World to End This Year.

This is the recent decision of one of the prominent societies of the world, but the this prediction, there are thousands of oth- fect?" ers who not only believe, but know that Hostetter's Stomach Bitters is the best medicine to cure dyspepsia, indigestion, consti-pation, biliousness or liver and kidney troubles. A fair trial will certainly con-

"I have given the best years of my life to the service of my country," said the statesman, leaning back in his luxurious chair.
"Given?" echoed the visitor from the old home. "Wy, Bill, all the focks down our way say you sold 'ein,"

WHAT IS OVARITIS?

A dull, throbbing pain, accompanied by a sense of tenderness and heat low down in the side, with an occasional shooting pain, indicates inflamnation. On examination it will be found that the region of pain shows some swelling. This is the first stage of ovaritis, inflammation of the ovary. If the roof of your house leaks, my sister, you have it fixed at once; why not pay the same respect to your own body?

You need not, you ought not to let yourself go, when one of your own sex he ds out the helping hand to you, and will advise you without money, and without price. Write to Mrs. Pinkham, Lynn, Mass., and tell her all your symp-

toms. Her experience in treating female ills is greater than any other living person. Following is a letter from a woman who is thankful for

avoiding a terrible operation.
"I was suffering to such an extent from ovarian trouble that my physician thought an operation would be necessary.

"Lydia E. Pinkham's Vegetable Compound having been recommended to me, I decided to try it. After using several bottles I found that I was cured. My entire system was toned up, and I suffered no more with my S"_MRS ANNA ASTON, Trov, Mo.

A Rummage Sale Incident. If one has anything around the "I suppose you feel the usual regret house one wants to get rid of, the rummage sale. There is a perfect

craze just now for this form of enter-"Yes," answered the hollow-chested tainment or charity, whichever it may man with a slight cough. "I kind of be, for all rummage sales are not alike. wish I had paid less attention to books This true story proceeds from a recent An enthusiastic young woman attended the sale and returned from it in great glee.

"Wait until you see what I've found," she announced to her mother; "just what we have been looking for in every attic and antique shop for years. I knew we'd get it some day, and now you won't laugh at rummage sales any

"What is it?" asked the dear old

"It's a mate to that antique candlestick you've had so long and never exact day has not yet been fixed upon, and while there are very few people who believe the bundle. "There! isn't that per-

"It is indeed," replied her mother, a queer little smile playing about her face. "In fact, it is the same, I got tired of having it around the house, and sent it to the rummage sale to get rid of it."-New York Mail and Ex-

Analytical Portraiture. The idea of combining many pic-

tures in one composite photograph, so as to get a type face, was brought out nearly twenty years ago by Francis Galton, F. R. S., who has now devised the opposite plan of analytical portraiture in which it is sought to record what is individual in the expression by combining different photographs of the same face. Two portraits, for example, may show a man with normal expression and when he is smiling. On placing a carefully made positive of one picture on a negative of the other, details common to both are obliterated, and the result is that only the smile is left. When the process is fully worked out, it is expected to give physiologists and artists an important means of analyzing expression. From the portrait mentioned, it has been learned already that the smile is an act involving the whole face, and not, as we have been led to believe, simply a few muscles around the mouth.

American Coal Superior.

According to a statement in a Berlin journal, tes s have been recently made in Germany of coal from the West Virginia fields and it is claimed that the result shows that the quality is superior to the best Welsh coal for gas producing. It is believed that this will be one reason for the importation of American soft coal in larger quantities to Germany within the next

All goods are alike to PUTNAM FADELESS DYES, as they color all fibers at one boiling. Sold by all druggists.

New Coal-Shipping Record. The shipment of coal from Baltimore for-oreign prots in January aggregated 55,199 tons, making a new monthly record. The coal went to ten different countries.

Happiness cannot be bought but one of the great hindrances to its attainment can be removed by Adams' Pepsin Tutti Frutti.

CAPTAIN OF FIRE DEPT.

Capt. H. H. Tilomson Advises the Use of Dr. Greene's Nervura.

This Wonderful Body Builder and Strength Restorer Should Be Used Now.

CAPT. H. H. THOMSON OF MINNEAPOLIS FIRE DEPT.

