

ANOTHER WAY OF LOOKING AT IT.

"I suppose you feel the usual regret at not having further improved your opportunities as a student," said the young man just out of college.

"Yes," answered the hollow-cheeked man with a slight cough. "I kind of wish I had paid less attention to books and more to foot ball and rowing."

Washington Star.

PLEASING PART OF IT. "Gertrude is always talking about her lineage. Wonder what about her family tree?"

"Don't know so much about the tree, but the leaves amounted to a big fortune for her ancestors." — Denver News.

World to End This Year. This is the recent decision of one of the prominent societies of the world, but the exact day has not yet been fixed upon, and while there are very few people who believe this prediction, there are thousands of others who do not only believe, but know that Hostetter's Stomach Bitters is the best medicine for dyspepsia, indigestion, constipation, biliousness or liver and kidney troubles. A fair trial will certainly convince you of its value.

A Sneeze. "I have given the best years of my life to the service of my country," said the statesman, leaning back in his luxurious chair. "Given" echoed the visitor from the old home. "Why, Bill, all the folks down our way say you sold 'em."

WHAT IS OVARITIS?

A dull, throbbing pain, accompanied by a sense of tenderness and heat low down in the side, with an occasional shooting pain, indicates inflammation. On examination it will be found that the region of pain shows some swelling. This is the first stage of ovaritis, inflammation of the ovary. If of your house leaks, my sister, you have it fixed at once, why not your ovaries? Write to Mrs. Pinkham, Lynn, Mass., and tell her all your symptoms. You need not, you ought not to let yourself go, when one of your own sex has done the helping hand to you, and will advise you without money, and without price. Write to Mrs. Pinkham, Lynn, Mass., and tell her all your symptoms.

Mrs. ANNA ASTOR.

Her experience in treating female ills is greater than any other living person. Following is a letter from a woman who is thankful for avoiding a terrible operation.

"I was suffering to such an extent from ovarian trouble that my physician thought an operation would be necessary.

"Lydia E. Pinkham's Vegetable Compound having been recommended to me, I decided to try it. After using several bottles I found that I was cured. My entire system was toned up, and I suffered no more with my ovaries." — Mrs. ANNA ASTOR, Troy, Mo.

CAPTAIN OF FIRE DEPT.

Capt. H. H. Thomson Advises the Use of Dr. Greene's Nervura.

This Wonderful Body Builder and Strength Restorer Should Be Used Now.

CAPT. H. H. THOMSON OF MINNEAPOLIS FIRE DEPT.

No occupation in the world requires more perfect nerve force and physical strength than is demanded of its members by a modern fire department. The members of this branch of the public service must be ready at all hours of the day or night, and in all degrees of heat, cold or exposure, to answer the call of the public, and protect life and property. At all times they must have bodily strength and a clear brain. Without this we would never hear of the wonderful feats of bravery and rescue performed by them. Nothing in the world will build up strength like Dr. Greene's Nervura blood and nerve remedy. Captain Thomson's strong statement, which we publish herewith, is a good illustration of the body as well as of the grip, as this famous remedy, Dr. Greene's Nervura blood and nerve remedy, when disease attacks them, or they get run down in health which is so easy at this season of the year. There is no medicine in the world which will ward off attacks of the fatal grip, which is now so prevalent, and there is nothing which will drive it away so quickly and so thoroughly as Dr. Greene's Nervura blood and nerve remedy. Captain Thomson, whose address is 2406 Lincoln St., North East, Minneapolis, Minn., says:

"I am a great believer in the wonderful curative powers of Dr. Greene's Nervura Blood and Nerve Remedy. It has been used in my house for years as a body builder, strength restorer and general family medicine. It never fails to give beneficial results. It strengthens the nerves and purifies the blood. As a health builder, I believe there is no medicine equal to Dr. Greene's Nervura Blood and Nerve Remedy."

Remember that Dr. Greene's Nervura Blood and Nerve Remedy is the prescription of a regular physician, Dr. Greene, who can be consulted absolutely free of charge either by mail or calling at his office, 35 W. 14th St., New York City. Consultation is absolutely free of charge. If you cannot call upon him at his office, write him a letter, telling all about your case, and you can be treated just as well at home as if you called in person. Remember his advice is absolutely free.

