Paint and Not

Paint was never before so high as last year and this: about \$2.25 a gallon Devco and a half-dollar less for trash.

What is trash? It looks like paint and pretends to be paint, but isn't worth painting. It costs a painter's day's-work to put-on a gallon of paint, good or bad; and a painter's day's-work is \$3 or \$4.

Add that to the price of a gallon, That is the cost of a gallon. Devco is \$5 or \$6 a gallon; and trash a half-dollar less.

But Devco is all paint and more too; you add oil to it; a gallon is 5 or 6 quarts of perfect paint for the painter's pot. But trash is three-quarters two-thirds or half paint; you pay a half-dollar less for nobody-knows-what-it-is, 10 gallons Devco is enough for the average job; it takes 15 to 20 gallons of trash. And the wear same way. Unfortunately, they look alike when first you see them.