No occupation in the world requires more perfect nerve force and physical strength than is demanded of its members by a modern fire department. The members of this branch of the public service must be ready at all hours of the day or night, and in all degrees of heat, cold or exposure, to answer the call of the public, and protect life and property. At all times they must have bodily strength and a clear brain. Without this we would never hear of the worderful facts of heavery and resour performed by them. Nothing in of the wonderful feats of bravery and rescue performed by them. Nothing in the world will build up strength like Dr. Greene's Nervura blood and nerve remedy. Captain Thomson's strong statement, which we publish herewith, carries weight, and is echoed everywhere by those who rely on Dr. Greenes, Nervura blood and nerve remedy, when disease attacks them, or they get run down in health which is so easy at this season of the year. There is no medicine in the world which will ward off attacks of the fatal grip, which is now so prevalent, and there is nothing which will drive it away so quickly or reinvigorate the body as well after the grip, as this famous remedy. Captain Thomson, whose address is 2406 Lincoln St., North East, Minneapolis,

"I am a great believer in the wonderful curative powers of Dr. Greene's Nervura Blood and Nerve Remedy. It has been used in my house for years as a body builder, strength restorer and general family medicine. It never fails to give beneficial results. It strengthens the nerves and purifies the blood. As a health builder, I believe there is no medicine equal to Dr. Greene's Nervura Blood

and Nerve Remedy." Remember that Dr. Greene's Nervura Blood and Nerve Remedy is the prescription of a regular physician, Dr. Greene, who can be consulted absolutely free of charge either by mail or calling at his office, 35 W. 14th St., New York City. Consultation is absolutely free of charge. If you cannot call upon him at his office, write him a latter, telling all about your case, and you can be treated just as well at home as if you called in person. Remember his advice

is absolutely free.

What Is the Dairy Type? The most profitable dairy cow is one that has no tendency to put on

Lesa has a good appetite and a large stomach, indicating great consuming and assimilating capacity. A cow with this conformation is said to be of the true dairy type.

Wheat Chaff as a Mulch. Wheat chaff as a mulch may seed

the land with wheat, which will be sure to grow in spring when the mulch is removed. Strawberries should be mulched with straw or leaves, using cornstalks to hold the straw. Planing mill shavings are excellent if they can be obtained.

Best Soils for Sheep.

Sheep will not thrive on all kinds of soils. Some breeds are very active and will thrive in large flocks, but the large mutton breeds require good pasturage, and will not give satisfactory results if compelled to work over large areas for all they get. All sheep should have dry soils. Foct rot will always occur in a flock that is kept constantly on wet lands.

Kale as Food for Stock.

The thousand-headed kale is a varicty that is highly esteemed in England as food for stock. It forces lambs as rapidly as does rape, and it is claimed that it never causes gases in the stomach of an animal. The seeds are planted early, or the plants may be started in a hotbed for an early supply, being transplanted as soon as the season opens. It is termed thousand-headed kale because the stalk supports a large number of small heads. In this country the Essex rape is preferred, and it has been tested in all sections, especially as food for

Changing Seed.

There is yet much to be learned about the matter of increasing crops by obtaining seed from other sections than that where it is to be planted. At the lowa Experiment station they obtained potatoes from Canada and planted them by the side of seed grown upon their own soil, from the seventh crop of that variety grown there. They obtained 754 bushels per acre from the Canada seed, and 109 bushels from the home grown seed. Yet the results are not always that way even with potatoes. It may be said that generally home grown potatoes do not produce as much as seed grown farther north, but it is not an invariable rule, and some successful growers would not trust their crop to seed which they had not grown and saved themselves, and say that when they have tried it home grown seed has always produced the best crop. The results of one experiment do not prove a case, and we need more, with a thorough knowledge of how the crop was grown, and seed selected in each case. We need to know if forcing a crop to grow and mature in a shorter time, either by a richer soil or cooler climate, or both, will make the seed more prolific.-The Cultivator.

Pots and Trellises for House Plants. by the old tin can in which it grew, or the dirty rag or twine string which more than a pair. By getting a supply | ment Station. of crepe paper the cans can all be

transformed into dainty jardineres. Cut the paper in strips with enough to extend from the top of the can, and around it. Then tie some bright colored cord about the can, one piece an inch from the top. By running the bottom of the paper between the thumb and finger and stretching it, it will flare out. By pulling out the paper midway between the cords, stretching it, and creasing it, the fullness in the middle will be made. The top is finished like the bottom. This is not expensive and is certainly an improvement over the old rusty cans. Where a plant is of such a nature that it requires a support of some kind, get someone to make a ladder of smooth wood and paint it white, brown or green. Fasten the plant to it with some colored twine, in harmony with the color of the plant, pot or frame. This is much better than picking up a broken branch and tying up the plant with a carpet rag. For me, the prettiest flower loses its to the beginnings of old Egypt. And charm if treated in this way .- Maud Steinway, in Agricultural Epitomist.

