Turin, April 27.

In addition to the proclamation addressed to the army, the King of Sardinia has issued a proclamation, countersigned by Count Cavour, to Italy. The substance is as follows. " Austria, who boasts of her love for peace, attacks us by refusing to submit to a European Congress. She violates the promises made to England; she asks us to reduce our

mon country in the councils of Europe, and because she was not insensible to your groans of agony. Austria now publicly tears to pieces treaties which she never respected. Henceforth, by right, the Italian nation is free, erable loss. This bridge is remarkable for and I may conscientiously fulfill the oath I

"Let us place emillence in Providence, in our union, in the bravery of Italian soldiers, in the alliance of the noble French nation. Let us trust in public opinion. I have no Austrians. The Austrian Manifesto. I have ordered my taithful and gallant army to put a stop to the inimical acts, which for a series of years have been committed by the di-putable rights of my crown, and against the integrity of the realm placed by God under my care, which acts have lately attained the very highest point. By so doing I have fulfilled the painful but unavoidable duty of a sovereign. My conscience being at rest, can look up to an omnipotent God, and patiently awar His award. With confidence I leave my decision to the impartial judgment of contemporaneous and future generations. Although the enemy was twice totally defeated by my gallant army, and at the mercy of the victor, I behaved generously and proposed a reconcilliation. I did not appropriate to myself one inch of his territory. I encroached on no right which belongs to the crown of Sardinia, as one of the mem bers of the European family of nations. I insisted on no guarantees against the recurrence of similar events. The band of peace which I in all sincerity extended, and which

The French Manifesto. Sin: The communication which has been made, by order of his Imperial Majesty, to the Senate and to the legislative body, renwhich have occupied public opinion for some weeks past, and have been the subject of my last despatches. The gravity of the present state of affairs has reached a culminating point, and the denonement before us will not, unhappily, be that which honest and persevering efforts have endeavored to obtain. In such serious conjuncture it is a great consolation to the Emperor's government to be able to submit without hesitation to the verdict of

peace by no longer ignoring a difficulty which o evidently threatened to disturb it.

In this phase of the affair, the Emperor's Government has had its share of initiative and action; but this share-I am particular in stating it-has always been mixed up with collective labor. France simply offered her co-operati n as a great European power to settle amicably and honestly with the other powers a question which-I do not deny itgroused her sympathies; but in which she did not yet perceive particular duties to fulfil or orgent interests to defend. The day apon which the Vienna Cabinet had promised. by a solumn declaration, not to commence hostilities, it seemed itself to anticipate the attitude which any aggressive act against Pie-mont wou d cause the government of the

Emperor to assume. Such an assurance, by giving time to the mediation of the powers to exert itself, allowed the hope of the proximate meeting of the Congress. In fact, England had just settled, with the assent of France, Prussia and Russia, the last conditions for the meeting of that assembly where the place which justice and reason assigned to the Italian States was granted to them. Sardinia, on her part, adhered to the principle of a simultaneous and previous disarmament of all the powers which, for some time past, had increased their military strength. To these tokens of peace, the Vienna Cabinet suddenly opposed an act which, to characterize it as it deserves, is equivalent to a declaration of war.

Thus Austria destroys alone, and with inent, the earnest labors of England, seconded so honestly by Russia and Prussia, facilitated with so much moderation by France. Not only does she exclude Sardinia from the Congress; she summons her, under penalty of coercion, to disarm without any condition within three days.

A larger military force is displayed at the same time on the banks of the Ticino, and, to say the truth, it is in the midst of an advancing army that the Austrian commander-inchief awaits the reply of the Paris Cabinet. You are aware, sir, of the impression produced at London, Berlin and St. Petersburg by the untimely and fatal resolution of the Vienna Cabinet. The astonishment and disapproval of the three powers was displayed as a protest which public opinion has echoed

France, since half a century, has never pretended to exercise an interested influence in Italy, and it is not she, assusedly, who can be accused of having attempted to arouse the remembrance of ancient struggles and historical rivalities. All that she has hitherto askad for, and treaties agree with her wishes, in that the States of the (Italian) Peninsula should live for themselves and manage their own affairs at home as well as in their foreign relations. I am not aware that a different view is taken at London, Berlin, or St. Petersburg than at Paris; however it may be, it to place its army on a p-ace footing and to circumstances have placed Austria towards disband the free corps. Italy to a foreign influence. His Imperial Maje ty, strictly faithful to French people recalled him to the throne of the chief of his dynasty, is not animated by any personal ambition or desire of conquest. It is not long since the Emperor gave a proof, the interest which Providence has entrusted to him, his Majesty has no idea, you may most positively assert it, of separating his views from those of his allies. Fur from it, his government, referring to the incidents which have marked the negotiations of the preceeding weeks, entertains the firm hope that the Government of Her Britannic Majes ty will continue to persevere in an attitude which, by uniting by a moral bond the policy of the two countries, will allow the Cabinets of Paris and of London to give mutual explanations without reserve, and to combine according to eventualities, an entente destined to preserve the Continent from the effects of struggle which may arise at one of its ex-

tremities. Russia, we are perfectly convinced of it, will be always ready to direct her efforts to the same end. As regards Prussia, the imspirit of which she has given proof since the ope that the other powers which form the German Confederation will not allow them-selves to be led astray by the remembrances of a different epoch. France can only behold with sorrow the excitement which has seized upon some States of Germany. The Albany Patriot.

This true Southern Sentinel takes us to task for recent allusion to SENATOR IVERSON of Georgia. We cry peccavi, if in any thing we have sinned against a righteous Southern influence; and we wish the SENATOR and the Patriot complete success in all their efforts towards Southern indepen dence. The Advertiser is with them heart and soul in feeling and principle, but cannot even yet see their practical aims and objects in the present conjuncture of affairs. Are SENATOR IVERSON and the Patriot advocates of separate State action undar any circumstances? Judging by the tenor of Senator's speech, we should say not;-and if not, partial and, at the same time, conciliating then are they not in advance of the rest of us in definite plans of action. AUGUSTA, May 20. Cotton .- A partial panic prevails at present in the cotton trade, in consequence of the doubtful extent and duration of the difficulties between Austria and Sardinia and France. Mrs. Gibson's boy was in company with mine, and was attacked in a like man-ner. He tried the "Remedy" and with him it proved equally as efficacious.

I take much pleasure in recommending this invaluable Medicine to the public. No family should
