While offering to the Prince his hearty congratulations on the happy event. Stockmar coupled them with earnest counsels as to the course which must be pursued in laying the foundations of his future happiness, and in fulfilling worthily the duties of his high position. To this the Prince replied in a strain of lofty aspiration, and with a deep sense of the great part he was to play in his new career, which evinced true noility of character, and promised well for the future. Neither the happiness of love-a happiness in his case made more intense by the singular purity and unselfishness of his own nature, on which the devotion shown him seems to have come with a bewildering strangeness-nor the brilliancy of the position into which this love had raised him, blinded him for a moment to its sterner features. "Treu und fest" (True and firm) was the motto of his house, and he was prepared to grapple with difficulties and face opposition with a manly heart. "With the exception of my relations to the Queen." he wrote to his step-mother, "my future position will have its dark side, and the sky will not always be blue and unclouded. A thousand times more vexatious were the questions as to the rank and precedence he was to enjoy as he husband of the Queen. There is no provision in the English constitution for the title and precedence of the husband of a queen regnant, while the wife of a king has the highest rank and dignity, after her husband, assigned her by law; and while it is no doubt always in the power of a queen regnant to give her consort precedence at home over all her subjects by placing him next her person, her power stops there.