The Bloo I of Our Stock.

live by our blood and on it, and if the | first king of united Egypt. Never beblood is impure our systems starve! If | fore, indeed, has so remote a period too rich we break out in disease and suffer, but if just right at all times | it has been by the work this year we enjoy perfect health. This is so at Abydos." true that physicians try to get at the root of all diseases by purifying and feeding the blood. If this is kept in good condition and in healthy circulation most diseases will be thrown off and the system thereby will be saved many sufferings.

A good deal if not all this practical wisdom is applicable to the live stock which we raise on our farms-the cows, pigs, sheep and poultry. The blood is the all essential constituent that makes good or bad animals. Let that get out of order and then the door is thrown open for all sorts of physical disorders. There is hardly a disease that cannot be traced back directly or indirectly to the blood. Even the colds which the animals suffer with would never have been contracted had the blood been all right. If the blood had been pure, rich and in good circulation the animals would have been able to throw the cold off,

or never to have taken it at all. Consequently, we need to pay a little attention in the winter time to feeding for blood, and for seeing that it is all right. Richness of blood sometimes means impurity, and that is not to be desired any more than impoverished blood. Animals that are shut up in close winter quarters and fed heavily on rich foods will invariably have thick, sluggish blood which may cause fevers and other troubles Swine cholera owes its origin to feverish, thick and sluggish blood. When turned out in the clover lot, they keep their blood cooled off, and they rarely suffer from cholera. We cannot afford to feed our stock with too highly concentrated food in | men bathe once or twice every day.

winter unless we can give them daily exercise sufficient to counteract the effect of this and feed th m also with roots, vegetables and cher green things. If we do, trouble will follow sooner or later, and then the mischief is done. It is much easier to upset the system of an animal than to correct it and bring it back to a state of good health. The danger confronting us now at this season is that of heavy feeding with not sufficient variety either of food or exercise. Neither can be neglected, and a good stack of roots is an excellent thing to begin the winter with for daily feeding .- William Conway, in American Cultivator.

Taking Composite Milk 5: mples. The modern creamery and cheese factory uses the Babcock test for determining the richness of the milk delivered by each patron. The most common and satisfactory method of paying for the milk according to its test is to take a small sample of each lot of milk every day, pour this intoa covered glass jar containing a small amount of some preservative and at the end of a week or ten days test this composite sample. The essential features of the process are given in the following directions:

Provide a pint or quart jar or bottle for each patron. Label each bottle with a number, giving the same number to a patron on the milk recording sheet. Composite test sample bottles made for this purpose with a tin cover and numbered brass tag wired to the neck of each bottle can be obtained of creamery supply firms. These sample bottles should be placed on shelves within easy reach of the weigh can, and protected from the light.

A preservative is put into each clean bottle to keep the milk from souring, until testing day. Pulverized potassium bichromate, corrosive sublimate, borax or preservaline can be used for this purpose. Some of these preservatives are put in tablet form, each tablet containing the necessary amount to use in one sample. After each lot of milk is poured into the factory weigh can, a small amount of it is dipped from the can and poured into the proper sample bottle. These samples are usually taken with a small one ounce tin dipper, a sampling tube, or from a drip in the con-

ductor spout. Each lot of milk sampled must be sweet, containing no clots, lumps or curdled milk, or small butter granules. The sample should be taken just as soon as the milk is weighed, and while it is evenly mixed. Continue adding a sample of each patron's milk to his particular jar every time he delivers milk for a week of ten days, then test this composite sample. The composite sample jars should be kept covered to prevent loss by evaporation, and in a cool dark place. Every time a new portion of milk is added to the jar it should be given a horizontal rotary motion to mix the cream already formed in the jar with the milk, and to rinse off the cream sticking to its side. Unless this is done every time fresh portions of milk are added to the jar the cream on the milk becomes lumpy and sticks in patches to the side of the jar, thus making it nearly impossible to evenly distribute this cream through the entire sample.

Composite samples having patches of dried cream on the inside of the We often see a blooming house ignorance on the part of the operator. takes the place of a separate daily test and gives accurate information ties it fast to a splinter or piece of regarding the average quality of the stick which serves as a trellis. Eight Thousand Years Ago.

