Feb. 28, 9-2m. Important to Cotton Planters.

COTTON FOOD SECURED BY LETTERS PATENT. A SPECIAL FERTILIZER, prepared by the Maryland Fertilizing and Manufacturing Gompany, Baltimore, for the cotton crop, which they claim to be of the highest grade of Fertilizers sold in the South.

It has been used by several hundred planters in North and South Carolina and Geor-

gia for four seasons, with the following results:

It increases the crop from 75 to 200 per cent; it resists drouth in all cases.

The crop is not affected by rust; it matures the crop from three to four weeks in advance, thus insuring against early frost, or in the event of a backward season enables the planter to put in his crop as late as the 1st of June with a certainty of success.

It produces a better quality of cotton; its effect on the second year's crop without additional manure, ranges from one-third to one-half of the first year.

It is mechanical, preparation surpasses that of all other Fertilizers, being at all times

nd in all conditions of weather in perfect order for drilling. PRICE IN NEWBERRY --- \$55 per Ton, Cash; \$70 Time. It is sold on the basis in quality of Peruvian Guano, pound for pound. Agents are in structed, when planters use it side by tide with the best Pernyian Guano in equal quantistructed, when planters use it side by the with the best regular chain in equal quanti-ties, to reland such amount as will make it equal it it fails to produce as much cotton as the Peruvian. Numerous testimonials can be had at the offices of the agents. Order-
