Cincinnati and Charleston Railroad.

A correspondent of the New York Times says this great work, which was projected many years ago is being pushed tendily forward, and will be running, before many months, to the foot of the North Carolina mountain. This road opens up for Knoxville the rich Cotton lands of the Little Tennessee, and the mineral wealth of Smoky Mountain, and will, when completed to the seaboard, pour them into the lap of Charleston. By the construction of a road from Augusta to the Blue Ridge, via the Savannah valley, and a connection, from Augusta with Port Royal the great West will find the shortest route to the sea, and Augusta become a great depot for Western produc's, from which shippers at Savannah, Port Royal, and Charles-

Augusta is the natural intersecting point for the great central line from : Washington to New Orleans with the shortest line from the Ohio to the Atlantic. An examination of the map will prove this to be true. Let those who croak about Augusta as a finished city, and talk about going to some more promising locality, look well to the natural advantages of this sturdy city, before hazarding the uncertainties of a change. list of only 500 paying subscribers is -Augusta Press.

Gone to Work.

The Albany (Ga.) Patriot, of the 17th inst., says: "Many of our planters have gone to work, and are turning up the soil with a vim, that looks like old times. Those who were fortunate enough to procure a full corps of hands are making day, and gratified to hear of its continpreparations for a large crop. However, | ucd and increasing prosperity. The imthere are many planters without more than half help enough to man their plantations, while there are some with scarcely any hands at all. The negroes generally have all gone to work in this locality. There are none to hire, and help must come from some other source if all the land of Southwestern Georgia is placed

We are pleased (says the Savannah News) to state that we have similar intelligence from all the counties in Southern and Southwestern Georgia. We learn, also, that the views expressed by this paper in regard to the diversification of the crops are generally approved by the planters, who concur with us in the opinion that if, in the past year, the plan had been adopted and followed of planting a full provision crop, the South would have been better off than now. They have intelligently considered the question. Who can raise Catton, to the exclusion of breadstuffs, and sell it for thirty or thirty-five cents per pound, when he works freedmen, and pays twenty-five cents per pound for bacon, and one dollar and a half per bushel for cors, when flour is sixteen and nineteen dollars per barrel, and an ordinary much cow is regarded cheap at thirty dollars, and when every necessary article is at equally high rates? Out of the earth must come our relief from the terribly depressed condition of the present, and by the provident system of planting we have suggested.

A New Enterprise .- Strange it is that a land whose soil and climate constitute it a winter and summer, "Market garden' for the world has so little labor or capital invested in an enterprise honorable, pleasant and remunerative. We learn from the Fernandina Courier that "several gentlemen have arrived here recently who are looking out situations for gardening purposes. They design entering upon the business on a large scale and raise vegetables for the Northern markets." That paper further says: "We are much surprised that some of our people have not embarked in the enterprise before now. We know of no business that will pay so well and require so little capital to carry it on. The advantages of soil and climate, and facilities we shall soon have for making shipments, will certainly make this a good business. It is becoming more and more monifest every day that our State is to be developed by strangers. Our people are slumbering over their interests and following in the old beaten track. Which was it?

For the benefit of many persons who are anxious to know whether our es teemed friend Dr. James, the push car, or the hand car, suffered in the collision which occurred in November last, we reprint the paragraph which has created so much doubt. It was clipped from the Laurensville Herald, and handed to the devil to put in type and he played the devil with it as will be seen. In answer to the question however, we believe that Dr. James received the injury, and neither the push car nor the hand car. We sincerely trust that this explanation will prove satisfactory, and hope that Dr. J., who is now convalescent will be able to femur bone of the push car.

James, the lessee of the Laurens Railroad. met with a severe accident on Tuesday night last, while coming up the road on a hand car, having gone down on some business connected with the repairs of the track. The accident happened in this way; the hand car coming up the road, near Kinard's about 10 o'clock at night, at rather rapid speed fearing no danger, though the night was too dark to distinguish anything on the track, ran into a pu-h car standing on the track, throwing the Doctor who was sitting in front violently forward on his side between the rails. The only reason why he did not lose this amount was because the person having charge of said Estate concluded for some reason not to settle it the day advertised. This shows the mportance of taking the District paper. We have heard of numerous instances of the kind, but this one came under our own observation.-Laurensville Herald.

DISTRIBUTIONS .- We would call attention to the opinion of one of the leading papers of Canada on this subject: Most of our readers have no doubt read

some of the numerous advertisements of Gift Enterprises, Gift Concerts, &c, which appear from time to time in the public prints, offering most tempting bargains to those who will patronize them. In most cases these are genuine humbugs. But there are a few respectable firms who do business in this manner, and they do it as a means of increasing their wholesale business, and not to make money. From such firms, it is true, handsome and valuable articles are procured for a very small sum, and what is more important, no one is ever cheated. Every person gets good value for his dollar; because as we have stated, it is intended to act as an advertisement to increase their ordinary business. We have seen numbers of prizes sent out in this way by Sherman, Watson & Company, of Nassau Street, N. Y., and there is no doubt that some of the articles are worth eight or ten times the money paid for them, while we have not seen or heard of a single article which was not worth the dollar which it cost.
