground with partly decomposed leaves from the forest, leaving nothing exposed but the leaves and fruit stalks of the plants.

The Flower Garden and Shrubbery.

Remove layers of the *Carnation*. Plant *Bulbous* roots for early blooming, last of this month. Plant cuttings of the *Chrysanthemum*. Plant *Anemones* also. Dress your borders, and trim and plant edgings. Spade and fork over vacant places, and prepare for future use. Plant cuttings of *Heart's Ease*, and trim off dead leaves from old plants. Clip *Hedges* of Privet, &c.—Plant out seedlings—also *Polyanthuses, Ranunculuses, &c., &c.* Gather all *seeds* as soon as ripe, and store away carefully in a dry, shady place.

This orchard, to be productive of good fair fruit, requires to be fed, as much as does a field of grain. The soil of each requires that the substances abstracted by the crops shall be restored. The soil should be kept clean, and open to the meliorating influences of the sun, the dews, the rain and the air—the bark of the trees should be kept in a healthful condition, by scraping, when necessary, and by alkaline washes.

TRADING WITH NEGROES.

For the benefit of "Edisto," who was a short time since bitterly complaining about *we* villagers buying his chickens, &c., from his negroes without permits, we publish the annexed article, taken from the "Laurensville *Herald*." We cordially adopt the "*Herald's*" sentiments.

Trading with Negroes.—In our opinion, there is nothing better calculated to injure the negro property than that of purchasing from them, without permits from their owners, chickens, eggs, vegetables and such things. The farmers in the country make great complaints—and we fear they have just cause for it—against the citizens of the village for encouraging such traffic. It is true, we of the village often suffer great inconvenience for the want of such necessaries, and many attempt to excuse themselves for buying from negroes on that ground, but in our opinion, they are adopting the very plan to make the inconvenience greater. What is the reason that the farmers around us do not raise such things and supply us with them? Why, simply because our citizens *will* buy them from negroes, who, nine cases out of ten, steal them, either from their owners or the neighboring planters, consequently it is unprofitable business. Let the people of the village unite in refusing to buy chickens, eggs, vegetables, fruits, &c., from negroes at night, or who have not written permits from their owners, or other responsible persons, when they offer them for sale in the day time, and there will be no inducement for them to steal, and that will give encouragement to our farmers to raise such things to supply us with. We have heard many farmers say they would turn their attention to it, but they *cannot do so*, because the negroes steal all the chickens and eggs they can produce, and they think themselves lucky if they save enough for their own use. Now, who is to blame for this? If the negroes could not sell them, they would have no inducement to steal, and if our citizens would not buy they could not sell. It is a three-fold wrong: It is a wrong to encourage the negro to steal, it is unlawful to purchase from them without permits, and the money they get, in nearly every instance, is spent foolishly, and for that which does them great mischief. Such trafficing with negroes is a *growing* evil. Many persons think that buying such trifling things from them does but very little harm; they would not think of buying a bushel of wheat or corn from them, they would think it degrading and criminal, and would challenge a man to mortal combat for charging them with such an act; but we would like to know the difference, in a moral or legal view, between buying a dollar's worth of chickens and a dollar's worth of wheat or corn from a negro, without a permit. The Corn may be stolen from his master, *in the grain* or it may be stolen *in the chickens*—the master's corn raised them.

But the farmers are not the only persons that suffer. We know instances where villagers have purchased and eaten their neighbors' chickens, and it is not an uncommon thing for them to buy chickens in the day and have them stolen at night, to be sold again in the village. Now all these difficulties occur because the negroes can find ready sale for such stolen articles, and it seems to us that justice to ourselves, our neighbors and the negroes, should actuate every right-minded person to desist from encouraging such unlawful conduct.

