DO YOU KHOW WHAT WHITE LEAD IS?

Its Chief Use and a Method of Determining Good from Bad Explained.

White Lead is the standard paint material all over the world. It is made by corroding metallic lead into a white powder, through exposing it to the fumes of weak acetic acid and carbonic acid gas; this powder is then ground and mixed with linseed oil, making a thisk paste, in which form it is packed and sold for painting purposes. The painter thins it down to the proper consistency for application by the addition of more linseed

oll.

The above refers, of course, to pure, genuine White Lead only. Adulterated and fake "White Lead," of which there are many brands on the market, is generally some sort of composition containing only a percentage of white lead-sometimes no White Lead at all: in such stuff. harytes or ground rock, chalk, and similar cheap substances are used to make bulk and imitate the appearance of pure White Lead. There is, however, a positive test

by which the purity or impurity of White Lead may be proved or exposed, before painting with it. The blow-pipe flame will reduce pure White Lead to metallic lead. If a supposed White Lead be thus tested and it only partially reduces to lead, leaving a residue, it is proof that

something else was there besides White Lead The National Lead Company guarantee all White Lead sold in packages bearing its "Dutch Boy Painter" reade-mark to prove absolutely pure under this blow-pipe test, and that you may make the test yourself in your own home, they will send free upon request a blow-pipe and every-thing else necessary to make the test, together with a valuable booklet on paint. TORPEDO BOAT INVESTIGATION

Lawrence Spear, the Former Naval Officer Who the Alabama Representativo Declared Had Offered to Secure Him a Place on the Naval Affairs Committee For His Influence, Denies Point Blank Hobson's

Washington, Special .- The statement of Representative Richmond P. Hobson, of Alabama, before the spegial committee of the House investigating the charges made by Representative George Lilley, of Connecticut, that he had been approached by a representative of the Electric Boat Company, who offered to use his influence with the Speaker to have Mr. Hobson placed on the naval affairs committee if he "stood right on submarines" was contradicted before that committee by Lawrence Spear, the former naval officer who Mr. Hobson said had spoken to him. Mr. Spear said he had not made any promises to secure the influence of Speaker Cannon or any one else and that he never had tried to influence half cup of cream, one teaspoonful them; in fact, he said, he did not each salt, powdered sugar and made know the Speaker. Mr. Spear mustard, a saltspoonful of pepper and claimed that his company had never two tablespoonfuls of lemon juice or endeavored to suppress competition: had never received any legislative or departmental favors and had never received an order from the Navy Department except as the result of suc-

cessful competition. Newspaper Men Testify. The other two witnesses of the day were A. A. Erly and Frank B. Lord, two of the newspaper men whom Mr. Lilley charged he had been warned against as in the pay of he Electric Boat Company. They both denied that they were ever in the pay of the company although said they had done special work for Mr. McNeir, one of the attorneys for the company in the way of getting out some "feature stories" on submarines, for which they had been paid. Both witnesses testified that they had lost their positions as the result of Mr. Lilley's charges. Mr. Lord characterized the repudiation by Mr. Irilley, of an interview he claimed to have had with him as "unqualifiedly, asolutely and deliberately untrue."

Regarding an interview which he said he had had with Mr. Lilley, in which charges were made against Representatives Sherman, Griggs and others and which Mr. Lilley had re-

printed." may have been instrumental in having him discharged.

Mr. I ord said he could not remember the exact amount he had received from Mr. McNeir for writing the special stories but he thought it was between \$500 and \$00. He said he did not consider that he was working for the Electric Boat Company when he wrote these stories; that he did the work for Mr. McNier.

Mr. Lilley has filed with the committee an unsigned communication received from Philadelphia stating that "William Dulles, of New York City, and Robert McA. Floyd of Cold Springs Harbor, N. Y., both formerly directors of the Electric Boat Company, resigned because of the amount used for corruption or for which would make no accounting."

By Minard's Liniment rheumatism that I could not raise it to my head to comb my hair, so I had to bend over most double to comb it on the top of my head; they pained me at night so that I could not sleep very good, I used a number of remedies for rheumatism, but none did me any good until I tried Minard's Liniment; then I got help and now I won't be without it in the house. It will do all you claim for it, and I find it good for headaches and sore throat, too. I can't thank you enough for what it has done for me and my brother, who has used it on his back and limbs and got great help from it.

He's seventy-one years old. I gave one of my neighbors some, and she says the same as I do. Yours truly,

why not use them this season? There's no reason why you cannot accomplish the same as thousands of others. Mr. V. C. Love, of Tinkling, Va., says "As a producer of fine tobacco, I do not feel I can say enough for your fertilizer. It makes tobacco that brings me more money than any other fertilizer I can get. I have tried many other brands but none equaled yours. I believe Virginia-Carolina Fertilizers to be the best on the market for tobacco."

Virginia-Carolina Fertilizers contain better and higher grade materials than any other brands of tobacco fertilizer. They will increase the yield per acre, and improve the texture and quality of the tobacco you grow, so you can get a better price per pound than ever before.

Much valuable information on tobacco-culture will be found in the new Virginia-Carolina Year Bookor Almanac. Don't fail to ask your fertilizer dealer for a copy, or write our nearest sales office and one will be sent you fr Virginia-Carolina Chemical Co.