AGRICULTURAL HINTS

What Is the Dairy Type?

The most profitable dairy cow is one that has no tendency to put on flesh and a good appetite and a large stomach, indicating great consuming and assimilating capacity. A cow with this conformation is said to be of the true dairy type.

Wheat Chaff as a Mulch.

Wheat chaff as a mulch may seed the land with wheat, which will be sure to grow in spring when the mulch is removed. Strawberries should be mulched with straw or leaves, using cornstalks to hold the straw. Planing mill shavings are excellent if they can be obtained.

Test Soils for Sheep.

Sheep will not thrive on all kinds of soils. Some breeds are very active and will thrive in large flocks, but the large mutton breeds require good pasture, and will not give satisfactory results if compelled to work over large areas for all they get. All sheep should have dry soils. Foot rot will always occur in a flock that is kept constantly on wet lands.

Kale as Food for Stock.

The thousand-headed kale is a variety that is highly esteemed in England as food for stock. It forces lambs as rapidly as does rape, and it is claimed that it never causes gases in the stomach of an animal. The seeds are planted early, or the plants may be started in a hotbed for early supply, being transplanted as soon as the season opens. It is termed thousand-headed kale because the stalk supports a large number of small heads. In this country the Essex rape is preferred, and it has been tested in all sections, especially as food for sheep.

Changing Seed.

There is yet much to be learned about the matter of increasing crops by obtaining seed from other sections than that where it is to be planted. At the Iowa Experiment station they obtained potatoes from Canada and planted them by the side of seed grown upon their own soil, from the seventh crop of that variety grown there. They obtained 754 bushels per acre from the Canada seed, and 109 bushels from the home grown seed. Yet the results are not always that way even with potatoes. It may be said that generally home grown potatoes do not produce as much as seed grown farther north, but it is not an invariable rule, and some successful growers would not trust their crop to seed which they had not grown and saved themselves, and say that when they have tried it home grown seed has always produced the best crop. The results of one experiment do not prove a case, and we need more, with a thorough knowledge of how the crop was grown, and seed selected in each case. We need to know if forcing a crop to grow and mature in a shorter time, either by a richer soil or cooler climate, or both, will make the seed more prolific. — The Cultivator.

Pots and Trellises for Blooming Plants.

We often see a blooming house plant with beauty marred if not ruined by the old tin can in which it grew, or the dirty rag or twine string which ties it fast to a splinter or piece of stick which serves as a trellis. Many plant enthusiasts declare that they have better results with the tin cans than with the regular clay pots. This may be true, and the cans can be transformed into ornamental vessels, combining cheapness with beauty. Jardinieres are too much of a luxury for the average housewife to own more than a pair. By getting a supply of crepe paper the cans can all be transformed into dainty jardinieres.

Cut the paper in strips with enough to extend from the top of the can, and around it. Then tie some bright colored cord about the can, one piece an inch from the top. By running the bottom of the paper between the thumb and finger and stretching it, it will flare out. By pulling out the paper midway between the cords, stretching it, and creasing it, the fullness in the middle will be made. The top is finished like the bottom. This is not expensive and is certainly an improvement over the old rusty cans. Where a plant is of such a nature that it requires a support of some kind, get someone to make a ladder of smooth wood and paint it white, brown or green. Fasten the plant to it with some colored twine, in harmony with the color of the plant, pot or frame. This is much better than picking up a broken branch and tying up the plant with a carpet rag. For the prettiest flower loses its charm if treated in this way. — Maud Steinway, in Agricultural Epitome.

The Blood of Our Stock.

There is a common saying that we live by our blood and on it, and if the blood impure our systems starve! If too rich we break out in disease and suffer, but if just right at all times we enjoy perfect health. This is so true that physicians try to get at the root of all diseases by purifying and feeding the blood. If this is kept in good condition and in healthy circulation most diseases will be thrown off and the system thereby will be saved many sufferings.

A good deal if not all this practical wisdom is applicable to the live stock which we raise on our farms, the cows, pigs, sheep and poultry. The blood is the all essential constituent that makes good or bad animals. Let that get out of order and then the door is thrown open for all sorts of physical disorders. There is hardly a disease that cannot be traced back directly or indirectly to the blood. Even the colds which the animals suffer with would never have been contracted had the blood been all right. If the blood had been pure, rich and in good circulation the animals would have been able to throw the cold off, or never to have taken it at all.

