License Money Helps Counties.

Counties in the state have so far received a little over a half million dollars from the 80 per cent, motor vehicle license fund, this sum being returned to the various county treasuries as provided by law, according to figures compiled through August by L. H. Thomas, secretary of the state highway commission. Mr. Thomas announced yesterday that the total collection to date for 1921 had reached \$727,507.06 and of the amount \$576,631.29 was accruable to the counties.

Greenville county leads the entire state with \$48,683.91 returned from the sale of licenses, while Richland is second with \$45,231.06 and Spartanburg is third with \$38,312.11. Charleston comes fourth with \$37,437.99 and Anderson is fifth with \$35,611.28.

In the total registration of motor vehicles over the state Mr. Thomas finds that the counties where the registration has fallen off this year as compared with 1920 are where "king cotton" is grown more than any other crop. The price of cotton all year has kept many machines under the shelter and the figures on the sales of licenses show that the cotton and agricultural counties have fallen behind all year.

Greenville again is in the lead with the total number of machines registered with 6,634 automobiles and 662 trucks as compared with a registration of 6,726 automobiles and trucks for 1920. Richland also has gone above last year's figures with 5,558 autos and 798 trucks. Spartanburg with 5,316 autos and 524 trucs is slightly ahead of the 1920

registration when the total was 5,616. Anderson with 5,278 automobiles and 411 trucks is slightly below the 1920 registration when the total was 6,086. The largest relative gain this year over the 1920 registration has been in Spartanburg county.

The total number of automobiles registered so far is 81,463 and 6,903 trucks have been licensed. Last year 93,843 automobiles and trucks were registered, leaving approximately 5,000 machines still short this year.

In Orangeburg county, Sumter, Edgefield and a number of other counties the 1921 registration is far below that of 1920. The smallest number of motor vehicles is in Jasper with 192 automobiles and 10 trucks. Last year the number of trucks and autos was 228.—The State.

"Purina" Made the Difference!

EQUAL in laying ability. But the hen on the right was fed Purina Chicken Chowder and Purina Hen Chow. Grains have lots of material for yolks, but far too little for whites. As they can't lay yolks only, grain-fed hens lay fewer eggs.

Purina Poultry Chows

form a complete ration, containing material for an equal number of whites and yolks. They get the most out of your hens, and cut the feeding cost per dozen eggs.

More-Eggs Guarantee

You get your money back if Purina Chicken Chowder and Purina Hen Chow, fed as directed, don't produce more eggs than any other ration. Why should you put off a trial when we take the risk?
