She says So broad are these models that they will surely have to be made narrower the hunting I have done both at home to fit the breadth of shoulder of the average woman.

Child Training in Germany,

In the German cities it is most refreshing to find scattered through each park many good sized beds of clean sand. These beds are confined by n wooden border to prevent the sand being scattered or washed away by skill. I know that it has confronted rains. No matter how small the park, or in what quarter of the city it is cituated, one is sure to find at least four or five of these small spots of I have ended with the sharp, yet merdelight for the children; and from early morn until sometimes far into the twilight you will never find one of there little enclosures entirely deserted. It is here the little toddlers' as death deprived him of the power legs carry them as soon as they reach to wreak his vengeance on the are in the cr arms and t

herself everything runs smoothly, but any interference or suggestion to the little workers is usually met with resentment. Mechanical or other toys in the hands of older persons intended or displayed for the amusement of children are simply nothing as compared with the pleasure derived from these sand heaps. They, without doubt, not only provide amusement, but at the same time seres to educate the infant mind. An hour spent in watching the children can be made a ent a student at Wellesley College. most profitable one in studying the mind, temperament, nature, and resources of these little men and women. -Marianna Wheeler, in Harper's Ba-

A Girl of Pluck.

To give her name would not be right, but to tell of her pluck as an inspiration to other girls is fair and justifiable. She had enjoyed every comfort in a home of wealth. In society she was popular, for she is well bred and clever. Her rare beauty, inherited from several generations of lovely women, was known to those whom to knew is to be somebody in the social sense. Her father lost almost everythi. he had when Northern Pacific made its remarkable jump to 1000.

She gave up all but her most intimate friends, and then planned not to be a burden to her father in his hard fight to regain his fortune. She went to a dancing teacher, very efficient but not well-known to New Yorkers. She knew of him from a Western cousin who had written that he had started in New York City, and as he was splendid it might be well to send the younger children to him. The girl looked this man up.

She offered to furnish him pupils at so much a head. She gave him addresses of value, where she could not grows in favor every day. properly go herself, and then started on her own scheme. Just after school Chantilly nets are smart black trimhours and when the children are play- mings. ing on the street she would go to some quiet neighborhood. It is not difficult for a pretty girl with a sweet voice to engage children in conversation and lead them to tell where they live and if they go to dancing school. With the help of the city directory, their information and a little nerve, she visited their mothers, and the way she gathered in pupils for the dancing instuctor was astonishing. She has made a good

deal of money. "Jack," a young man who thinks as has two deep flounces, the upper one much of her as when she was the set at the back into two fluted pleats, daughter of a rich man, has been a which resemble sash ends. trouble. He persists in trying to make her give up "business," and to enter into a marriage contract with him that shall end all thought of her earning her own living. He may be successful in the end, for he is backed by he: father, who is not as poor as he was some months ago .- New York Times.

A PAIR OF SUEDES. Where They Arrived Through a Fortunate Error.

BY HARRIET HOLMES HASLETT.

For a few minutes they stood before | convenient range, where at any time the Kearny street shoe store window discussing the relative merits of white | Meredith declared that his pipe never satin and suede patent leather. Sue, smoked as well as when Bonita packed "ho was of a practical turn of mind, advised the latter.

"Gracious me, you little hayseed. my white gown. They must be white

Turning hurriedly, they precipitated themselves forcibly against a man who had been gazing dejectedly into the neighboring window at the rows of manly boots and shoes. More especially were his eyes directed toward the dancing pumps-not that he admired them, nor even wished to buy them; but, nevertheless, fired by a noble resolve, he turned to enter, just as the two girls finished their little dialogue, which he partially overheard. Two pairs of eyes flashed indignantly into his. Bee's brown ones were milder than the blue ones of the "little

"Great, clumsy thing! Couldn't he look where he was going?" "Why. Sue: it was as much our fault

Now the man was neither great nor clumsy, however much he hoped to be the former in the future and had overcome the latter in his past. Furthermore, the glimpse he had had of the brown eyes gave impetus to his resolve of purchasing a pair of patent leathers for the cotillion to which he was going, simply to please his friend, Charlie Graham. Hence he ordered and tried on the much despised articles of attire: in the meantime, casting furtive glances at the purchaser of the dainty pair of white suedes.

Then the two, without a backward look, hurried away to Beatrice Harloe's home on the Heights, leaving the clerk politely assuring them that the parcel would be sent without delaythat he would attend to it himself. No sooner had they left the store than the faithless creature turned them over to the clerk who was waiting on the purchaser of the patent leathers, and he, too, hurried away, for a little dinner at the restaurant with his best girl was not to be disturbed for any white suedes in the world.

