The Farm

Fast Walking Horses the Best.

Good trotters are generally fast walkers, and fast walking is an important trait on the farm. There is no use of being two hours doing a piece of work when it can just as well be done in one hour. It is bad economy to have a poor scrub of a horse on a farm that soon tires out, when you can have a game, fast walking horse, that don't know what it is to tire, and that can get over more ground in a day than a scrub can get over in two days.—Weekly Witness.

Mutton Sheep.

Mutton sheep make a greater gain of flesh than steers, according to experiments made. At the Wisconsin station food required to produce 100 pounds of wether lamb was 364 pounds of corn, 296 pounds of corn silage, 158 pounds of corn fodder and twenty-two pounds of potatoes. To produce 100 pounds of steer required 394 pounds of corn, 181 pounds of bran and 654 pounds of silage. The results showed that silage was also an excellent food for the sheep as well as for the steer.—Epitomist.

Nutritious Food.

Brood sows should always have sufficient nutritious food to keep them in good condition. At farrowing time the sow should not be too fat. If she has had plenty of exercise and is in fair condition she will be better prepared to care for her offspring. She should not be fed corn every day of the year. This grain should be given most sparingly just before farrowing, and in its place a ration of two quarts of oats, one quart of soaked corn with one quart of wheat. This will prove an excellent ration.—Epitomist.

Fence Repairing Time.

It is customary to do all repairing of fences in the spring, but why not repair them in winter, when one can spare the time? The winds of winter may displace a board or rail here and there, but a few hours' labor will repair a mile of fence in the spring when it is put in good order in the fall as well as in the spring. In brief, hundreds of dollars may be saved on farms by doing work in the winter that is usually left till spring, and then but half done for want of time.—Weekly Witness.

Keeping Seed Potatoes.

The ideal method of keeping seed potatoes is claimed to be cold storage. Potatoes thus kept at Ohio station have come out sound and fresh, with no indications of sprouting, and their vitality unimpaired, even so late as the first of June. It is important, however, that the temperature of the cold storage room should not fall below thirty-five degrees, nor should it rise much above forty. When cold storage is not available, sprouting may in some measure be prevented by shelving the potatoes frequently.—Farmers' Home Journal.

Care of Stock.

So far as their proper bedding, feeding and ventilation are concerned, it is too important a matter for the thrifty farmer to neglect attending to himself. However trustworthy his assistants, judging by our own experience, it will pay him well at the close of the season to see each evening that his cattle, horses, sheep and hogs are well bedded, fed and watered. Scarcely less important is the proper ventilation of the buildings in which his stock are wintered. While the entrance of draughts and cold is to be carefully prevented it should be borne in mind that domesticated animals, like man himself, need fresh, wholesome air, and if compelled by ignorance or carelessness to breathe a foul, tainted atmosphere, it is at a serious risk of health and consequent profit. A visit to the barn, stable and pigpen early in the morning will at once warn the observant farmer of a defective ventilation.—Weekly Witness.

Care of Fruit and Trees.

Fruit ripens last when it is placed in cool, dark cellars. When fruit is thoroughly ripe on the trees it should not be exposed to sunlight. Get the apples into the boxes or barrels as soon as possible after they are picked. A Pennsylvania man who has a large orchard keeps about twenty-five cats during the summer months. He fills a trough in the center of the orchard with new milk each morning and pays no further attention to the cats. He says there are no mice, squirrels, rabbits or rats on the farm. If you allow the grass and weeds to grow up around the young trees this summer the rabbits and mice will girdle them next winter, if you don't watch out. A Missouri man complains that he cannot kill sweet clover in his orchard. It is not so hard. Plow the ground and give your orchard clean cultivation two or three seasons, or if you mow the clover frequently during the summer and let it lie on the ground it will die out. Whenever a large limb of any kind is removed from the tree never fail to cover the wound with paint or wax. Pack your finest apples in boxes holding about three-fourths of a bushel. For \$1 you can have a neat stencil made, containing the name of your farm, your own name and address. These on the corner of your boxes give people to understand that you know your business.—Drovers' Journal.