Consequently, we need to pay a little attention to the winter time feeding for blood, and for seeing that it is all right. Richness of blood sometimes means impurity, and that is not to be desired any more than impoverished blood. Animals that are shut up in close winter quarters and fed heavily on rich foods will invariably have thick, sluggish blood which may cause fevers and other troubles. Swine cholera owes its origin to feverish, thick and sluggish blood. When turned out in the clover lot, they keep their blood cooled off, they rarely suffer from cholera. We cannot afford to feed our stock with too highly concentrated food.

When Artificial Limbs Are Made. An artificial limb factory is rather a grewsome place. Appliances for every variety of crippled leg or arm are there; legs for hip, knee and ankle amputations, for deformities, arms, hands, fingers, toes. In one room webbing and leather are being made into supports and straps to fasten around the shoulder or waist, or, as is often done in a woman's case, to the corset. Socks to be worn on the artificial feet are also made in this room. Next door is the wood shop, where willow and basswood, carefully seasoned, are carried into the contours of natural limbs, every leg and arm being different in form, size and character from all others, because each is moulded after a special model, to suit the person who is to wear it. Further on, these wood-en moulds are covered with tightly stretched rawhide, which gives lateral strength, and this rawhide receives an enamel coating. In another room rubber is being vulcanized and moulded into feet and hands which are covered with calfskin. The sponge rubber used is lighter than wood, and absolutely odorless. It is covered with waterproof enamel and no change of temperature less than 280 degrees can affect it. In the last stage of the process the leg or arm is set up, the parts put together and the springs and straps adjusted. — New York Sun.

To Preach in Dutch or in English.

The members of the Central Reformed Church of Sioux Centre, Iowa, have been engaged in a bitter legal and social controversy as to whether their pastor should preach his sermons in Dutch or in English. One faction in the church applied recently for an injunction to restrain him from preaching in Dutch. The application was denied, the Judge being of opinion that he lacked jurisdiction. The same faction then tried to gain the desired result by bringing a suit based on the theory that the pastor was in breach of his contract to preach all his sermons in English. The result of this latter action is not known.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Dr. F. J. CROSBY & Co., Props., Toledo, O. We, the undersigned, have known F. J. Crosby for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligation made by him for us.

Dr. Bull's Cough Syrup

Cures a cough or cold at once. Croup, bronchitis, whooping cough, grippe and consumption, 25c.

Wanted—At Once!

Traveling salesmen with without experience or capital, and a good knowledge of the Pecosham Tobacco Works, Bedford, (N. Y.)

Cotton Mill For Americans.

A proposition has been made to establish a \$10,000,000 cotton mill at Amherst, Va., provided the citizens will subscribe \$40,000.

A 'RIGID' WHEEL.

Mr. Longbow—I had a nasty mishap last week; broke the rear wheel of my machine when I was twenty miles from home.

Mr. Gully Bell—How did you get back?

Mr. Longbow—Fortunately I was close to a railway station, so I went to the buffet and got a mincepie; I got a blacksmith to drill a hole in the middle, and we fitted it on the machine in the place of the broken wheel.—Pick-Me-Up.

HAD LEARNED IT.

Mrs. Gallagher—Rumors fly, don't they, Missis Flannigan?

Mrs. Flannigan—Indeed they do; awnly this week was left me without payin' my rint.—Columbus (Ohio) State Journal.

Best For the Bowels.

No matter what ails you, headache to a cancer, you will never get well until your bowels are put right. Cascarb's help nature, cure you without a grip or pain, produce no constipation, cost you just 10 cents to start; getting your health back. Cascarb's Candy Cathartic, the genuine, put up in metal boxes, every market has U.C.C. stamped on it. Beware of imitations.

Portable Cottages.

Machine made portable houses for dwellings will probably become more commonly used as people become acquainted with their advantages and as inventors of lumber become sufficiently interested to engage in their production.

Carter's Ink.

has the largest sale of any ink in the world, because it is the best ink that can be made.

A Bad Papa.

"I think papa is dreadful," sobbed little three-year-old Margie, who had just been chastised by her father. "Was he the only man you could get, mamma?"
