

**Forage Crops and Meat.**

(By Prof. R. L. Shields.)  
The cost of all kinds of meat is increasing from year to year. The chief reason for this is that meat production is not keeping pace with the demand, — from an increase in population, — in fact, the beef supply in this country is less than a year ago.

The South consumes a great deal of the amount it consumes, relying on expensive products shipped in from the North and West.

If all our farmers would raise enough hogs, etc., to supply their own meat, it would insure a more prosperous condition throughout the South, since thousands of dollars leave each county of the South annually for these products that can be produced so readily at home.

The greatest economy in meat production is obtained through the use of suitable grazing crops as a supplement to grain feeding.

No one should attempt to raise live stock without first carefully planning for the necessary forage crops. It is possible to have grazing crops throughout the year.

The following crops are recommended for hog grazing. Time for seeding, amount to sow per acre, grazing period, etc., under average conditions, are also given:

**Rape:**—Sow in late Summer or early Spring. Amount, three pounds drilled, six pounds broadcast per acre, time for crop to develop for grazing, eight to ten weeks; length of grazing period, three months.

**Cowpeas:**—Sow from middle of July. One-half bushel drilled, one bushel broadcast, time for development for grazing period, six weeks.

**Soy beans:**—Sow from May first to middle of July; amount same as for cowpeas; should be planted with drill; time for development, two to three months; grazing period, four weeks.

**Rye:**—Sow Sept first to last of November. One and one-half bushels drilled; time for development, two to four months. Will furnish grazing two to three months.

**Corn and Peas:**—Plant May and June. Amount of corn, four quarts, peas one-half bushel drilled; time for development four months; grazing period, all Fall.

**Crimson Clover:**—Sow Sept.—November. Twelve to fifteen pounds broadcast; time to develop, three months; grazing period six to eight weeks.

**Bur Clover:**—Practically the same as for crimson clover.

Clovers and vetches should be inoculated. Inoculate vetch with vetch or English pea soil; inoculate bur clover soil, if sown in the bur inoculation is not necessary; inoculate Crimson Clover soil or Red Clover soil. In each case, use 500 pounds per acre of inoculated soil and harrow in immediately.

**Oats:**—Sow Sept. 1st. to middle of December. Two to two and one-half bushels, drill or broadcast; time for development, six to twelve weeks; grazing period, eight to twelve weeks.

**Vetch:**—Sow with oats or rye; fifteen to twenty pounds.

**Sorghum:**—Sow middle of April to middle of July. Four to eight quarts drilled; time for development, six to eight weeks; grazing period, four to six weeks.

**Peanuts:**—Plant May and June. One bushel drilled; time for development, ninety to one hundred and twenty days; grazing period, all Fall.

**Chufas:**—Plant May and June. Four to eight quarts drilled; time for development, four months; grazing period, all Fall and Winter.

**Fair Better Than Ever.**

The county fair is the next big thing for Lexington which will be held October 21st, 22nd and 23rd. The several committees are busy making preparations for the fair and it is believed that it will be better than usual as the promoters and the people generally are showing a keener interest than ever before.

Secretary M. D. Harman and his colleagues are prompting the fair to up-build the agricultural, swine, cattle and the other interests in the county and they are making plans that evidently will win. They should have the hearty cooperation of every citizen inside of the county's borders interested in farm pursuits. There are many good farmers who raise excellent horses and mules and it is hoped they will bring them here this year and exhibit them. There will be plenty of room this year in which to put the live stock, cattle and hogs and they will not be crowded out with professional race horses. A number of ladies have announced their intention to participate in the horse driving and many new features is expected to be added to this department. Every precaution will be taken to protect the rights of those who make county raised entries.

The Secretary has sold a large number of new stock certificates and nearly all of the old subscribers have renewed. Special attractions will be given each day.

One big attraction of the fair will be that of Smith's Carnival which will draw a large crowd within itself. Make your arrangements to attend the fair, bring your family and your friends.

The officials are devising plans to construct new buildings and make other accessions to improve the fair for next year.

**DO IT NOW**

**Lexington People Should Not Wait Until It Is Too Late.**

The appalling death-rate from kidney disease is due largely to the fact that the little kidney troubles are usually neglected until they become serious. The slight symptoms often give place to chronic disorders and the sufferer may slip gradually into some serious form of kidney complaint.

If you suffer from backache, headache, dizzy spells; if the kidney secretions are irregular of passage and unnatural in appearance, do not delay. Help the kidneys at once. Doan's Kidney Pills are especially for kidney disorders they act where others fail. Over one hundred thousand people have recommended them. Here's a case at home.

Mr. John H. Bailey, Lexington, S. C., says: "I willingly recommend Doan's Kidney Pills, as they have been used in my family for the past two years with good results. Our supply was procured at the Kaufmann Drug Co. I have great faith in Doan's Kidney Pills and do not think they have an equal in curing kidney trouble."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.
