## The Strongest Fence

Science proves that the strongest fence, because constructed throughout on scientific lines, is the

**ELLWOOD FENCE**

**SIMPLE—SCIENTIFIC—STRONG**

### The Reasons!

1st—Each horizontal extension of the ELLWOOD is a steel cable, consisting of two heavy wires intertwined.

2d—Each of these cables is tied to each other cable by a continuous heavy wire lapped tightly about every cable—not tied in a crooked "knot" or twist to weaken the strength of the tie wire at the bending point. (Wrap a wire around your finger and the wire is not weakened; tie a wire up in a hard knot and you cannot untie it without breaking, it is so much weakened.)

**THAT IS ALL THERE IS TO ELLWOOD FENCE—**

Heavy steel cables lapped about and held together by steel wire, forming uniform meshes. Simple, isn't it? No chance for weakness in any part; uniformly strong. The reasons for the superiority of ELLWOOD FENCE are not hard to find. This company owns and operates its own iron mines and furnaces; its own wire mills and six large fence factories—either one of the six being larger than any other fence factory in the world. These facts should be convincing.
