Ready made glasses, such as you select for yourself over the counter, are always alike on both eyes. Now then if you have eyes of different focus, requiring glasses of different focus to make them balance properly, what are you going to do about it? Will you take chances on getting one eye right and have the other one wrong, producing muscular trouble which you find out too late, or will you have your eyes carefully tested, each eye separately, and glasses fitted accordingly? This method is far safer and costs no more.

the Want Thereof In These Hard and Merciless Times," contains a list of articles obtainable for a penny in the days of Charles II. These include "a dish of coffee to quicken your stomach and refresh your spirits," "a fair cucumber" and "portions of such commodities as nuts, vinegar, grapes, cake, onions and oatmeal." The catalogue of pennyworths obtainable at an apothecary's is a lengthy one and includes "lettuce to make you sleep, mithridate to make you sweat and aniseed, which may save your life in a fainting or swound."

This in the way of recreation "for a penny you may see any monster, jackanapes or those roaring boyes, the lyons; you may hear a most eloquent oration upon our English kings and queens if you listen to him who keeps conuments at Westminster; you may have all the news in England and other countries of murders, floods, witches, fires, tempests and what not in the weekly newsbooks."- .ondon

The Mahegany Tree.
There is no such thing as a forest of mahogany. The mahogany tree lives by and for itself alone. It stands solitary of its species surrounded by the smaller trees and dense undergrowth of the tropical forest, rearing its head above its reighbors. Two trees to the acre is a liberal estimate for mahogany "finds." More frequently perhaps only one tree will be found over a larger stretch of territory. True mahogany is the only species of the Swistenia mahogani, the name Swietenia having been given to it in honor of the celebrated Baron von Swieten, physician to Maria Theresa. It is distinctly a native of tropical America and frequently towers to a height of 100 feet, the trunk being often twelve feet in diameter. It is of exceedingly slow growth, and the time of its arriving at maturity is probably not less than 200 years. Occasionally small specimens have been found in southern Florida.

British Julius Cassars. Julius Caesar, who on one of the closing days of August in 55 B. C. landed on the Kentish coast, has had many British namesakes, including a great cricketer, but the best known is Julius Caesar, master of the rolls under James I., about whom Lord Clarendon in the first volume of his history tells the amusing story, "Remember Caesar." The unpopular Earl of Portland sat up all night in a barricaded house with his friends and retainers armed to the teeth because he found in his pocket a slip of paper bidding him - "Remember Caesar," which really had reference not to the essination of the Roman statesman. but to some preferment promised to a son of Sir Julius Caesar. The tomb of Sir Julius Caesar, with a quaint epitaph in legal phraseology, is among the many curious monuments of St. Helen's, Bishopsgate.—London Family, Heraid.
