Points Regarding The Census.

The census begins on Friday, April 15 and must be completed in two week in cities and in thirty days in all other areas.

The enumerators will wear a badge inscribed "United States Census, 1910."

The law requires every adult person to furnish the prescribed information, but also provides that it shall be treated confidentially, so that no injury can come to any person from answering the questions.

The President has issued a proclamation, calling on all citizens to cooperate with the Census and assuring them that it has nothing to do with taxation, army or jury service, compulsory school attendance, regulation of immigration, or enforcement of any law, and that no one can be injured by answering the inquiries.

It is of the utmost importance that the census of population and agriculture in this state be complete and correct.

Therefore every person should promptly, accurately, and completely answer the census questions asked by the enumerators.

One Conductor Who Was Cured

Mr. Wilford Adams is his name, and he writes about it—"Some time ago I was confined to my bed with chronic rheumatism. I used two bottles of Foley's Kidney Remedy with good effect, and the third bottle put me on my feet and I resumed work as conductor on the Lexington, Ky., Street Railway. It gave me more relief than any medicine I had ever used, and it will do all you claim in cases of rheumatism." Foley's Kidney Remedy cures rheumatism by eliminating the uric acid from the blood. Sold by all Druggists of Lexington; Henry Drug store, Chapin S. C.

Scarlet Fever.

No inexperienced person should attempt to treat scarlet fever, diphtheria or small pox, as complications may arise during the progress of these diseases which often result very seriously even with the most intelligent care. Great care should be taken to thoroughly fumigate and air a room in which a scarlet fever patient has been nursed, as germs can be carried long distances and will retain vitality for years, in some instances, unless subjected to intense heat. All clothing and bed linen removed from the patient should be placed in a tub of water containing a disinfectant before taking from the sick room, and after undergoing a thorough soaking, should be put into boiling water. As soon as the child leaves the room, every door, window, and crevice should be closed and sulphur in proportion of three pounds to each one thousand feet of air space, should be burned in the room. The room should be kept closed for at least twenty-four hours, and should be well aired before again using. All bedding should have been loosely tossed over chairs, or so opened as to admit the fumes freely, and if there are closets to the room, these should have been opened.

A Young Murderer.

At DeLand, Fla., the jury last week brought in a verdict of murder in the first degree against Irving Hanchett, a young white man, who, on February 12, stabbed to death Cleve Tedder, a 14-year-old girl, Judge Minor Jones pronounced the death sentence. Hanchett met the girl in the road, and when she repulsed his improper advances and threatened to expose him, he stabbed her 63 times. The murderer had been imprisoned in Vermont for crime before he went to Florida.
