A Grievous Fault .-- Where Should the Blame Lie?

Our subscribers and patrons are deluging us with complaints—especially those Northward of us. They do not-and it seems cannot-get the Advertiser. For two weeks past, to our certain knowledge, the sack containing the Advertiser packages, which should go Northward from the Pine House, has laid at that office from two to four days longer than it should. Last week we gave our Northern mail into the hands of our U. S. mail carrier on Wednesday night, and on the following Sunday this mail was still lying at the Pine House. And besides, we pay an extra sum weekly for the taking of our mail to the Pine House. Consequently the fault in this matter is very clearly not ours. The mail carrier from Edgefield to Pine House and the postmaster at that depot would oblige us vastly by setting their heads and hands will begin to think us somewhat "spootogether to remedy these shortcomings.

Jury of Newberry County at the January Term of Court. The Grand Juries of Edgefield have failed to discharge their duty in this particular, ever since the establishment of the office of County Commissioners. Why should they always examine the offices of the Sheriff, Judge of Probate and Clerk of Court, and neglect the important office of the County Commissioners? Gentlemen of the Grand Inquest for Edgefield, at your next session, don't forget the County Commissioners. The people want information concerning the receipts and expenditures of their money by the Commissioners, and through your authority and report is their only hope of obtaining an insight into the official management of their

DIABOLICAL ACT.—We learn that on Thursday night last the stable of Capt. J. C. S. Five of the horses belonged to Capt. Brown, and two to Dr. Bates. Sinking Slowly.

Diseases that progress rapidly to a crisis are not the only ones to be dreaded. Canker or dry rot does not blast a tree as suddenly as a stroke of lightning, but unless arrested it destroys it as cerwould be something to see the loads of tainly; and in like manner chronic debility, although it does not kill with the swiftness of yellow fever, is as sure to them down for our young friends. It is sap the springs of life eventually as any acute disease, if not checked by invigerating medication. There is something inexpressibly touching in the spectacle of premature decay. Languor, pallor, emaciation, depression of spirits, and a distaste for exertion, are its ordinary symptoms, and they should be promptly met by tonic treatment. The best invigorant and exhilarant that can be administered in a case of this kind is Hostetter's Stoman. And this. How ryoung thing!"

By these means the repair of the physical structure is effected and its health and vigor restored. In no class of diseases has the beneficent operation of the Bitters been more marked and striking than in those characterized by general debility and nervous prostration. Ladies affected with these ailments find in this most wholesome of all tonics and correctives the safest and all tonics and correctives the safest and surest means of relief. For Composting with Cotton Seed. PREPARED UNDER THE SUPERINTENDENCE OF DR. ST. JULIEN RAVELEL, CHARLESTON, S. C.

They will also Practice in the Courts of Trial Justices for these Counties. This article, as above stated, is prepared expressly for COMPOSTING WITH COTTON SEED.

A Compost made with an equal weight of this article and Cotton Seed, furnishes the Cotton Seed with the SOLUBLE PHOSPHATE, which is necessary to make it properly effective.

The Compost should be made from four to six weeks before planting time, in order that decomposition may take place, and should be applied at from 400 to 600 pounds per acre or more. General experience for two years has shown this Compost to be A MOST ECONOMICAL and EFFECTIVE

FERTILIZER FOR COTTON and CORN. This ACID PHOSPHATE is now put into market at the low price of \$30 PER TON CASH; \$35 ON TIME WITHOUT INTEREST (no drayage,) at which rate every planter can supply himself with a FIRST CLASS FERTILIEER at a minimum outlay per acre.

CERTIFICATES: EDGEFIELD, S. C., Dec. 30th, 1871. EDGEFIELD, Dec. 30th, 1871.

This year I planted eighty-five acres in Cotton, poor land, and used three tons of the Wando Guano. I made, packed and sold forty-eight bales, weighing 400 pounds. The three tons were applied to 45 acres, which produced 31 bales. Forty acres, better land. I have used commercial fertilizers for several years, and this year, with other kinds, used the Wando, giving it, I think a fur trial. In my opinion, the Wando gave more remunerative results than any other kind used by me.
