

**PARKER PILLSBURY ON RECONSTRUCTION.**—Mr. Parker Pillsbury writes a review in the New York *Revolution*, of "The South as it is," in which he says:

"I think the North knows less of the actual South to-day, than of almost any other portion of the globe. Republicanism bears rule there, and reports itself to please itself. Counter-authorities, especially from Democratic sources, are cast aside as unworthy of confidence, as no doubt they often are. But it is time one thing was told, and believed, too, every where, and that is, that reconstruction so far is a failure. It is a bad failure. From the sole of its foot to its head, if it have any head, there is no soundness in it, none whatever. It began where it should have left off, with political organizations, with suffrage and sovereignty; when the first lessons in civilization had not been learned, had not been taught, and had not yet been taught. But party supremacy required the measure, and it was adopted, against all the dictates of genuine statesmanship, as well as the demands of justice and humanity. And hence its failure, as could not but have been expected."

**Equality Life Insurance Co., OF VIRGINIA.**

REASONS WHY EVERY ONE SHOULD INSURE IN THE EQUALITY LIFE INSURANCE COMPANY OF RICHMOND, VIRGINIA.

1st. It is more LIBERAL to the INSURERS than any other company, and will eventually become PURELY MUTUAL and belong to the INSURERS.

2d. It circulates its money amongst its patrons, who are the insurers. Consequently they are continually getting the benefit of the rapid accumulations of the Company, the money being invested by the Board of Directors amongst the insurers. Therefore the insured are building up an institution peculiarly their own and conducted for their benefit.

3d. The loans of this company are as liberal as other companies who declare dividends at the end of the second, third and fourth years, but this Company at the end of the first and every year. Therefore the insured save several years' interest on his loans by insuring in this Company, and he never loses his money if he pays up for ONE WHOLE YEAR; whereas, in other companies, he has to remain an insurer for several years, or he loses all the money he has paid.

Therefore the insured are building up an institution peculiarly their own and conducted for their benefit.

3d. The loans of this company are as liberal as other companies who declare dividends at the end of the second, third and fourth years, but this Company at the end of the first and every year. Therefore the insured save several years' interest on his loans by insuring in this Company, and he never loses his money if he pays up for ONE WHOLE YEAR; whereas, in other companies, he has to remain an insurer for several years, or he loses all the money he has paid.

**THIS BRANCH OFFICE** offers all inducements for Life Insurance of a perfect Home Office, with these advantages: The Capital is furnished, the expense of commencing operations has been incurred, the success, beyond peradventure, is established, and the whole Capital and Assets of the Home Company stand committed to sustain it. The entire management of the Piedmont is in the hands of Southern men, and its aim is to sustain Southern interests. It further pledges itself to invest all funds accruing within the State, under the direction of the gentlemen named above, constituting the South Carolina Board of Directors, in whose integrity you must have entire confidence. The Piedmont claims to be equal in the privileges and benefits granted its patrons, to any other Company, surpassed by none, and superior to many, and only requests parties wishing to insure not to do so until they have examined the merits of this established Southern Company.

The first Dividend of the Piedmont Life Insurance Company paid on Life Policies was FORTY PER CENT, which proves the economy of its management, and its careful selection of risks.

**CAROLINA FERTILIZER**

The "CAROLINA FERTILIZER" is made from the Phosphates of South Carolina, and is pronounced by various chemists, one of the best Manures known, only inferior to Peruvian Guano in its Fertilizing Properties. These Phosphates are the remains of extinct land and sea animals, and possess qualities of the greatest value to the agriculturist.

We annex the analysis of Professor Shepard.

"LABORATORY OF THE MEDICAL COLLEGE OF SOUTH CAROLINA—Analysis of a sample of CAROLINA FERTILIZER, personally selected Monday evening at 2:50 P. M.
