Desperation of An Unloved One. A Washington lady who has been abroad with her little daughter, tells this story: The little maiden had a French nurse, of whom she was very fond, and who supplied her with most of her amusements. One day this nurse departed and her small charge didn't know what to do with herself. She wandered about the house, upstairs and down, into the garden and back again, and finally hung about her mother, who was busy just then with the baby. The pains I had to stand were something dreadful. My husband told me to try a bottle of Lydia E. Pinkham's medicine, which I did, and after taking It for a while, was cured. # Drunken Poultry.

The Scotch newspapers are just new pushing a story of drunkenness in poultry. It appears that one John Turner, of Laggan, complained to the magistrates that the refuse from a distillery was allowed to flow into an adjoining stream. The fact that the stream contained something more than mere water was soon found out by the of feathers on his cap. complainant's ducks, and by some means or other his hens got on to the 'good thing" and pushed the thing along to such an extent that they were in a perpetual state of intoxication, except on Sundays, when the distillery failed to turn out its inebriating refuse. They, however, made up for lost time on Mondays, and a lad had to be engaged especially to look after the flock. In proof of his statement Turner produced in court a hen which was in an incipient stage of delirium tremens, and the remainder were said to have been too tipsy for presentation.

The Best Data He Could Give. I have a friend who is connected

GIRLS OF THE PERIOD. Much comment has recently arisen among fashionable people regarding the unusual and even phenomenal size of this new generation of women. In eight out of ten cases these young girls are a full head and shoulders taller than their mammas. Five feet eight or nine inches is no longer regarded as an unusual height for a debutante, and this Junoesque stature is supplemented as a rule by broad; shapely shoulders, a firm, round waist, with harmonious proportions of arms, hips and bust. The new woman from merely physical standpoint is not only fair to look upon, but promises iteady nerves as a wholesome mother

CASEUER OF A NATIONAL BANK. The First National Bank of Huntington, Ind., has a lady cashier, Mrs. Sarah Frances Dick, and a lady director, Mrs. Fredericka Drover, and is probably the only bank in the country bearing such distinctions. Mrs. Dick is also a director in the institution. Mrs. Dick was appointed assistant cashier in 1873. She was then Miss Sarah F. McGrew, and her father was cashier of the bank. She served in that capacity until 1881, when the bank was reorganized. Mr. McGrew then became President, and his daughter was appointed cashier and was also elected a director. In 1878 she was married to Juius Dick, one of the most prominent merchants of Huntington. Ever since 1881 Mrs. Dick has been cashier of the bank, and her work in that capacity has been unquestionably accurate and able.

The lady received a common school education in the schools of this city and afterward took a business course in a college at Dayton, Ohio, thus fitting her for work in the bank.

Mrs. Dick is quick and accurate in transactions and an expert at handling currency and coin. She writes a very rapid, heavy, bold hand. The rapidity with which she despatches business has been freely commented upon. She has no assistant in the cashier's work, but with accurate dertness she keeps the bank clear of a crowd during the most busy time. She writes the notes, drafts, and deposit certificates, computes interest on collections, cashes checks, discount papers, etc., with such swiftness that a gentleman was one day moved to keep a record of her transactions. At the close of the day's business it was standpoint. It offers no temptations found that she handled over \$54,000 in small amounts, making over 600 distinct transactions in 360 minutes, less lanch hour, an average of 35 seconds for each transaction, and the cash balanced to a cent.

Mrs. Dick is a tall, handsome and graceful blonde. With this purpose in view a visit was made to the nome of Mrs. Gaffin, and she was found to be one of those pleasant little women whom one meets with, now and then, in the constantly recurring changes in life. She gave the reporter a cordial welcome, and upon learning the object of the unexpected call, she bright-ly responded: "Well, I know of no reason why I should object to an interview if the report is not exaggerated. I am personally indebted to Dr. Williams' Pink P. s, and if my testimony can be the means of helping some one else who suffers as I suffered I surely ought not to withhold it.

"A year ago last October I caught a severe cold which resulted in rheumatism in my left side, causing me a great deal of suffering. I used plasters and home remedies, but ob-tained very little relief until the January following. I did not suffer this severe pain any more until March. In stooping a terrible pain struck merialt in the small of the back. and in a few seconds had branched down my left side, extending even to my toes. I had to call my son to assist me into the house, and from that time the pain was a most unbearable. For six week I had no restui sleep. During that time I used all the old remedies and many new ones, even sending to Chicago for medicines, but none of them did meany good. I was all bent over and

drawn up until I could scarcely get about at all, and oh! how I did suffer! "Finally, one day, I told my son when he started to town, to bring me a box of Dr. Williams' Pink Pills; that I had tried everything else, and they might do me some good. He brought the box and 1 at once began to use them according to directions, and I be gan to improve by the time I had taken the fourth or fifth pill, and when I had finished the box I was entirely relieved, and could walk about as erect as ever. But I sent for another box. That was in June of last year, and I have never had a pair since. Every morning when I awake I am thankful and think how good it is to de in such com-fort. # Pill Clothes.

The good pill has a good coat. The pill coat serves two purposes; it protects the pill, enabling it to retain all its remedial value, and it disguises the taste for the palate. Some pill coats are too heavy; they will not dissolve inthe stomach, and the pills they cover pass through the system as harmless as a bread pellet. Other coats are too light, and permit the speedy deterioration of the pill. After 30 years exposure, Ayer's Sugar Coated Pills have been found as effective as if just fresh from the laboratory. It's a good pill with a good coat. Ask your druggist for