It is such *supposed trifling* misdeeds that are doing the greatest mischief to the negroes, because those deeds are not noticed, and the negroes are permitted and encouraged to commit them, but it is nevertheless a great evil, and one that every good citizen should discountenance, and strive to remedy. Let us try the experiment one year, even if we shall be deprived of the luxury of fried chickens, boiled eggs, &c., occasionally; we could, by the end of that time, find out whether the farmers were inclined to appreciate our good intentions towards them, by supplying us with these necessaries themselves, and thereby assist us in remedying the evil. We honestly believe they would.

Simple butter cooler.—Melted butter is all very well in its right place, but when butter is put upon tea or breakfast table, having the appearance of being just out of the oven, it is anything but creditable to the housekeeper, and far from satisfactory to those who eat it. Dry toast is positively spoilt if spread with soft butter; indeed, if butter cannot be brought to thet able at least firm, if not hard, it is better to keep it away altogether. Fortunately, however, it is not necessary to proceed to such desperate measures, as butter can be kept nice and cool in the hottest weather, and that in a very simple manner. Procure a large, new flower-pot of a sufficient size to cover the butter plate, and also a saucer large enough for the flower-pot to rest in it upside down; down; place a trivet or meat-stand (such as is sent to the oven when a joint is baked) in the saucer, and put on this trivet the plate of butter; now fill the saucer with water, and turn the flower-pot over the butter, so that its bottom edge will be below the water. The hole in the flower-pot must be fitted with a cork; the butter will then be in what we may call an air-tight chamber. Let the whole of the outside of the flower-pot be then thoroughly drenched with water, and place it in a cool spot. If this be done over night, the butter will be as "firm as a rock" at breakfast time; or, if placed there in the morning, the butter will be quite hard for use at tea hour. The reason of this is, that when water evaporates, or dries up, it produces cold; the porous pot draws up the water which in warm weather quickly evaporates from the sides, and thus cools it, and as no warm air can now get at the butter, it becomes firm and cool in the hottest day.

Salt for Horses.—A person who kept sixteen horses made the following experiments with seven of them, which had been accsutomed to eat salt with their feed:

Lumps of rock salt were laid in their mangers. These lumps, previously weighed, were examined regularly, to ascertain what quantity, equally had been consumed; and it was repeatedly found that whenever these horses were fed on hay or corn, they consumed only two and a half or three ounces per day, and when they were fed with new hay, they took six ounces per day. This fact should convince us of the expediency of permitting our cattle the free use of salt at all times, and it cannot be given in so convenient a form as rock salt, it being much more palatable than the other in a refined state, and by far cheaper. A good lump should always be kept in a box by the side of the animal, without fear that it will ever be taken to excess.—Cultivator.

Cure for the Bite of a Rattlesnake.—The Madison (Wisconsin) *Journal* contains the following which is well worth remembering:

"We are informed by Dr. Ward that the child of Mr. White, that was bitten by a rattlesnake last week, has recovered. The remedy used was so simple and attainable by every one, that it ought to be generally known. The hand which was bitten and arm, were enveloped in a poultice of moistened ashes, and the child made to drink freely of whiskey punch."

Weeds should never be permitted to mature their seed on a farm, but be pulled up, or cut down as often as they show themselves, such being the only effectual method of eradicating them. To ensure this result, the ground should be planted in corn, and thus keep clean.

Time and labor, devoted to the collection of materials to be converted into manure, are the most fruitful sources of profit in the whole range of farm economy.

Lands which have been long in culture, will be benefitted by applications of phosphate of lime, and it is unimportant whether the deficiency be supplied in the form of bone-dust, guano, native phosphate of lime, compost of fish, ashes, or in that of oyster-shell lime—or marl—if the land need liming, also.

An excellent cement for seams in the roofs of houses, or in any other exposed places, is made with white lead, dry white sand, and as much oil as will make it into the consistency of putty. The cement gets as hard as any stone in the course of a few weeks.

Foreman's Iron Plow Stock.

THE attention of the Planters of Edgefield District is respectfully called to this justly celebrated PLOW STOCK. I have purchased the right for Edgefield District, and they can be had at my Shop at Edgefield C. H., and also of Robinson & Jackson, Hamburg, at $5,50 per Stock.

