A HORSE IS NOT A MACHINE!

A horse cannot give continuous service. It tires easily and sometimes must have rest in the middle of the day.

BUT THE "HUPMOBILE" IS DIFFERENT

Always in condition and fresh at the end of the run. It never tires and will take you anywhere, no matter what the distance. Sand and hills make no difference, nor do muddy roads for that matter.

The perfect simplicity of the working parts means fewer repairs, less attention—eliminates the heavy expense bills. A truly economical and efficient car built for the purpose of giving uninterrupted service at into the low cost of upkeep.

THE DEEPER YOU GO INTO DETAIL THE GREATER WILL GROW YOUR REGARD

The inside, not the outward appearance of a car, establishes its true value. For this reason, we ask you not to let your first favorable impression end with your admiration for the graceful design, the low strong lines, the comfortable upholstery of the long-stroke Hupp "32." We prefer that you go deeper car and examine its motor, transmission and axle construction.

WHAT MAKES PULLING POWER

- First—The relation of piston stroke to cylinder bore.
- Second—The design of the motor.
- Third—The efficiency of the carburetor.
- Fourth—The simplicity of the chassis construction.
- Fifth—The degree to which friction is reduced.
- Sixth—The weight of the car.

LET US SHOW YOU

How these essentials have been accomplished in the Hupp "32."

- First—The stroke is neither too long nor too short, but in ratio to the bore is as 1.7 is to 1.
- Second—The cylinders of the motor are cast en bloc: the valves at the side are protected from dust and dirt. Three liberal crank shaft bearings are provided to preclude the possibility of undue strain.

Third—The carburetion is absolutely automatic, insuring correct mixture at all speeds and under all loads without adjustment.

Fourth—The chassis is clean of every complication: the motor, clutch and transmission are a compact weight-saving unit, permanently aligned and dispensing with a shaft and universal joint between clutch and transmission.

Fifth—Friction is reduced to the limit by the finest ball and roller bearings; there is but one universal joint between transmission and full-floating rear axle, giving a practically straight line drive and the least possible lost motion in the transmission of power.

Sixth—The weight of the car is from two to three hundred pounds under that of most cars of equal size and grade.

Each of these points is of unusual advantage; collectively they enable the motor to give its maximum power and set the Hupp "32" apart and above cars of its size and price.

Long Stroke HUPP "32" Touring Car \$900, F. O. B.
Detroit, including windshield, gas lamps and generator, oil lamps, tools and horn. Three speeds forward and reverse, centre control. Bosch magneto, 105 inch wheelbase, 32x3 1/2 inch tires. Roadster, \$900.

HUPP "20" STANDARD RUNABOUT \$750, F. O. B.
Detroit. 4-cylinders, 20 H. P., equipped with Bosch magneto, top Windshield, gas lamps and windshield, oil lamps, tools and horn, 110 inch wheelbase.

We have an attractive agency proposition open in this territory, and will be glad to correspond with live, aggressive parties who may be interested in securing the Agency for this exceptional line of cars.

Lyon is Defeated by T. H. Peoples

Incomplete returns from 40 out of 44 counties in the second Democratic primary for attorney general of South Carolina held yesterday give Thos. H. Peoples, of Barnwell, 21,709 votes to 19,304 for J. Frazer Lyon, the incumbent, giving Peoples an advantage of 2,405 votes.

In Lexington county with all but about 100 votes yet to hear from give Lyon 537 and Peoples 874. It appears that less than 50,000 votes were cast in the entire state, where more than 140,000 were cast in the first August primary.
