

THE NEWBERRY INHALER.

The Honest Man Who Pays.
A HINT FOR THE TIMES.
Mr. Oscar H. Harpel, the well-known Cincinnati printer and author of *The Typographic*, sends to the Newspaper Reporter the following—a holiday poem for printers:
There is one among the many,
Can you tell me where he stays?
He is an old-fashioned par-ty,
Call him the honest man, who pays.
You—the honest man who pays
Every dollar he may own,
Keeping up the good ways
That so many scarcely know.
If he gives his word of promise
It is as good as gold as gold;
If he holds a post of honor,
Not a truce is ever sold.
By the honest man who pays
Every debt he may incur,
Yielding each a just award,
And no grudging or demur.

The Herald.
TPOS. F. BRENEKER, EDITOR.
TRA B. JONES, ASSISTANT EDITOR.

What is Man?
"Man is the sport of fortune." He is a being of smiles and tears,—now a creature of hope, now a victim of despair. As he rounds the flowery path of youth, all around him is bright and fair, every glimpse of the future is heightened by the soft pencillings of happiness to come. But soon the picture is darkened by the gloomy shadings of sadness and sorrow. To-day every sound, that falls upon his ear, breathes the music of hope; to-morrow night is heard sad the notes of despair. Now life seems spread out before him a lovely landscape, where every prospect, that meets the eye, is arrayed in the bloom of coming felicity. But alas! how soon are the flowers of pleasure blighted by the chilling frosts of disappointment, and the whole scene covered with the white sheetings of misfortune's wintry snow. "Such is life, in which shade and sunshine chase each other along the plain." Thus hath Providence ordained it; and thus has history portrayed it.

The Legislature.
The General Assembly reconvened on the 20th inst., but nothing was done on that day, a quorum not being present. Since then the following resolutions, bills and notices of bills have been introduced which are of some general interest:

Brief Mentions.
Professor Goldwin Smith, in a speech before the congress of trades' unions at Sheffield, England, on Wednesday night, advised emigrants to the United States.
A couple of Philadelphia misses gave a dolls' ball the other evening. Invitations, engraved upon miniature note paper, were sent to thirty or forty of the most aristocratic of the Quaker class, and in every instance the invitation was accepted. The dolls presented themselves in full costume, and some most exquisite. Supper was served at the unusual hour of eight o'clock. The service and food corresponded with the size of the guests. Champagne, in bottles about the size of one's finger, was placed in silver coolers of equal height. After supper there was dancing, which was continued to a late hour, when the servants announced that it was time to go home, and the dolls, after some putting, concluded their disposition.

New & Miscellaneous.
CORN, CORN, CORN.
1,000 BUSHELS for sale. Address, J. M. ADAMS, Pendleton, S. C. Jan 28, 4-2t.

STOP THE MURDERER!
J. H. VERNILION willfully murdered my brother, Robt. Holiday, during Christmas, and has fled the county, going West. It is supposed, in company with two other men, who are likewise fugitives from justice. Vernilion is about 18 or 20 years of age, 5 feet and 8 inches high, blue eyes, and fair complexion, with light dark hair. It is hoped all papers will copy this notice and assist in bringing to justice a man who, without any cause, shot down an innocent, good citizen before his wife and children. G. W. HOLDAY, Jan. 28, 4-1t.

SALE OF VALUABLE LANDS
ON
Enoree River and Dunean's Creek.
I will sell, at public auction, to the highest bidder, at Newberry, C. H.,
ON SALE-DAY IN FEBRUARY,
One TRACT OF LAND containing
SEVEN HUNDRED ACRES,
more or less, situated in Forks of Dunean's Creek and Enoree River, and bounded by lands of Dr. T. C. Brown, Mrs. E. H. Epps, Henry Whitmore and others. There are SEVENTY-FIVE ACRES OF ORIGINAL FOREST,
more or less, between.

STANDARD SCALES
ALLIANCE SCALES, COAL SCALES, IRON SCALES, STEEL SCALES, COUNTER SCALES, &c. Scales Repaired Promptly and Accurately. For Sale, also, Letter Presses, and THE MOST PERFECT
ALARM CASH DRAWER

NEWBERRY, S. C.
WEDNESDAY, JAN. 28, 1874.
A PAPER FOR THE PEOPLE.
The Herald is in the highest respect a Family Newspaper, devoted to the material interests of the people of this County and the State. It circulates extensively, and as an Advertising medium offers unrivalled advantages. For Terms, see first page.

Patron of Husbandry's communication was received only as we were about going to press, and consequently too late for this issue. It shall appear next week.