Care of Orchards.

The farmer must take up spraying and other measures for the care of his orchards to a much greater degree than in the past. Apples will grow much higher in price until this lesson is learned. The abandoned apple tree, beside the cellar walls of the house that burned down a generation ago, has been yielding a crop for any one who came along to gather it, but its day is about over. The San Jose scale will probably send out of exist-

WANTS HER LETTER PUBLISHED

For Benefit of Women who Suffer from Female Ills

Minneapolis, Minn.—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women I felt sure it would help me, and I must say it did help me wonderfully. My pains all left me, I grew stronger, and within three months I was a perfectly well woman. I want this letter made public to show the benefit women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. JOHN G. MOLDAN, 2115 Second St., North, Minneapolis, Minn.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs. Women who suffer from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health. If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

He Liked Pig Latin.

Nealie when a little tot was visiting a farmyard. His mother helped him up to look at a pen of small pigs. As he looked in, a little pig near him jumped up, putting his fore feet against the side of the pen, and gave a quick grunt. Nealie turned quickly and said: "Oh, mama, tell him to say that again!"—The February Delineator.

Took Him on Probation. Elizabeth's father had died when she was a tiny baby, and for four years she had ruled her mother and every one with whom she came in contact. Much to her surprise she was one day introduced to a "new papa." She looked him over carefully, then, after much coaxing, she climbed upon his knee and listened as he told her of the many nice things he would do for her mother, and her, finally asking whether she would love him just a little. She looked him squarely in the eye and said: "Yes, if you do all you promise, I may like you, but I tell you now, if you try to be boss around here, we just won't have you for our husband!"—The February Delineator.

Deafness Cannot Be Cured. Typical applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Neither deafness nor deaf-mutism can be cured by any of the so-called "cures" advertised, or sold by druggists, or by any other means. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CLEMENT & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

GROWTH OF SUNDAY SCHOOLS.

Nearly 23,000,000 Children Are Now Studying the Bible.

Whether in city or country, housed in its own magnificent building or piping in a dilapidated mountain shack, with thousands of children or with barely a baker's dozen, the Sunday school is to-day considered the strategic center of the great church militant. The Sunday schools of the United States alone are attended by about 11,500,000 pupils and 1,500,000 teachers. Given a voice in affairs of church or state, this would represent no mean influence. The latest statistics of the Sunday schools of the world show 22,739,323 little Christians working their way through the grades of Bible study, learning the needs of the mission field and being graduated into church membership.—The February Delineator.

Important Information.

With the twenty-second of February looming up in the middle distance, the young teacher thought she saw a good chance to inculcate patriotism in her young charges. "Now, what little boy can tell me anything about George Washington?" she asked sweetly. Then selecting the boy attached to the hand which seemed to be waving the most frantically, she said, "You may tell, Willie." "Please, mum, we git a holiday on his birthday."—February Lippincott's. So. 5-'09.

JOY WORK And the Other Kind.

Did you ever stand on a prominent corner at an early morning hour and watch the throngs of people on their way to work? Noting the number who were forcing themselves along because it meant their daily bread, and the others cheerfully and eagerly pursuing their way because of love of their work. It is a fact that one's food has much to do with it. As an example: If an engine has poor oil, or a boiler is fired with poor coal, a bad result is certain, isn't it? Treating your stomach right is the keystone that sustains the arch of health; temple, and you will find "Grape-Nuts" as a daily food is the most nourishing and beneficial you can use. We have thousands of testimonials, real genuine little heart throbs, from people who simply tried Grape-Nuts out of curiosity—as a last resort—with the result that prompted the testimonial. If you have never tried Grape-Nuts it's worth while to give it a fair, impartial trial. Remember there are millions eating Grape-Nuts every day—they know, and we know, if you will use Grape-Nuts every morning your work is more likely to be joy-work, because you can keep well, and with the brain well nourished work is a joy. Read the "Road to Well-Will" in every package—There's a Reason.
