County of Edgefield.

Jean is a very matter-of-fact tot of three summers. Her mother one day, while holding in her arms the wee baby sister, who was very delicate, remarked: "Dear me, she looks so frail, her breath would blow her away." Jean, taking a long breath, puffed it suddenly into the face of the little sister, and, stepping back, waited a moment in silence. Then in a disappointed tone she said: "Well, why don't you go?"

Webster's NEW INTERNATIONAL Dictionary, (G. & C. Merriam Co., Springfield, Mass.) surpasses the old International as much as that book exceeded its predecessor. On the old foundation a new superstructure has been built. The reconstruction has been carried on through many years by a large force of trained workers, under the supervision of Dr. W. T. Harris, former United States Commissioner of Education, and reinforced by many eminent specialists. The definitions have been rearranged and amplified. The number of terms defined has been more than doubled. The etymology, synonyms, pronunciation, have received unparagoned scholarly labor. The language of English literature for over seven centuries, the terminology of the arts and sciences, and the very-day speech of street, shop, and household, are presented with fullness and clearness. The size of vocabulary, in richness of general information, and in convenience of consultation, the book sets a new mark in lexicography.
