daily. Hundreds of Confederate deserters and stragglers are being hunted out and confined there.

THE EFFECT.

Truly, the ways of Providence are inscrutable. This burning of our goodly city would seem at first glance an unmitigated evil. But there is another view to be taken of it.

From Washington.

From the Richmond Whig, April 14th, now published under Yankee rule, we gather the following: WASHINGTON, April 13, 1865.

General Grant has not yet visited Richmond.

He labored nearly a year to capture it, but now that it is in the possession of his army, he has not set foot in the city. Most generals would have gone there and had a flourish before returning to Washington.

To Keep Beef.

A country friend says he has been taught by necessity, since the war began, how to keep beef without salt, and desires us to tell our readers. According to his experience and taste, beef is never left to be eaten raw until a week after being killed.

Swamp.

A correspondent of the Fayetteville (N.C.) says: "A friend informs us that he has secured a recipe for making the article which is worth a dozen years' subscription. It is simply strong yolk and yolk, baited together till of the proper consistency. Not a particle of grease is necessary."

Crunch Bad Barters in Horses.

I have heard that there is no remedy for a runaway horse so effective as a hogging. He must be pigged, with my friend, then gallop. I have a whip, band, phant, heavy—lay on thick. Here is a nice, steep hill—up you go.

Horre Radish.

Growing horse-radish is generally considered a matter of very little consequence, in regard to the manner of cultivation; and the result is, in most cases, small roots, which are inferior in flavor, are raised.

To Kill Worms in Peach Tree Roots.

Our people do not sufficiently attend to their fruit-trees; hence the defective character of much of our fruit. A simple plan for destroying the worm that infests the root of the peach tree is herewith annexed.

The Secret of Being Loved.

William Swift's letter to his daughter on the "Small Sweet Certainties of Life," contains a passage from which a deal of happiness might be learned: "I want to tell you a secret. The way to make yourself pleasing to others is to show that you care for them."

Useful Recipes.

BLACKING.—The best blacking for preserving the leather of boots and shoes, and which will make it perfectly water-tight, is the following: Take of yellow wax one ounce and a half, of mutton suet four ounces and a half, horse turpentine half an ounce, tory black three ounces, melt first the wax, to which add the suet, and afterwards the horse turpentine; when the whole is melted, remove it from the fire; mix in gradually the ivory black, constantly stirring till it is cold.

A Story of the "Knockings." was told us recently, which we think too good to be lost, and therefore give it a start.

Supernitions.

Supernitions. SNEEZING.—If you sneeze on Monday, it indicates danger; sneeze on Tuesday, you will meet a stranger; sneeze on Wednesday, you will receive a stranger.
