Home and Farm.
This country is one of the great mineral counties of North Arkansas, situated almost in the center of the zinc belt. Searcy county, generally speaking, is hilly and broken, but there are some sections very nice and level. Plenty of good rock for use on the farm, suited for building chimneys, fences or houses. It is well timbered with the different oaks, pine, hickory, gum, ash, walnut and cherry, which are very valuable. There is a fortune in saw milling.

The county has an area of about 700 square miles, only a small part of which is in cultivation. More than 155,000 acres belong to the United States and is subject to homestead. There are less than 50,000 acres in cultivation—10,000 acres in cotton, 18,000 acres in corn, 10,000 acres in wheat, 7,000 acres in oats, 3,000 acres in fruits, etc—all of which produce abundantly. This county is well watered by the Buffalo fork of White river, north fork of Red river, Cove creek, Bear creek, Calf creek and Richland creek.

The lands are very productive, and are gravelly and sandy, dark in color, and have a clay subsoil.

Cotton on uplands yields 800 pound; cotton on bottom lands yields 1,500 pounds; corn yields from 20 to 45 bushel; wheat from 15 to 18 bushel; sweet potatoes, 100 to 125 bushel; Irish potatoes, from 75 to 100 bushel; turnips, from 150 to 200 bushel; peas, from 40 to 60 bushels per acre, without any fertilizer. Tobacco does well, yielding from 800 to 1,000 pounds per acre. Everything in the vegetable line grows to perfection in this county.

Searcy county is the home of the "big red apple" that took the premium at the World's Fair. It also takes the lead in minerals, the principal ones being zinc, copper and lead. The finest copper mine in this county is a Tomahawk, in this county, known as the Tomahawk Copper Mines. There are also many rich zinc mines located in different parts of the county. Zinc is now being mined in large quantities. Water for domestic purposes is obtained from springs and wells. Many springs of the finest water to be found in the State are to be found in Searcy county.

Some of the most famous springs known for medicinal properties so far discovered are: Picayune, Superlative and White Sulphur. There is much fine scenery in this county—not to be surpassed in the State. Plenty of range here for all kinds of stock nearly all the year. Plenty of fat cattle, sheep, goats and hogs all over the county. Farmers are in a prosperous condition generally. Seasons have been very good. Crops are looking fine. Wheat and oats have been harvested which were very good. A failure is unknown. Searcy county is well supplied with public schools and churches. The schools are kept open from three to five months in the year. There is also one high school, the Marshall Academy, located at Marshall the county seat. Marshall, the largest town in the county, has a population of about 600; has several churches, mills and mercantile and mining interests. St. Joe, Leslie, Bianco, Snowball, Witt's Springs and Tomahawk are other principal points in the county. For health this county cannot be sur-

passed by any in the State. Population is about 13,500.

Searcy was settled by emigrations from Missouri, Tennessee, South Carolina and Georgia, all white people (not a negro in the county).

No whisky is sold in the county. Society is the very best, crime is very rare, theft is unknown. There are several railroads chartered to be built in this county inside of a year. For those that like to hunt I will state there are plenty of squirrels, rabbits, quails, foxes, a few turkeys and deer and a few bear and wolves. I will say to all who would like to come to a new country where he can get good land cheap, good water, fine climate, no chills and fever, good timber, come to Searcy, where he can raise all the stock he needs and every kind of vegetable grows without any commercial fertilizer. Cabbage can be saved here all winter by being banked.

A large part of this county is above the frost line, therefore, a fruit failure is unknown. Raspberries, blackberries, whortleberries all grow wild in the woods. Clover grows well here too. I will state that I am not a real estate agent, have no ax to grind or land to sell. Wishing the editor and all his subscribers good luck,

James P. Dooley.
