Beautiful Hands.

Such beautiful, beautiful lands! They're neither white not small;
And you, I know, would scarcely think
That they were fair at all.
I've looked on hands whoseform and hue
A sculptor's dream might be;
Yet are these aged, wrinkled hands
Most beautiful to me.

Such beautiful, beautiful hands Though heart were weary and sad,
These patient hands kept toiling on,
That children might be gl; l.
I almost weep, as looking back
To childhood's distant day, I think how these hands rested not,

When mine were at their play.

Where crystar successions Flow over golden sands,

And where the old grow young again, I'll cla-p my muther's hands.

The time is arriving when the people of this country will be in position to decide, irrespective of other political questions, upon a matter nearer to their individual and the national welfare than all the rest. The Radical scallawags and carpetbaggers of South Carolina have a handsome political scheme which they are attempting to make use of to inflame the negroes. At Newberry, in that State, a few days since, a depraved speech to the negroes in which he advised them to refuse to engage themselves at any price to any one known to the Democrats would not be able to cultivate their lands—they would have to be sold for taxes, and then would fall into the hands of the negroes at slight cost. This is the kind of talk the Northern jail-birds in the South indulge in this is the style of vermin a Jacobir Congress keeps large standing armies to protect; and if a few of the decent people of the South knock the head off such a reprobate, or dangle him to a tree, in their efforts to restore quiet to there can he whall

With that frightful lesson so recently before us, it might be supposed that we would not be inclined to encourage the immigration of another foreign race as incapable of mingling with us as the negro. But, even although fools are said to learn by experience, there are many people in the United States who do not. They encourage the Chinese emigration to the Pacific coast, which, in the way it is carried stronger to-day than it was six months on, is but-little, if any, better than the African slave trade. They favor it upon the same grounds; that it will reduce the price of labor—reduce that was six months ago.
