NUMBER OF EGGS THAT A HEN CAN LAY.

We copy the following item, which has been for a long time going the rounds of the agricultural press, showing how little scientific attention has been ordinarily bestowed upon the of the other, although adjoining. subject of poultry keeping:

"It has been ascertained that the ovarium of a fowl is composed of 600 aimed at. These may be carried out in ovules or eggs; therefore a hen, during the whole of her life, cannot possibly lay more than 600 eggs, which in the natural course, are distributed over nine years, in the following propor-

First year	after birt	th 16 to 20	ment is going to be of great bene-
Second	do.	100 to 120	fit to farmers in a direction they
Third	do.	120 to 135	least expect, in my judgment
Fourth	do.	100 to 115	Some of the Granges are organized to
Fifth	do.	60 to 80	enable farmers to steer clear of middle-
Sixth	do.	50 to 60	men. To do this they have to get at
Seventh	do.	35 to 40	facts and figures in relation to the
Eighth	do.	15 to 20	handling and the sale of their produce,
Ninth	do.		and in relation to the cost and value
- Tr 0 11		11 L	of what they hav for their own use

It follows that it would not be profitable to keep hens after their fourth year, as their produce will not pay for almost totally ignorant hitherto .their keeping, except when they are They are going to discover how comof a valuable and scarce breed." To begin with, we may doubt the es, and how their business relations to

possibility of making any accurate each other may be affected by a small count of the number of ovisacs, in the difference in the cost of farm manovaties, or affirming that no new ones agement. It is going to develop busimake their appearance out of minute ness habits where they have not existgerms or cells in the course of the life ed before with any considerable degree of the hen.

In the next place, such a limitation must have reference to the actual constitution of the fowl, and this, either classes with impunity by getting conin its wild or tame condition. If to trol of State legislatures, courts, &c., the former, the number of ovisacs, and loose sight of the fact that they even if definitely ascertained, can have have only equal rights with other classno connection whatever with the real habit of the hen, since she lays in a gether, this hunting for facts, this diswild state, only as many as she can cover; if to the tame fowl, it is strange | friction, will do more to lift the farmto find so definite a rule laid down for ers of the country into true business an animal that is, in the highest de- relations with others, than all the gree, of an artificial character, and whose nature is, in so many points, constantly being remade .- The Poul- the past twenty-five years, or than it try World.

GOOD POINTS IN A COW.

1. Youth. A cow is in her prime at The labor and time spent in transplantfrom four to six years, and the best paying time to buy is just after the birth of her second or third calf.

2. Prominence and fullness of milk veins, and velvety softness of skin .- how much care there is taken digging The milk veins run down on either side of the animal toward the udder, A strong one year old vine of the same and are easily perceptible to the eye, or can be readily found by pressure of in four years be stronger, covering the hand, if the animal is not over fat. more surface and decidedly more pro-The skin should be soft and mellow, ductive than the old vine, while the not hard, rough and "staring."

3. Symmetry, fullness and softness of the udder. It should be broad, well spread out, projecting behind the legs, and also reaching forward un- the mistake, but farmers and country der the belly. There should be a softness and thinness to the touch, and an short time take it for granted that a absence of fleshiness and thick- large old vine is better than a small

4. Perfect number and condition of trials with old vines would open their tests. If one test is wanting, about a eyes and set them thinking on this fourth less milk will be the result. A subject, and they would soon find out ecw's udder is not, as some suppose, a that no matter how large a vine may barrel with four taps, but is divided in- be when transplanted, it should be to-four different compartments, called "milk glands, each of which has its virtually make a one year old of it. own tap or teat. It is not only important that the full number of teats be present and in working order, but Science Monthly there is a short artiit is desirable that they be well placed, cle relative to the power of endurance not crowded together, but pretty far manifested by the larvæ fly. It men. and uniformly apart; rather long and tions a case where a piece of the stom. canering; all pointing out and down- ach of a dead horse, which was coverwards; equal in size and even in appear- ed with bot-worms was spread on a board and spirits of turpentine was

5. Docility and quietness of disposi- poured on the worms; yet after an tion. These are indicated by large, hour not one was detached from the mild and clear eyes, and an air of coa- flesh. Then whale oil was poured on tentment generally. A cow that is them, when they all let go their hold, quiet and contented feeds at ease, chews and died almost immediately. Hence her cud with entire satisfaction, and the inference that whale oil should be furnished at the rate of \$10 per day. will secrete and yield more milk than used to detach the worms from the any restless and turbulent animal, hav- living horse, when attacked by bots. ing similar milking characteristics in other respects.