It may be safely said, to quote Professor Petrie, the famous egyptologist, that there has never been a greater extension of the knowledge of man's past history in any decade than the discoveries of the last five years in Egypt have unfolded. In a recent informal address at a general meeting of the Egypt exploration fund, Professor Petrie gave a brief account of our present knowledge of "prehistoric history," and of the latest work of Abydos, where the tombs of the first dynasty kings, who ruled Egypt somewhere between 5000 and 6000 B. C., were found. He said: "Step by step mysterious ages which no man ever hoped to know again are being gradually laid bare before us. The Homeric age stands revealed as being but the decadence of a greater glory which dazzled us at Tiryns, at Mycenae and still more at Knossos. And how great a mystery has always clung now from the royal tombs of Abydos we have seen and handled this summer the drinking bowls and furniture of the kings of the first dynasty; even There is a common saying that we the property of Menes himself, the been brought completely before us as

Thought He Grasped the Idea. In the fifth grade of a grammar school not many miles from the state house, the following story was read by the teacher, and the class told to write it from memory: "A farmer planted a field of corn and placed a net over it, as a protection from the birds. Next morning he found a number of crares and a stock caught in the net. The stork begged the farmer to release him, saying: 'I am a bird of excellent character.' The farmer laughed and said: 'You were caught in the company of these robbers, and with them you must die.' "

Great stress was laid upon the word 'character," the teacher explaining that a boy, girl or bird found in bad company showed great lack of character. The following is a copy of one of the papers actually produced and handed in by one of the pupils, a boy

"A farmer went out in the farm one day and he saw character and between them was a stork. "He caught the stork and the char-

set him free. But the farmer said you were in there company and you must die with them. "The stork said he was not like character. I am bird of freedom."-

Where Artificial Limbs Are Made: An artificial limb factory is rather a grewsome place. Appliances for every variety of crippled leg or arm are there; legs for hip, knee and ankle amputations, for deformities, arms, hands, fingers, toes. In one room webbing and leather are being made into supports and straps to fasten around the shoulder or waist, or, as is often done in a woman's case, to the corset. Socks to be worn on the artificial feet are also made in this room. Next door is the wood shop, where willow and basswood, carefully seasoned, are carv-

ed into the contours of natural limbs. every leg and arm being different in form, size and character from all others, because each is moulded after a special model, to suit the person who is to wear it. Further on, these wooden moulds are covered with tightly ctretched rawhide, which gives lateral strength, and this rawhide receives an enamel coating. In another room rubber is being vulcanized and moulded into feet and hands which are covered with calfskin. The sponge rubber used s lighter than wood, and absolutely odorless. It is covered with waterproof enamel and no change of temperature less than 280 degrees can affect it. In the last stage of the process the eg or arm is set up, the parts put to-

usted .- New York Sun. To Preach in Dutch or in English. The members of the Central Reormed Church of Sloux Centre, Iowa, have been engaged in a bitter legal and social controversy as to whether

gether and the springs and straps ad-

their pastor should preach his sermons in Dutch or in English. One faction n the church applied recently for an injunction to restrain him from preaching in Dutch. The application as denied, the Judge being of opinion that he lacked jurisdiction. The same faction then tried to gain the desired result by bringing a suit based of the theory that the pastor was required by his contract to preach all his sermons in English. The result of this latter action is not known

ore Hands

One Night Treatment

Soak the hands on retiring in a strong, hot, creamy lather of CUTICURA SOAP. Drv. and anoint freely with CUTICURA, the great skin cure and purest of emollients. Wear, during the night, old, loose kid gloves, with the finger ends cut off and air holes cut in the palms. For red, rough, chapped hands, dry, fissured, itching, feverish palms, with shapeless nails and painful finger ends, this treatment is simply wonderful, and points to a speedy cure of the most distressing cases when physicians and all else fail.

CIPCON CUICUPA

WAS troubled with hands so sore that when I put them in water the pain would near set me crazy, the skin would peel off, and the flesh would get hard and break, then the blood would flow from at least fifty places on each hand. Words never can tell the suffering I endured for three years.

I tried at least eight doctors, but my hands were worse than when I commenced doctoring. I tried every old Granny remedy that was ever thought of without one cent's worth of good and could not even get relief.

I would feel so badly mornings when I got up, to think that I had to go to work and stand pain for eight or nine hours, that I often felt like giving up my joe, which was in the bottling works of Mr. E. L. Kerns, the leading bottler of Trenton, N. J., who will vouch for the truth of my sufferings.

Before I could start to work, I would have to wrap each finger on both hands, and then wear gloves, which I hated to do, for when I came to take them off, it would take two hours and the flesh would break and bleed. Some of my friends who had seen my hands would say, "If they had such hands they would have them amputated"; others would say "they would never work," and more would have the form the first them. turn away in disgust. But thanks to Cuticura, the greatest of skin cures, it ended all my sufferings.

Just to think, after doctoring three years, and spending dollar after dollar during

that time, Cuticura cured me. It has now been two years since I used it and I do not know what sore hands are. I never lost a day's work while I was using it or since, and I have been working at the same business, and in acids, etc.
