The number of bales in Texas taken from the original runs up into the thousands. I remember during the session of the last Legislature, when the bill known as the Compress Bill was being discussed in the committee room, a gentleman from Galveston, who was opposing the measure, in answer to a question asked by me (one of the Committee) how many bales of cotton were made by the compresses in Galveston that were taken from the original bales compressed there. He answered 'About six thousand bales.' And yet there are those who decry the American Cotton Company's Round-bale, from which there is not one ounce of waste and which reaches the mill exactly as it leaves the press.

D. T. Barr gave some of their experience in their efforts to comply with the requirements of law and declared that it was hard, difficult and well nigh impossible to do justice when the Township Boards were careless, indifferent and inactive in this matter of discharging their duty and their failure to render the County Board any assistance at all. Comrade Jasper S. D. Rick, who was one of the representatives of the Camp at the State reunion at Chester, made his report and said that that meeting had appointed a committee of twelve to draft a simpler and more effective pension law and memorialize the Legislature at its next session, praying for its passage.