CUT THIS OUT .- A tea made of tures, it is evident that we must do peach leaves is a sure cure of kidney our best to check the growth of such a difficulty. A plaster made of fresh vegetation as is rejected by stock .slack lime and fresh tar is a sure cure But it is not enough to destroy the for a cancer, which, with all its roots, useless and injurious plants, we must will come out. A tea made of chesnut encourage the growth of the vegetable leaves, drank in the place of water, ones. How shall these objects be will cure the most obstinate case of completed? dropsy, in a few days. A tea made of ripe or dried whortleberries, and drank in the place of water is a sure and through considerable thickness of soil speedy cure for scrofulous difficulties, however bad. - Memphis Register.

RED PEPPER FOR INSECTS -- Those in undrained lands, carrying off to the who have tried it say that cayenne streams and rivers much of the valuapepper will destroy cabbage lice, the cabbage worm and all insects that prey upon the leaf of either the cabbage or turnip. Scatter over the leaves while wet with dew in the morning -A very small quantity will suffice.

KEEPING HENS.-In general a Atlanta and Richmond Air Line Rallway.

singing hen is a laving hen; certainly

a happy hen will carry out the adage

Iron in the Blood

MAKES THE WEAK STRONG.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and ish idea that they can override other cures "athousand ills," simply by Toning up, Invigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body, repairing damages and waste, searching out morbid secre-tions, and leaving nothing for

cussion of ways and means, this social disease to feed upon. This is the secret of the won-derful success of this remedy in curing Dyspepsia, Liver Complaint, Dropsy, Chronic Diarpreaching on the subject that has rhea, Boils, Nervous Affections, Chills and Fevers, Humors, been done by the agricultural press Loss of Constitutional Vigor, Diseases of the Kidneys and can do for a quarter of a century to Bladder. Female Complaints, and all diseases originating in a bad state of the blood, or accompanied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not foling old grape vines will, in nine cases lowed by corresponding reacout of ten, be thrown away. A beartion, but are permanent, infusing strength, vigor, and new tife into all parts of the system, ing vine, more than four years old, seldom, if ever, does well, no matter

and building up an Iron Constitution. Thousands have been changed by the use of this remedy, from weak, sickly, suffering crea-tures, to strong, healthy, and happy men and women; and invalids cannot reasonably hes-

itate to give it a trial. See that each bottle has PERU-VIAN SYRUP blown in the glass. Pamphlots Free.

Spectacles. nes by laTHEode wall one Most Wonderful Invention OF THE ACE

I. Moses' Electro-Galvanic, Pat. June 2d, '68
Attached to these patented Speciacles
are two scientifically constructed Galvanic Batteries—unseen when worn—delivering through the nerves of the head.

A Soft and Continuous Stream of Electricity. Vitalizing and giving healthy action to the entire beautiful system of those parts. AB-SOLUTELY and CERTAINLY CURING Partial Paralysis of the Optic Nerre, Weak or Diseased Vision, Neuralgia of the Hoad of the Face, Noise in the Head, Loss of Mental Energy, and a host of Nerrous Dis-

eases arising from depression of the nervous energy of the system.

Contributing in a most astonishing de-LIFE, VIGOR AND BEALTH, By the means of the soft and flowing stream of Electricity, giving brightness to the Eye, quickness to the Ear, and energy to the

Brain.

They are set with lenses of the finest manufacture, to suit all sights, and with glasses for those not needing Speciacies to read with, but desiring the benefits to be derived from wearing the Batteries; and are to be had in this vicinity only of JOHN F. SPECK, Watchmaker and Jeweler

Dealer in Watches, Clocks, Jewelry, Silver and Plated Ware, NEWBERRY, S. C. None are Genuine unless each pair stamped J. MOSES' ELECTRO-GALVANIC, Patented June 2d, 1868. Apr. 9, 14-tf. be glowing
