Judge William Henry Abney of Kentucky.

The announcement of the death of Judge William Henry Abney in Kentucky on December 7, 1915. has brought to The Advertiser regret at his passing away, but it has also brought back to this journal pleasing recollections of the past. For a year or two prior to the war and during the war he was one of its most valued contributors. While Arthur Simkins was its editor, he enjoyed publishing poetry and prose from young Abney, who like himself, was an accomplished scholar and writer; and when James T. Bacon became the editor in 1863 he too was delighted at anything com-

The idea seemed to have been, that after a course of preparation at Lexington, the boy would be entered in the South Carolina college at Columbia, of which the Chief Justice was a graduate. But, after a year or two's successful study at Lexington, he went back to Kentucky to see his mother. For some reason, the plan as to his education was changed and he was entered in Centre college at Danon Saluda river in Edgefield dis- ville, Ky., where he studied for some years; and next he was entered in the college at Greencastle, Ind., now known as De Pauw university. After his college course was finished, he attended law lectures for awhile, and then returned to South Carolina to study in the office of his kinsman Joseph Abney, at Edgefield, and to be admitted to the bar of this state. That was in 1857 or 1858. After diligent study, William Abney and his wife he was admitted to the bar of the Bathsheba Pope; and William Ab-1859 and to the bar of the equity courts a little later. Practical Economy

Baking powders made from alum or phosphate may be bought for a trifle less than Royal Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder.

Royal Baking Powder produces the finest food, and its use therefore, results in an actual saving.
