following communication, which was ordered to be entered on the journal: OFFICE OF COMPTROLLER-GENERAL, COLUMBIA, S. C., Jan. 25, 1872. To the Honerable the Senate and Hous

of Representatives. Gentlemen: I have the honor to submit herewith the reports of the various disbursing officers, together with all in formation connected with the financial condition of the State, which I have been able to get together.

That the delay of these statements has

been very disadvantageous to yourselves, as well as to the public service, every one will admit, and no one can regret it more than I do; and I assure you, gentlemen, that I have used every effort in my pow-er to obtain them at an earlier day, and now place them in your possession at the earliest possible moment.

I also regret that the reports are not

more satisfactory, and that I am unable, under the present embarrassed condition of our finances, to make some recom mendations looking to improvement in the future; but in view of the fact that cial Board, of which I am not a member and of whose future plans I am not advised, you will, I trust, pardon me for refraining from the expression of my views, and for hoping, perhaps vainly, that their plans for the future will work out our relief as rapidly as those pursued n the past have incurred our State debt. leave to say, that I am both disappointed and surprised at the enormous amount of our funded debt, and venture to make within your income-the State having lost its credit by extravagant practices just as a private individual would lose his by the adoption of a similar course. Very respectfully, your obedient servant, (Signed,) J. L. NEAGLE, vant, (Signed,)

THE SOUTH CAROLINIAN. This journal will be devoted to the Political and Industrial interests of the State, and will also consider the questions that affect the whole country. Whilst we expect to be the unfettered representa-tive of the true interests and the Constitutional rights of all classes of the peo-ple, we shall seek not to forget that our zeal should be tempered with discretion, and that the sense even of wrongs and outrages should not cause us to overlook the suggestions of prindence. Our policy we shall seek to make at once bold and sagacious. Our leading objects will be

corruption in high places, against offi-cial swindling, against all Rings detri-mental to the popular interests, we shall wage stern and ceaseless war. We shall further endeavor to make THE SOUTH CAROLINIAN such a vehicle of News and Intelliger on every important subject, as will com-mend it on this score, to the public. We

propose to make a liberal use of all the means at our command to impart value and interest to our columns. "Democratic" though we are in our political sympathies and views of government, we shall be prepared to unite cordially with good and true men of all other parties in securing the priceless blessings of good and honest government. "Native and to the manner born," v

are, nevertheless, in full accord with good and true men, whatever may be the accidents of birth and country. We advo-cate the policy of a generous welcome to the European immigrant and the Northern settler.

The South Carolinian makes an appea to the honest masses of the State. THE AMERICAN Combination Button-Hole

SEWING MACHINE Is now admitted to be far superior to all others as a Family Machine. The SIMPLICITY, EASE and CERTAIN-TY with which it operates, as well as the uniform excellence of its work, through out the entire range of sewing, in Stitching, Hemming, Felling, Tucking. Cording, Braiding, Quilting, Gather-ing and Sewing on, Overseaming,

Embroidering on the Edge,
And its Beautiful Button-Hole and Eyelet Hole Work, Place it unquestionably far in advance any other similar invention. It is also admirably adapted to MANUFACTU-RING PURPOSES on Woolen, Cotton and Linen Fabrics.
For dress and shirt making and tailor-

ing, it has no equal.
It is also the CHEAPEST, intrinsical ly, as well as the BEST, since it is really TWO MACHINES combined in one, (by a simple and beautiful mechanical arrangement never before accomplished by human ingenuity,) making either the Lock Stitch or Button-Hole Stitch, as occasion may require.

This is the only new family machine that embodies any Substantial improvement upon the many old machines

Important to Cotton Planters COTTON FOOD SECURED BY LETTERS PATENT.

A SPECIAL FERTILIZER, prepared by the Maryland Fertilizing and Manufacturing Company, Baltimore, for the cotton crop, which they claim to be of the highest grade of Fertilizers sold in the South.

highest grade of Fertilizers sold in the South.

It has been used by several hundred planters in North and South Carolina and Georgia for four seasons, with the following results:

It increases the crop from 75 to 200 per cent; it resists drouth in all cases.

The crop is not effected by rust; it matures the crop from three to four weeks in advance, thus insuring against early frost, or in the event of a backward season enables the planter to put in his crop as late as the 1st June with a certainty of

It produces a better quality of cotton; its effect on the second year's crop without additional manure, ranges from one-third to one-half of the first year.

Its mechanical preparation surpasses that of all other Fertilizers, being at all times and in all conditions of weather in perfect order for drilling. PRICE IN AUGUSTA-\$60 CASH. \$65 TIME. It is sold on the basis in quality of Peruvian Guano, poundfor pound. Agents are instructed, when planters use it side by side with the best Peruvian Guano in equal quantities, to refund such amount as will make it equal if it fails to produce as much cotton as the Peruvian. Numerous testimonfals can be had at the offices

Gen. M. C. BUTLER, Edgefield, S. C.

"I used three tons 'Cotton Food,' manufactured by the Maryland Fertilizer Company, of Baltimore, applying 200 lbs, to the acre. By the side of it I applied 200 lbs, Peruvian Guano to the acre."

"The Cotton manured with the 'Cotton Food' grew off more promptly and vigorously, and whilst I made no comparison of the results, I am sure the preference was in favor of the 'Cotton Food,' and so much am I impressed with this belief I shall use it exclusively this year in preference to all others. The Cotton manured with it was not affected like the others by the drouth, and matured three weeks earlier. I also applied it in a small way on Corn with the most satisfactory results." J. H. HOLLINGSWORTH, Edgefield, S. C., to GRAHAM & BUTLER, Augusta. "I used 190 lbs. 'Cotton Food' to the acre, in the drill, on Mulatio Land, mixture of sand, it increased the yield one hundred per cent. I used several other kinds the year before and I decidedly prefer the 'Cotton Food.' It gave perfect satisfaction, so much so that I shall use it entirely another year.

H. W. ADDISON, to GRAHAM & BUTLER, Augusta, Ga. "I used 75 lbs. 'Cotton Food' in drills on light red land, which produced 1000 pounds Seed Cotton to the acre. It compares favorably with the best Fertilizers in the market. My crop was increased about 50 per cent. and gathered by 15th November. I am well pleased with it."

J. L. ADDISON, Edgefield, S. C., to GRAHAM & BUTLER, Augusta, Ga. "I used about 266 lbs. 'Cotton Food' per acre, one-half in the drill at time of lanting and one-half in the first furrow, second plowing in June, on sandy land, planting and one-half in the first furrow, second plowing in June, on sandy land, clay subsoil, very poor old field, a portion taken in last year and a portion this, it produced twelve bales on fifteen acres. It has paid better than any Fertilizer I have ever used. Have been using Commercial Manures 11 years. Do not think the land without manure under best circumstances would have produced 5 bales, Most of my Cotton was gathered by the 25th of October, and had no Yellow Cotton. I have talked with several of my neighbors, who unite with me in saying, there is no better manure for the Cotton Plant. The 'Cotton Food' has paid better than Peruvian Guano previous to the war."
