ECZEMA'S

ITCH IS TORYURE. Eczema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

ELECTROCUTED.

Czolgosz, the Murderer of the Presi-

dent, Pays the Penalty. The murderer of President Mc-Kinley has paid the extreme penalty demanded by the law for his awful crime. At 7:12 o'clock on the morning of October 29th, in Albany, N Y., the soul of the murderer passed from time to eternity. He was shocked to death by 1,700 volts of electricity. He went to the chair in exactly the same manner in which have a majority of the murderers in the State, showing no particular sign of fear, but in fact doing what few of them have done-talking to

the witnesses while he was being strapped to the chair. Just before the straps were adjusted, he said: "I killed the President because he was an enemy to the good people-of the working people." His voice trembled slightly at first, but gained strength with each word, and as he spoke it was perfect

English. "I am not sorry for my crime," he said loudly, just as the guard pushed his head back on the rubber headrest, and drew the straps across his forehead and chin. As the pressure on the straps tightened and bound the jaw slightly, he mumbled:

"I am awfully sorry I could not see my father.' The rush of the current threw the body so hard against the straps that they creaked perceptibly. hands clinched suddenly and the whole attitude was one of extreme tenseness. For 45 seconds the full current was kept on and then slowly the electrician threw the switch back, reducing the current volt by volt until it was cut off entirely. Then just as it had reached that point he threw the lever back again for two or three seconds. The body, which had collapsed as the current was reduced, stiffened up again against the straps. When it was turned off again. Dr. McDonald stepped up to the chair and put his hand over the heart. He said he felt no pulsation but suggested that the current be turned on for a few seconds again. Once more the body became rigid.
