"'Going to keep kens?' the agent asked her, when she bartered for the hen houses, and Emily smiled and said, 'For a while, maybe.'

"Henry was kind of uneasy till she explained her plans to him, for he's no farmer, nor he never took to hens. But he saw the light after she'd talked to him a while. They did their work and moving mornings till the day they moved in-that was their first afternoon. Emily took a rest after dinner," and when she got up and looked out on the lawn, there sure enough, was a whole posse o' hens and some chickens! Henry set their portable henhouses up that night, and next morning a farmer brought them some hens and put 'em in the houses, likewise chickens. Henry superintended the job. An Ail-Potato Feast,

ever drawn up must have been that of the feast in Paris to which Benjamin Franklin, Lavoisler (the founder of modern chemistry), and other distinguished men sat down as guests of Parmentier. Every dish at this banquet was made of potatoes, even the brandy and liquers were the product of the same vegetable. This was Parmentier's final proof to his skeptical fellow-countrymen that potatoes were not poison, as they persisted in believing. Louis XVI himself was one of Parmentier's earliest converts, granted him land on which to grow his plants, and did not disdain to wear the potato flower in his buttonhole. Then Parmentier cleverly posted guards around his potato fields by day and withdrew them by night, so that people were tempted to come then, steal, eat, and be convinced. The all-potato banquet was the climax of the great campaign .-Kansas City Star.