From Certificates in my possession, I am warranted in saying that it has no superior for all purposes. Its durability, together with its peculiar fitness for sub-soiling our old and worn out lands, makes it the most desirable Plow now in use.

☞ Any person wishing to try them can do so, and if they do not answer the purpose, may return them without charge. S. F. GOODE.

Aug 15 tf 31

LEAVITT'S PREMIUM PORTABLE

CORN MILLS,

FOR CRUSHING CORN AND COB TOGETHER, AND FOR OTHER PURPOSES.

HAVING received the Sole Agency for the State of South Carolina, for the above celebrated Mills, conceded on all hands to be the greatest economisers and labor-saving articles of the day, the Subscriber is desirous of establishing Sub-Agencies for their sale in every District of the State. Prices within the reach of every farmer in the land: ranging from fifty to one hundred dollars, according to power, size and quality. No better investment can be made by the Planters of this or any other State, either for profit or convenience, and no farmer should be without them, nor would they be, if they were aware of their value and utility.

A. S. LANGLEY,
Genoral Agent for the State.

Lightning Conductors.

THOSE of our citizens, who desire to protect their houses, barns, &c., from lightning, would do well to try OTIS' IMPROVED PATENT LIGHTNING CONDUCTORS. By application to the subscriber, Agent at this place, they can procure these rods and all necessary fixtures, and, what is more, have them well put up, all at moderate charges. These Conductors have been placed over the Court House and Jail by the Commissioners of Public Buildings. They are the best, decidedly, yet invented.

S. S. BOYCE, Agent.

THE SCIENTIFIC AMERICAN!

Eleventh Volume.

SPLENDID ENGRAVINGS AND PRIZES!

THE Eleventh Annual Volume of this useful publication commences on the 17th day of September next.

THE "SCIENTIFIC AMERICAN" is an ILLUSTRATED PERIODICAL "devoted chiefly to the promulgation of information relating to the various Mechanic and Chemic Arts, Industrial Manufactures, Patents, Inventions, Engineering, Millwork, and all interests which the light of PRACTICAL SCIENCE is calculated to advance."

Reports of U. S. PATENTS granted are also published every week, including Official Copies of all the PATENT CLAIMS, together with news and information upon THOUSANDS OF OTHER SUBJECTS.

The Contributors to the Scientific American are among the most EMINENT Scientific and practical men of the times. The Editorial Department is universally acknowledged to be conducted with GREAT ABILITY, and to be distinguished, not only for the excellence and truthfulness of its discussions, but for the fearlessness with which error is combated and false theories are exploded.

Mechanics, Inventors, Engineers, Chemists, Manufacturers, Agriculturists, and PEOPLE OF EVERY PROFESSION IN LIFE, will find the Scientific American to be of great value in their respecgive callings. Its counsels and suggestions will save them HUNDREDS OF DOLLARS annually, besides affording them a continual source of knowledge, the experience of which is beyond pecuniary estimate.

The SCIENTIFIC AMERICAN is published once a week; every number contains eight large quarto pages, forming annually a complete and splendid volume, illustrated with SEVERAL HUNDRED ORIGINAL ENGRAVINGS.

☞ Specimen copies sent GRATIS.

☞ TERMS.—Single Subscriptions, $2 a year or $1 for six months. Five copies, for six months, $4; for a year, $8.

For further Club rates and for statement of the fourteen large CASH PRIZES, offered by the publishers, see Scientific American.

Southern, Western and Canada money, or Post Office Stamps, taken at par for subscriptions.

Letters should be directed (post paid) to

MUNN & CO.,
128 Fulton Street, New-York.

☞ Messrs. MUNN & CO., have been, for many years, extensively engaged in procuring patents for new inventions, and will advise inventors, without charge, in regard to the novelty of their improvements.

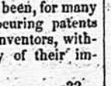
THE THOROUGH BRED HORSE GAMBLE!



WILL stand the ensuing season at my STABLE about one mile from Edgefield C. H., at $15 the season and $25 insurance. All Mares sent will be considered by the season, unless some instructions to the contrary shall accompany them. Season to end 10th November.

