Vernyius is an interesting sight just now. Out stream of lava flowing down from the centre is 100 feet wide and from 7 to 14 feet deep, while a hundred other smaller streams are running down the cave and a big column of black smoke rises into the sky.

Photography has lately determined the depths to which the sun's rays can penetrate through water, and the result is that at a depth of 553 feet, the darkness was about equal to an exposure on a clear but moonless night. The exposed plates at this depth gave no evidence of light action.

A curious lake has been found in the island of Kildine, in the North sea. It is separated from the ocean by a narrow strip of land, and contains salt water under the surface, in which sponges, codfish and other marine animals flourish. The surface of the water, however, is perfectly fresh and supports water creatures.

"Everybody should know that to eat when tired is to place upon the digestive organs a burden which they are wholly unable to carry," says Modern Medicine. "When the body is in a state of fatigue, the digestive organs are unable to perform their natural functions; the glands of the stomach will not form gastric juice; the saliva is deficient in quantity, and the whole digestive apparatus is incapable of doing efficient work. When exhausted one should rest before eating. If a faint or 'all-gone' sensation is experienced, relief may be obtained by drinking a glass of hot water or diluted fruit juice of some sort."

You can read a happy mind in a happy countenance without much penetration. This is the sort of countenance that the quondam billous sufferer or dyspeptic relieved by Hostetter's Stomach Bitters wears. You will meet many such. The great stomachic and alterative also provides happiness for the malarious, the rheumatic, the weak, and those troubled with inaction of the kidneys and bladder.

The lobster factories along the Maine coast have closed after an unsuccessful sea-

When Dobbins' Electric Soap was first made in 1865 it cost 20 cents a bar. It is precisely the same ingredients and quality now and doesn't cost half. Buy it of your grocer and preserve your clothes. If he hasn't it, he will get it.

A horse can live twenty-five days without solid food, merely drinking water. When bilious or costive, eat a Cascaret, candy cathartic, cure guaranteed, 10c., 25c.

> Black materials are to be greatly favored this winter, and a special and attractive exhibit of stylish and elegant black goods made this week included French armures with bourette knots, mohairs and canvas weaves with boucle figures, English whipcords, camels' hair serges with glossy silk and wool stripes in raised designs, plain and fancy alpacas and brilliantines, satins, moires, both plain and brocaded, Henriettas in silk warp and sheer all-wool combinations, drap d'ete, repped silks and repped wools in both fine and heavy cords new designs in crepons, and many handsome textiles in crepon effects. The mohairs and Henrietta cloths, the faced cloths, are represented in different qualities and prices, and possess a degree of durability that is unsurpassed by nearly any black material save silky English serge, which is less dressy in effect than the finer woven fabrics. Many other standard black textiles are displayed that are in steady demand, as the outlook for the winter season indicates an even greater demand for handsome black fabrics than was experienced a year ago, when this color largely prevailed .-- New York Post.

> Tellow is a favorite color this sea son. Notwithstanding that it is the hue of jeulousy, of decadent literature, of biliousness and other unpleasantnesses, the American woman has decided that she will wear yellow this winter. You may see yellow velvets, silks, cloths and other fabrics in the store windows, and inside on the counters you may find many, many more. The merchant scents the fancy of his customers afar off, and by the time my lady has quite made up her mind that she wants some certain thing, there it is in the stores ready

> of mantles that the Chinese hue will be found. It will appear in millinery in many shapes and shades. Ribbons are as easily made of yellow as of any other color, and feathers and laces can be yellowed with equal facility.

There will be many shades, and each thade will have a different name, distinctive and generally odd. The men with an idea of instructing her in poand women who prepare new style? litical economy. "do you know what are ingenious, and can think of all civil service is?" "Jasper," said Mrs. kinds of designations for variations of the same color. So we have "old colonial yellow," "tip of the canary's "old ivory," "golden sands," "golden rod" and dozens of others. Most of these shades are attractive, and none are downright ugly, so long as one likes yellow at all.

It is a peculiarity of yellow that the yellow showing up bright and dis-tinctive against a dark brown back-

Among other directions in which vellow will be the dominant color must be mentioned luncheons and teas. There will be yellow luncheons and yellow teas. The charming effect of vellow lamp shades, and yellow ribbons setting off the pure white napery of well-appointed luncheons, can be imagined. It will be even better than the pink, which has so long held sway at these functions. On a dark afternoon, too, yellow decorations will brighten up a room almost as much as the rays of sunsh e.- New York

I've found it out since."-Chicago Tribune.

When the Kaiser Travels.

On the day before the Kaiser sets out on a railway journey extraordinary precautions are taken less any mishap should befall the imperial traveler. Every bridge is minutely examined, and in particular tunnels, bridges, etc., as well as the state of rails. The engineer is made responsible for their being in a fit condition. On the day of the journey itself, and shortly before the court train starts, a pilot train or locomotive with an engineer is sent on ahead for a short distance and the line of route again gone over and examined. If there are sleepers, loose rails or stones lying in the vicinity of a building place they are watched during darkness by people specially deputed for that purpose. On the approach of the train the number of men set to watch the line of route is increased, while others are placed before and in the tunnels, at level crossing and on the larger bridges. Several officials, who are made answerable for everything being in perfect order, as well as for any delays, accompany the train. In case any defects in the locomotive of the court train should become manifest engires are ready to be substituted. The traveling and non-traveling public is kept at a distance from the train at stations where stoppages are made for any purpose whatsoever. Signals at night are avoided so as not to disturb the repose of the monarch. The railway officials are in a state of feverish anxiety; telegrams fly to and fro, and the least delay is announced. In short, every conceivable measure is taken to cause the journey of the exalted traveler to pass off as easily and as pleasantly as

House of Commons Manners,

possible. - London Telegraph.

It is striking to what an extent the manners of the House of Commons have changed within the lifetime of Mr. Gladstone and Mr. Villiers. When Mr. Ferrand, the member for Knaresborough, was making a furious attack on Cobden, according to the latter's description, "Colonel Subthorpe plied the fellow with oranges to suck, in an affectionate way that resembled a monkey fondling a bear." Fancy Mr. "Tommy" Bowles plying Sir Ellis Ashmead-Bartlett with oranges during one of the latter's fiery attacks on Mr. Chamberlain! In Burke's day honorable members used to lie full length along the benches in riding-boots, and amuse themselves, not only by sucking oranges, but by cracking nuts. -London Saturday Review.

Gladness Comes

With a petter understanding of the W transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual dis-ease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you pur-chase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all rep-utable druggists.

If in the enjoyment of good health,

and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with "These undershirts I bought here the well-informed everywhere, Syrupof Figs stands highest and is most largel "I remember it," said the clerk." used and gives most general satisfaction.

A DT7 or Commission to them warm enough?"

"They were warm enough when I first put them on, but I didn't think to not make any difference whether you have business or not. Ladies can do as well as

"Yes. Ever since they were washed gentlemen. Paper devoted to the upbuilding the baby has been wearing them.

to her hand. It is not only in dresses and linings

" "crushed lemon," "autumn
"buttercup," "brimstone,"

certain shades of it can be worn by either blondes or brunettes. The rich effect of yellow in conjunction with dark hair and bright brunette complexion is understood by every one. But it is a new thing to many blondes to learn that there are shades of yellow that are most becoming to their complexions. It is the intention to use yellow a great deal in connection with brown in dresses and hats this autumn. It is a pretty combination,
