JANUARY.

Calendar table for January with days of the week and numbers.

KEEPING POULTRY.

After the fowls are domiciled comes the new and what ought to be pleasant work of caring for them.

A box of fine gravel to each run is required as well as oyster shells. It helps to grind up the shells for lime to make egg shell, besides helping to digest its food.

Another thing, the dust box must be always at hand and dry, as parasites will always overrun any house and fowls that are not thoroughly cleaned.

When confined, their food must be more varied than that of fowls running at large. Ground beef scraps are very good, they contain many small patches of bone.

Always keep on hand sulphur, disinfectant powder or carbolate of lime, and such things as will be used at any time, so that when occasion requires, or you have a little time to spare, you may not have to wait for them.

Most fowls know enough to go in themselves; but there is, and always will be, of fowls (as of other two legged creatures), some so simple as not to know how to take care of themselves.

How to INCREASE EGGS.—If an increase of eggs be desired in the poultry yard, before large sums of money are expended in the purchase of everlasting layers, we would recommend the system of keeping no hens after the first, or, at the most, their second year.

To RECOOK ROAST BEEF.—Cut nice slices from it and broil over a quick fire; be sure to turn them every moment and let them only get very hot through; have your dish heated, and put into it a lump of butter, some pepper and salt; turn the slices over in this and send to the table at once.

CHOCOLATE PUDDING.—One quart of sweet milk, three ounces of grated chocolate; scald the milk and chocolate together, and when cool, add the yolks of five eggs and one cupful of sugar.

advantage of a comparatively youthful cooerel, may be the means of even exhibition-poultry making their appearance from the eggs of the good old hen, and here we have the exception to the rule upon which we insist.

TAR ON FRUIT TREES.—According to the experience of Mr. Henry Reynolds, of North Carolina, tar is a perfect remedy for scarred and sun cracked apple trees. He says that by coating with new tar the trunk of a favorite fruit bearer that was cracked and so decayed that the bark was dead and would peel off, he has restored it fully. He applies it to all the branches that show signs of decay.

NAIL IN A HORSE'S FOOT.—A neighbor of mine recently informed me that he had lost a most valuable horse by a casualty by no means uncommon. A knowledge of a simple remedy would have prevented this loss.

RAISE YOUR OWN HOGS.—Raise your own hogs this year. It is not difficult to do. Construct a covered pen or house out of heavy logs or plank; have a plank floor so as to allow of cleaning, a good strong door with a good lock, and the work is half done.

DAHLIAS.—"The best way to grow dahlias is to plant them just as they grow on the mother-stem, very early in the spring, in boxes in the house or conservatory if you are rich enough to own one. By the time the late frosts are over—say the 10th of May—take up the whole bunch of tubers and separate them. Plant each tuber (no matter how many eyes have sprouted on it) in the flower garden.

How to INCREASE EGGS.—If an increase of eggs be desired in the poultry yard, before large sums of money are expended in the purchase of everlasting layers, we would recommend the system of keeping no hens after the first, or, at the most, their second year.

To RECOOK ROAST BEEF.—Cut nice slices from it and broil over a quick fire; be sure to turn them every moment and let them only get very hot through; have your dish heated, and put into it a lump of butter, some pepper and salt; turn the slices over in this and send to the table at once.

CHOCOLATE PUDDING.—One quart of sweet milk, three ounces of grated chocolate; scald the milk and chocolate together, and when cool, add the yolks of five eggs and one cupful of sugar. Bake about twenty-five minutes, beat the whites for the top, brown in the oven, and eat cold.