Half-past eight was sounding by the Harloe's big hall clock, and upstairs

mem on awhile and ease them

So Marie opened the box, and they

beheld a pair of manly patent leath-

ers, slim and graceful, it is true, but

never intended for Beatrice's tiny feet.

The two girls surveyed each other in

blank dismay, then solemnly and for-

cibly there came from Sue the single

"What shall I do?" cried Beatrice,

distractedly. That wretched clerk,

after all his promises, to make such

mistake. I can't go, that's all; I

"Not go!" exclaimed Sue, "after all

ERA OF THE TROLLEY.

Still Electric Traction Has Not Reached Its Perihelion.

try. The "mile-a-minute" announceare propositions that may never get In all trolley traction projects of this made for the radiant optimism of the promoter.

That trolley traction has not yet reached its perihelion is plainly manifest from the many and extensive interurban lines that are being projected all over the Union. It will soon be possible to ride from one end of the state of Ohio to the other on trolley cars. Plans are already on foot for constructing a continuous route be tween Cleveland and Columbus. When the Columbus, London and Springfield line is completed it will be possible to ride from Columnbs to Cincinnati From Columbus north a line is now being built with a terminus at Mt. Vernon. The proposed consolidation of Sandusky and Cleveland dinas, it is believed, is the forerunner of a chain

this remarkable trolley development is its apparently imp

That the wonderful development of the trolley system of traction, which has marked the past decade, has not yet reached its limit is evidenced by the projected eight track trolley line between Jersey City and Philadelphia, a distance of 90 miles. It is announced that this line will

be equipped with trolley cars capable of attaining a speed of 60 miles an hour and that passengers will be hauled the entire distance for a 5-cent

Of course this road is only on paper as yet, but its practicability from a financial and an engineering standpoint will not be challenged in the light of the many long-distance interurban trolley lines that are now in successful operation all over the counment and the 5-cent fare for 90 miles beyond the limitations of engineering optimism, but leaving these claims out of consideration a trolley line from the Quaker city to Jersey City, paying a good dividend on the investment, is a possibility that may be easily realized. character due allowance is always

of electric railroads extending from. Buffalo to Detroit. In Indiana the movement is also toward consolidation of interurban plants, which means an ultimate network of lines covering southern Michigan, northeastern Indiana and northwestern Ohio. Massachusetts is completely covered with a vast interurban trolley system connecting nearly every city and town with the "hub" of the Bay state. A singular and interesting feature of

A TIMBER-FLUME IN BRITISH COLUMBIA.

The flumes, which are used to float logs and hewn timber from the mountain tops to the sawmills, are fed by the mountain torrents, and are in some cases between three and four miles long. The lumber men, after their week's work in camp, save a tedious journey by constructing a rough wooden skiff and using the waterway, traveling at times at the rate of a mile a minute. A gaff is used as a brake.-London Illustrated News.

years and he'll give you a pitying stare," remarked the man with a mania for statistics; "but it's a fact. The man who has reached the age of 60 has spent one-third of his life, or 20 years, in slumber and if a man is lucky enough to live until he is 75 he has Rip Van Winkle beaten to a standstill. The average person sleeps eight hours a day, or exactly one-third of his day's life. Again, if you abruptly inform a man of 60 that he has stowed a herd of cattle under his belt in his time he will put you down as a thirdyear man at an insane asylum. Figures, however, don't lie, and you can give him a statistical knockout. A healthy man eats on a conservative estimate, one pound of meat every day of his life, and in 60 years will deyour 21,900 pounds. Allowing 1000 pounds as the average weight of a beeve, you have 22 cattle, a pretty respectable herd, I think. There are lots of other surprising things that figures

One of England's Foremost Scientists. One of the most interesting of England's surviving men of science is Dr. James Glaisher, F. R. S., who recently

entered upon his 93d year. Many peo ple think of the veteran meteorologis only as an aeronaut, on account of that memorable and unparalleled ascent which he and Mr. Coxwell made nearly 40 years ago. But Mr. Glaisher is not an aeronaut, though he has made some 30 ascents skyward for scientific purposes. He is a m. eorologist, astronomer and mathematician, and-a fine sample of what a vigorous doubtless be popular with the Italian | mind in a sound body can do-hale and hearty at over 92.

city, on account of the large nurseries | it is reported that the yield of maca- men, says a writer in the New York roni wheat will be from thirty-five to Herald, lie down facing each other.

forty bushels per acre, which is onethird more per acre than the average The establishment of this new wheat baked bean city and Hub for Boston,
