

Cotton Acreage Must be Expanded, Says U. S. Attache.

Washington, April 22.—The world's cotton acreage must undergo a very marked expansion in the years to come if the supply of raw cotton is to keep pace with the world's needs, Alfred P. Dennis, American commercial attache at London, reported to the department of commerce after an exhaustive study of the world's capacity for consuming cotton goods.

At the present time, he said, there is a record carry-over of raw cotton. Combined with this there is an immense amount of underproduction in the chief cotton spinning centers of the world. There has been a marked setback to the purchasing power of the world in the amount of cotton goods and a corresponding setback to the production of cotton.

"It is obvious," says Mr. Dennis, "that the world has emerged from the war with a production capacity of raw cotton considerably below its requirements. Coincidentally there has been a marked decline in the output of manufactured cotton stuffs, that, in turn, being a reflection of reduced buying power in the great consuming centers of the world.

"With a return of the world to a normal state of economy, buying will be resumed, idle and short time looms and spindles will be speeded up, and an insistent demand for raw material may be anticipated. Farsighted representatives of the British cotton trade are already agitating the question of increasing the production of raw cotton within the empire.

"It seems established that the need of the world for cotton goods within the near future will grow more rapidly than will the extension of cotton-growing areas. Increase in the supply of cotton depends very largely on the finding of fresh cotton territory and improving the strains of existing known cottons.

"The crop in America, which has been averaging for the five years, 1895-99, 10,000,000 bales, jumped, ten years later or for the five years, 1910-14 to an average of 13,500,000 bales. Production in other countries also increased. The inference must be accepted, therefore, that through the increase in the world's population and through the extension of consumption to new markets, as well as through the inclusion of cotton into new utilities, such as automobile tires, the world required an increase in its supply of cotton. It is stated on high authority that the world in 1914 was in a position to absorb in manufactured goods at least 700,000 bales of cotton more each year than consumed the year before.

"One of the prime factors in the present day equation is the impoverishment of the world. Trade with both Russia and Germany has amounted to little, and while the capacity in general of central and eastern Europe to buy cotton goods has not been destroyed it has been greatly impaired."

Awaits New Attitude.

Boston, April 22.—Normalcy in business awaits a new attitude of man toward his job, James S. Alexander, president of the National Bank of Commerce, of New York, said in an address tonight at the annual banquet of the National Association of Cotton Manufacturers. Correction of the business and social confusion of the time must be sought, he said, not only in banking and business adjustments, but more particularly in the human element.

"Already substantial progress has been made toward a return to sounder conditions," according to the speaker, "but the time has not come for a relaxation of caution. The weight of chance is against speculative undertakings."

"Conditions in the rural districts of the South were described as worse than in the days of slavery by David R. Coker, a South Carolinian cotton grower, in addressing a convention session today.

"The average farm laborer in the South receives just enough to keep body and soul together," he said. "The return to the small growers and laborers is not enough to keep them in a decent state of civilization. The present price paid for cotton in the South is only a little more than one-half the cost of production."

Chamberlain's Tablets are Just What

When billious,
When constipated.
When you have no appetite
When your digestion is impaired.
When your liver is torpid.
When you feel dull and stupid after eating.

When you have headache.
They will improve your appetite, cleanse and invigorate your stomach, regulate your bowels and make you feel "fine as a fiddle." They are easy to take and agreeable in effect.

List of Persons Receiving Pensions in Edgefield County.

George Adams, Collier.

Why Honey Doesn't Carry Disease.

Honey is a raw product. Bees searching for food and water often visit places where they might become carriers of disease germs. Do they do it? Does honey ever spread disease? Hitherto, there has been theory on the subject, but little exact data. An investigator at the Colorado Agricultural Station, Dr. Walter G. Sackett, has made experiments revealing some illuminating facts about the healthfulness of honey.

He took bacteria causing the common intestinal troubles, and introduced them into solutions of honey and water. In pure water these bacteria lived forty days or more. In a solution of honey and water the length of life decreased as the proportion of honey was made greater. In extracted honey, undiluted, the bacteria lived only two to four days.

The conclusion from the investigation was that the chance of contracting an intestinal disease from honey was very markedly less than from water, milk or other substances containing water. Indeed, honey appears to protect itself against bacteria, in the common process of production and sale. Any bacteria left in it by the bees will ordinarily be dead before the honey is taken from the hive. If bacteria are introduced during the process of extraction—which is done with clean apparatus and under clean conditions, usually—they will be dead and harmless long before the honey is consumed, ordinarily. Extracted honey reaches the consumer usually in a glass jar which is a safeguard against contamination while waiting to be sold.

This is only one of the admirable characteristics of honey that apiarists believe adequate research will determine. It has many suspected virtues, and others which are claimed, but not yet supported, which apiarists believe investigation would reveal or confirm.—Farm and Ranch.

They Speak Well of It.

"I frequently hear Chamberlain's Cough Remedy praised by friends and acquaintances which only tends to strengthen my good opinion of it" writes Mrs. Fred Arter, Zanesville, Ohio. Try it when you have a cough or cold and see for yourself what an excellent medicine it is.

Statement of the Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 24, 1912.

Of Edgefield Advertiser published weekly at Edgefield, S. C., for April 1, 1921.

State of South Carolina, } ss.
County of Edgefield. }

Before me, a notary public in and for the State and county aforesaid, personally appeared J. L. Mims, who, having been duly sworn according to law, deposes and says that he is the editor and publisher of the Edgefield Advertiser and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August, 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher J. L. Mims, Edgefield, S. C.

Editor J. L. Mims, Edgefield, S. C.
Managing Editor J. L. Mims, Edgefield, S. C.

Business Manager J. L. Mims, Edgefield, S. C.

2. That the owner is J. L. Mims, Edgefield, S. C.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

J. L. MIMS,
Editor and Publisher.

Sworn to and subscribed before me this 22nd day of April, 1921.

E. J. MIMS.
(My commission expires at pleasure of governor.)

Your New Year Office Supplies

Look about your office and see what you need in office stationery. We are better equipped than ever to supply your printing needs. We have received new type faces and carry a well selected assortment of paper of all kinds.

WE CAN PRINT ON SHORT NOTICE

TYPEWRITER HEADS
LETTER HEADS
NOTE HEADS
BILL HEADS
STATEMENTS
ENVELOPES
CARDS
CIRCULARS
CIRCULAR LETTERS
MINUTES
CATALOGUES
BRIEFS

We guarantee satisfaction on every job of printing we do. Your money back if you are not satisfied.

Mail us your orders or call in person and see the stock we carry and the kind of work we do.