Gamble was bred by Col. Barry, of Galatin, Tennessee, and was six years old last Spring. He was sired by Imp. Sovereign, his dam was Celerity by Imp. Leviathan. Celerity's dam was Patty Puff by Pacolet; Patty Puff's dam was Rosa Clack.

For Pedigree and performances GAMBLE will compare with the best horses of his day. He combines strength and action with fleetness and endurance. He ran in Charleston in February 1853 the best race of two mile heats ever run over the course, and but for an unavoidable accident would have distinguished himself as a four miler.

☞ I will feed and pasture Mares at forty-five cents a day, but will not take upon myself any responsibility for accidents or escapes.

THOS. G. BACON.

REMOVAL!

THE Subscriber takes this opportunity of informing his friends, that he has removed to the NEW BRICK STORE adjoining the Store of B. C. Bryan, where he has just opened a LARGE VARIETY of new articles in his various branches of Trade. He intends keeping in the

Drug and Medicine Department,

A full supply of every article that is in common use by the Profession, which will be constantly under the inspection of Drs. Bland, Abney, Mims and Burt; and if an article is reported to be impure it will not be offered for sale. Dr. M. W. Abney has taken an Office in the second Story of the building, and will give me the benefit of his experience in Compounding Medicines and preparing prescriptions, and having been six years engaged in the business, I flatter myself, with these ample arrangements, I shall receive a liberal share of the patronage of Physicians, families, and the public generally

In the Grocery Department

EVERY THING will be kept that is usually found in a Fancy Family Grocery Store. In the

Department of Books, Stationary, &c.,

Will be found a full supply of Standard School Books, Bibles, Hymn Books, Fools Cap, Letter and Note Paper, with almost every article in this line will be kept constantly for sale.

In the Confectionary Department,

May always be found a much larger assortment of Candies, Fruits, Pickles, Ketchups, Sauces, &c., than has ever been offered for sale in this place. In truth, this is to be a Store of good things, and it is hoped will be considered a great convenience, and therefore be largely patronized.

9th. It counteracts Nervousness and Despondency.
10th. It restores Irregularities.
11th. It dispels gloomy and Hysterical Feelings.
12th. It's an admirable Tonic.

A FEW SHORT EXTRACTS FROM TESTIMONIALS, LETTERS, &c.

"I have used Jacob's Cordial in my family, and have found it a most efficient, and in my judgment, a valuable remedy."—Hon. Hiram Warner, Judge of Supreme Court, Georgia.

"It gives me pleasure in being able to recommend Jacob's Cordial—my own personal experience, and the experience of my neighbors and friends around me, is a sufficient guarantee for me to believe it to be all that it purports to be, viz: A SOVEREIGN REMEDY."—Wm. H. Underwood, Formerly Judge of Superior Court, Cherokee Circuit.

"I take great pleasure in recommending this invaluable medicine to all afflicted with bowel diseases, for which I believe it to be a sovereign remedy—decidedly superior to any thing else ever tried by me."—A. A. Gaulding, Deputy G. M. of the Grand Lodge of Georgia.

"I have used Jacob's Cordial in my family, and this, with all I hear about it as a remedy by those who have tried it, induces me to believe that it stands at the head of every preparation of the kind, and I would recommend its use in the disease for which it is compounded."—Miles G. Dobbins, Cashier of the Bank of the State of Georgia, Griffin.

"If there is any credibility in human testimony, Jacob's Cordial, must stand pre-eminent above all other preparations for the cure of Bowel Diseases. From the mass of testimony in its favor coming in from all quarters, it must be very far in advance, as a curative agent, of most if not all other patent preparations.—A. Fleming, Cashier Marine and Fire Insurance Bank, Griffin.

"This efficient remedy is travelling into celebrity as fast as Bonaparte pushed his columns into Russia, and gaining commendation wherever used."—*Georgia Jeffersonian.*

Important to the Citizens of Edgefield!