Immigration Societies.
From various parts of the State we hear of the formation of societies for the systematic advancement of the cause of immigration. In Anderson, Barnwell, Chester, Fairfield, Kershaw, Oconee, Walhalla and other counties, societies for this purpose have been organized and promise to be productive of much good. Newberry should not be behind. She should at once organize an immigration society. It is true the Grange here is moving in that direction and we think it a good plan, and wish it success. But as all the elements are not represented in the Grange, we think, in addition to that organization, a society in which all the interests are represented should immediately be formed. By a united, systematic effort much more can be accomplished in a shorter time and with less expense than by acting individually. One thing we would like to mention to the immigrant seekers of Newberry, which is to remember the people of Great Britain in their selections of laborers. If there are a people on the face of the globe better or more suitable than they we are not aware of it. We have not the slightest objection in the world to the German and other foreigners who are coming into our State. We welcome them and hope more will come. But let us have a heavy sprinkling of English, Scotch and Irish, and we will ever increase the brain as well as the muscle of South Carolina.

Address of Col. Richard Lathurs.
We are in receipt of the address of the above named gentleman, which was delivered before the New England Society of Charleston on Forefathers Day, Dec. 22, 1873, and now published in pamphlet form by the *News & Courier*. We have given the address a careful perusal and find it full of eloquent, manly and patriotic sentiments. Such sentiments should be scattered throughout our State that they may arouse to action the slumbering energies of our broken spiritured people. According to Col. Lathurs we ourselves are to be blamed for much of the evil existing in this State. We have been lacking in unity and activity. We have heard the robbers at the door but have slept on in careless indifference. He recommends a union of all honest, patriotic men, regardless of race, color or condition, to wage war against corruption in high places; by an earnest, vigorous and persistent prosecution in the courts of the State against every official of whose corruption and venality evidence may be found. This is a wise suggestion, and if carried out with vigor will rescue our State from much that is disgusting, and resurrect its honor which has been buried for years.

Our On Our Table.
We have this week received the neatly prepared Public Ledger Almanac which is given gratuitously to every subscriber to the *Public Ledger*, published by George W. Childs, of Philadelphia. This almanac, in addition to the usual contents of almanacs, has, in a condensed form, many interesting and useful facts which will make it valuable for reference.
We have also received a pamphlet published by the Department of Agriculture, containing a carefully prepared treatise on the culture and manufacture of ramié and jute, written by Emile LeFranc, of New Orleans. Experiments recently made in Louisiana, on the cultivation and preparation of these textiles show that they will, in course of time, become an important and lucrative branch of agriculture.
Also, the Report of the Board of Regents and the Superintendent of the Lunatic Asylum of South Carolina, for the year ending October 31st, 1873. According to the report the Asylum in some respects has been improved, but its wants are still very great. Its finances are in a sad condition and its credit is almost entirely gone. The number of lunatics in the Asylum at the beginning of the year was 200; 388; 27 of whom were discharged during the year, 34 as improved; 14 as stationary; and 24 as having died during the year, leaving October 31st, 1873, 309, the most of which number are chronic cases, of whose cure there is no hope. It is recommended that the capacity of the Asylum be enlarged, and that the General Assembly make a liberal appropriation to pay the back-owed arrears of the institution, which is about \$80,000, and to secure more comfort to the inmates in the future.

Experiments recently made in Louisiana, on the cultivation and preparation of these textiles show that they will, in course of time, become an important and lucrative branch of agriculture.
Also, the Report of the Board of Regents and the Superintendent of the Lunatic Asylum of South Carolina, for the year ending October 31st, 1873. According to the report the Asylum in some respects has been improved, but its wants are still very great. Its finances are in a sad condition and its credit is almost entirely gone. The number of lunatics in the Asylum at the beginning of the year was 200; 388; 27 of whom were discharged during the year, 34 as improved; 14 as stationary; and 24 as having died during the year, leaving October 31st, 1873, 309, the most of which number are chronic cases, of whose cure there is no hope. It is recommended that the capacity of the Asylum be enlarged, and that the General Assembly make a liberal appropriation to pay the back-owed arrears of the institution, which is about \$80,000, and to secure more comfort to the inmates in the future.

On Our Table.
We have this week received the neatly prepared Public Ledger Almanac which is given gratuitously to every subscriber to the *Public Ledger*, published by George W. Childs, of Philadelphia. This almanac, in addition to the usual contents of almanacs, has, in a condensed form, many interesting and useful facts which will make it valuable for reference.
We have also received a pamphlet published by the Department of Agriculture, containing a carefully prepared treatise on the culture and manufacture of ramié and jute, written by Emile LeFranc, of New Orleans. Experiments recently made in Louisiana, on the cultivation and preparation of these textiles show that they will, in course of time, become an important and lucrative branch of agriculture.
