Gold t and its value and necessity is being more

Splendid opportunies for securing great bargains in mines come to us constantly. Our agents are reporting from the gold fields of this continent and from Africa. The company e vas two promising properties in Cripple Creek. We propose to develop one of the most remarkable, well-proven placer mines in the world. It has already produced about \$2,000,000 by crude surface working, and is estimated to contain over \$25,000,000 in gold.

Now is the time to invest with us. Do not wait until every man, woman and child is eager to buy and prices have advanced enormously.

OUR COUNTRY NEEDS IT-GOLD! In 1887 the first shipments of gold, amounting to less than \$600,000, were made from South Africa. In 1894 the production was nearly \$40,000,000. It is estimated that works under way and contemplated will produce \$100,000,000 per year.

Less than five years ago Cripple Creek was unknown as a mining camp. In 1892 it produced \$200,000. It is now producing \$4,000,000 per month. Two old men, tired out and almost hopeless, not many years since clung desperately to a small hole ic the ground which showed some traces of gold. That hole has since yielded over \$2,000,000.

The Idaho Mine has paid nearly \$6,000,000 in dividends, the Crown Point nearly \$12,000,000, the Belcher over \$15,000,000. We know of no other prominent industry paying

such large dividends on capital invested as fully developed producing gold mines. The rate of 25 per cent. per annum is quita common, while phenomenal returns are made in many instances. We offer for sale 50,000 shares of our capital stock