DR. DENNIS'

GEORGIA SARSAPARILLA!

A PURE & UNADULTERATED ARTICLE,

FOR DISEASES OF THE LIVER,

AND TO PURIFY THE BLOOD.

THIS SARSAPARILLA is made of the Sarsaparilla which grows in the Southern States and nothing else. It has the natural Sarsaparilla taste. Its effect upon the system in all cases in which Sarsaparilla is indicated is wonderful. It is a great safeguard against diseases arising from a torpid state of the Liver, or impure state of the Blood.

Generally, it acts upon the Bowels as a mild purgative or laxative. It not only mildly moves the Bowels, but gives tone to the system by restoring a healthy action in the Liver, and by freeing the blood from its impurities.

For children it is a great preventive of worms and supercedes the necessity of giving them so much worm medicine; at the same time it improves their general health.

A better and more useful medicine cannot be introduced into Edgefield District, either for professional or family use, than the Georgia Sarsaparilla.

This Sarsaparilla is not to be sold on commission.

Price, per bottle, $1—Six bottles $5. For sale by Druggists generally.

☞ Those ordering this article from Druggists or Commission Merchants, should express in their orders, *Dennis' Georgia Sarsaparilla.*

ROGERS' LIVERWORT & TAR,

FOR THE

COMPLETE CURE OF COUGHS,

COLDS, INFLUENZA, ASTHMA, BRONCHITIS, SPITTING OF BLOOD, & ALL OTHER LUNG COMPLAINTS TENDING TO

CONSUMPTION!

THIS preparation is getting into use all over our country. The numerous letters we receive from our various agents, informing us of cures effected in their immediate neighborhoods, warrant in saying it is one of the best, if not the very best Cough Medicines now before the public. *It almost invariably relieves and not unfrequently cures the very worst cases.* When all other Cough preparations have failed, this has relieved the patient. As druggists, dealers in medicines, and physicians can testify. Ask the Agent in your nearest town, what has been his experience of the effects of this medicine. If he has been selling it for any length of time he will tell you

IT IS THE BEST MEDICINE EXTANT.

Below we give a few extracts from letters we have received lately regarding the virtues of this *medicine.*

Dr. S. S. Oslin, of Knoxville, Ga., says:—*Have been using your Liverwort and Tar very extensively in my practice, for three years past, and, it is with pleasure I state my belief in* its superiority over all other articles *with which I am acquainted, for which it is recommended.*"

Messrs. Fitzgerald & Benners, writing from Waynesville, N. C., say:—"*The Liverwort and Tar is becoming daily more popular in this country,* and we think justly so. *All who have tried it speak in commendable terms of it, and say it is very beneficial in alleviating the complaints for which it is recommended.*"

Our Agent in Pickens, S. C., Mr. S. R. McFall, assures us "that *he uses it with great benefit* in his own family, and recommends it to his neighbors." He gives an instance of a negro woman, in his vicinity, who had been suffering with disease of the lungs for years, attended with severe cough, who was relieved by the Liverwort and Tar.

Such are the good reports we hear of this medicine from all parts of the South. For a report of the surprising cures it has performed in the Western and Northern and Eastern States, we would invite the suffering patient to read the pamplet which accompanies each bottle. To all, we say, *have hope, have hope.*

TRY THE MEDICINE!

BE WARNED IN SEASON!!!

And neglect not that cough which is daily wasking your constitution, irritating your throat and lungs, and inviting on that dread disease, Consumption, when so soothing and Healing a remedy can be obtained as Dr. Rodgers' Syrup of Liverwort and Tar.

Beware of Counterfeits and Base Imitations.

The genuine article is signed Andrew Rodgers, on the engraved wrapper around each bottle.

Price $1 per bottle, or six bottles for $5. Sold wholesale and retail by

SCOVIL & MEAD,
111 Chartres St. bet. Conti and St. Louis, N. O.

Sole Agents for the Southern States, to whom all orders and applications for Agencies must be addressed.
