### The Food Pledge Card.

The thought uppermost in our minds now is food conservation and the Hoover food pledge card. Conservation in the home may be the decisive factor in this war.

As 90 per cent. of the ultimate food consumption of the country is in the hands of the women, it is fitting that we make the first move in this food campaign.

Many people have the idea we are to be asked to starve ourselves, but the motto of the food administration is, "eat plenty, wisely, and without waste."

We know that many women do not know food values. On the restricted diets many will find necessary, there will be a great many of under nourished people, especially children.

By signing the food pledge card the women will keep in touch with the food administrator, who will from time to time issue suggestions as to substitutes to use, etc. His wonderful experience in food distribution in Belgium has taught him much.

We may not always feel that it is necessary for us to follow him, but we must remember that we are under military orders now and must follow our commander-in-chief the President. He has asked to help in this way and it is our duty to follow as does the soldier the order of his commanding officer even though it does not correspond with his personal opinions.

The first card of directions has been issued. Following are extracts from it:

"Save the Wheat."—One wheatless meal a day. Use corn, oatmeal, rye or barley bread, and non-wheat breakfast foods. Order bread 24 hours in advance so your baker will not bake beyond his needs. Cut the loaf on the table and only as required. Use stale bread for cooking, toast etc. Eat less cake and pastry.

Our wheat harvest is far below normal. If each person weekly saves one pound of wheat flour, that means 150,000,000 more bushels for the allies to mix in their bread. This will help them to save Democracy.

"Save the Meat."—Beef, mutton, or pork not more than once daily. Use freely vegetables and fish. At the meat meal, serve smaller portions, and stews instead of steaks. Make made dishes of all left overs. Do this and there will be meat enough for every one at a reasonable price.

We are to-day killing the dairy cows and female calves as the result of high prices. Therefore eat less, and eat no young meat. If we save an ounce of meat each day per person, we will have additional supply equal to 2,200,000 cattle.

Many of us do not know the value of vegetables in the diet. They contain material for building the bones, for making firm muscles, and putting red corpuscles in the blood, and material that helps the digestion of food. We know that the woody fiber of vegetables acts as a cleanser of the body. And so if we give up meat and substitute more vegetables, we will find ourselves healthier for it.

"Save the Milk."—The children must have milk. Use every drop. Use buttermilk and sour milk for cooking and making cottage cheese. Use less cream."

"Save the Fats."—We are the world's great fat wasters. Fat is food. Butter is essential for the growth and health of children. Use butter on the table as usual, but not for cooking. Other fats are as good. Reduce use of fried foods. Soap contains fats. Do not waste it. Make your own washing soap at home out of the saved fats.

Use one-third ounce less per day of animal fat and 375,000 tons will be saved yearly.

"Save the Sugar."—Sugar is scarce. We use to-day three times as much per person as our allies. So there may be enough for all at reasonable price. Use less candy and sweet drinks. Do not stint sugar in putting up fruit and jams. They will save butter.

If every one in America saves one ounce of sugar daily, it means 1,100,000 tons for the year.

"Save the Fuel."—Coal comes from a distance and our railways are over-burdened hauling war material. Help relieve them by burning fewer fires. Use wood when you can get it.

It would be possible for many people to close rooms in their houses this fall and winter to save fuel.

"Use the Perishable Foods."—Fruits and vegetables we have in abundance. As a nation we eat too little green stuffs. Double their use and improve your health. Store potatoes and other roots properly and they will keep. Begin now to

can or dry all surplus garden products.

This is one of the most important suggestions made, as we should use this summer, the foods which cannot be stored.

"Use Local Supplies—Patronize your local producer. Distance means money. Buy perishable food from the neighborhood nearest you and thus save transportation."
