The Weird Faces on Window Panes-More Extraordinary Stories.

From the Sandusky (Ohio) Register, May 5. We have often heard the question, why Sandusky and Milan only are the scenes of these strange phenomena. Our observations satisfy us that they are very general over this State, and perhaps all over the world. We discovered in North Fairfield, Huron county, Ohio, a few days since. twelve of these pictures on one window of a saw-mill. One of them, however, is a group of two persons, one a man with a hat on, the other a female, whose face occars immediately in front of the man, both looking out of the window. Some of the others have the appearance of ancient philosophers and some bear quite a strong resemblance to Washing ton in his old age. Also, in the linouse of the owner of the mill, on an upper window, there may he seen the pictures of three persons looking out of the window, and there are several more on the windows of this house, to which it is not worth while to refer especially. Also, on an upper winger there is a brief house there is a same had been added to the simple idistilled winding the same had been added to the simple idistilled winding the same had been added to the simple idistilled winding the same had been added to the simple idistilled winding the same had been added to the simple idistilled winding the same had been added to the dow on a large brick house there spirits.

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitts, Asthma, and Consumption.

Cough, Bronchitis, Asthma, and Consumption.

Probably never before in the whole history of medicine, has any thing won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to care the various affections of the langs and throat, have made it known as a relimble protector against them. While adapted to milder forms of thesaso and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs.
