An Explanation.

To the Editor of the Dispatch:

I do not think that the article in your issue of April 9th, headed "A New Steel Bridge," puts the present Board of County Commissioners in the proper light. The article says:

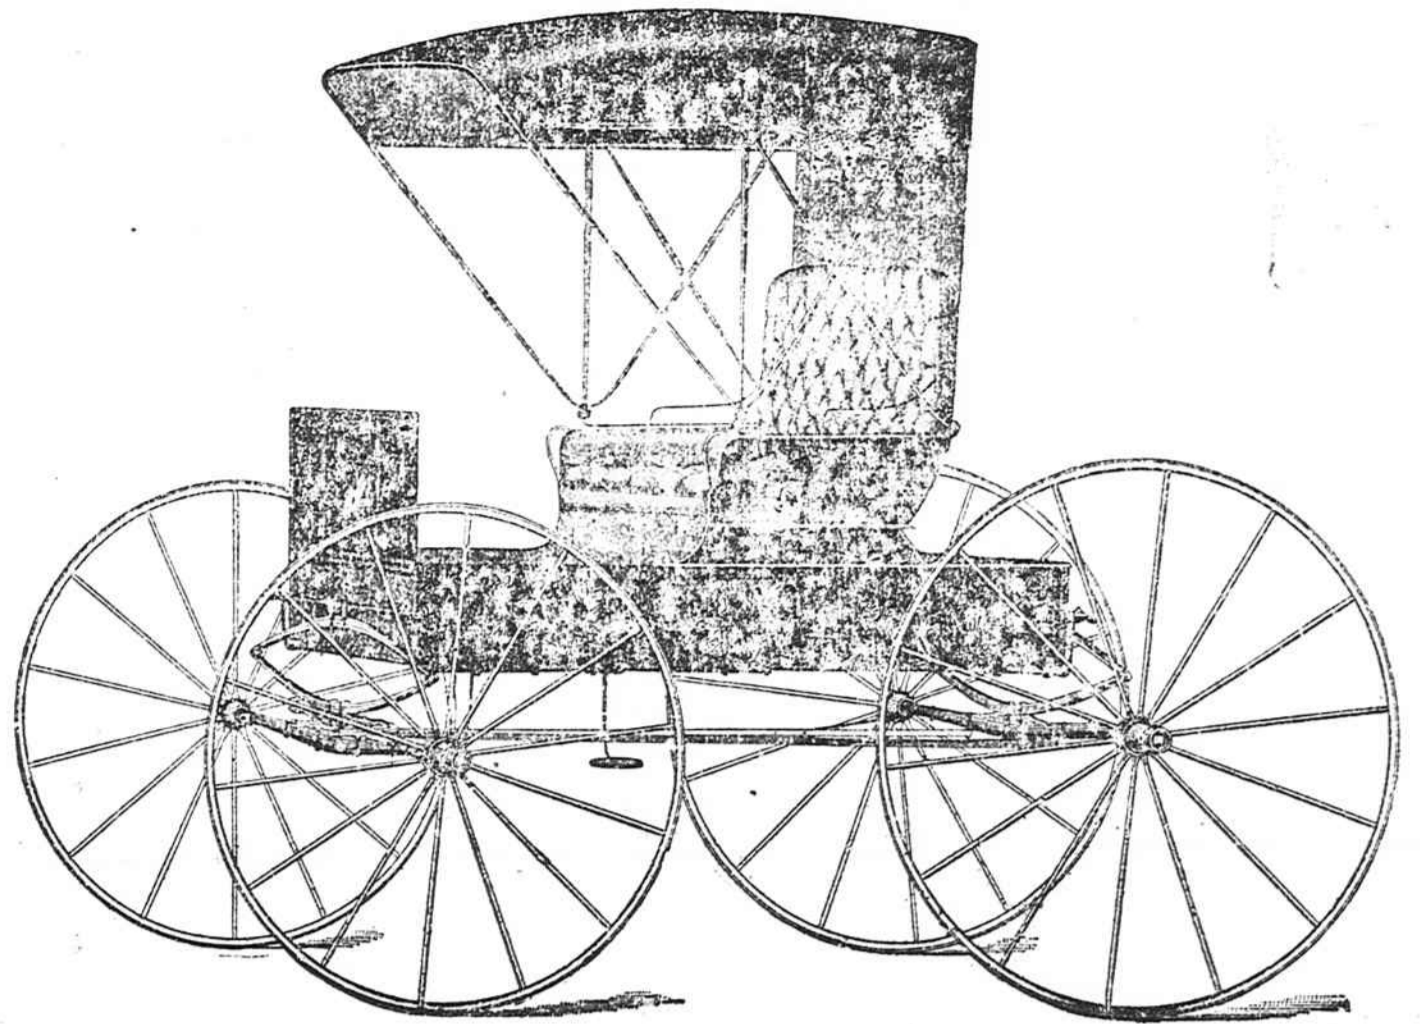

"We understand that an agreement has been reached by the Board of County Commissioners and the factory officials whereby the county is to put up the bridge and build the stone abutments and the factory company is to do the filling in at each end of the bridge and build a good road way."

There is nothing wrong with the above specifications, but the present Board of County Commissioners is not responsible for the said agreement. It is only complying with a written agreement or contract entered into by the factory officials and a former Board of County Commissioners, which said agreement is on file in the Commissioners office.

Isaiah Hallman,
County Commissioner.

We have discontinued the Dispatch to a number of subscribers who are in arrear for subscription. While we would be glad to continue same to their address, we cannot afford to do so, and consequently they must pay up cash in advance if they desire the Dispatch continued.
