DON'T WORK UNTIL AFTER YOU EAT.

Dr. Hall is authority for the following sensible thoughts upon breakfasting before much exercise in the open air, particularly in districts where fever and ague are abundant:

Breakfast should be eaten in the morning before leaving the house for exercise, or labor of any description; those who do it will be mentioned there was a necessity able to perform more work and of knowledge of the form of the with greater alacrity than those plow and the principles of draught. who work an hour or two before breakfast. Besides this, the average duration of life of those who take breakfast before exercise or work, will be a number of years greater than those who do otherwise. Most persons begin to feel weak after having been engaged five or six hours in their ordinary avoeations; a good meal reinvigorates, but from the last meal of the day until next morning there is an interval of some twelve hours; hence the body, in a sense, is weak, and in proportion cannot resist deleterious agencies, whether of the fierce cold of midwinter or of the poisonous miasm which rests upon the surface of the earth wherever the sun shines on a blade of vegeta-

tion or a heap of offal. This miasm is more solid, more and the whisk and broom too little. concentrated, and hence more ma-I do not myself insist upon it, but lignant about sunrise and sunset I believe it would pay always to than at any other hour of the twenty-four, because the cold of the night condenses it, and it is on the first few inches above the soil in its most solid form; but as the sun rises it warms and expands a cloth. I question if one farmer and ascends to a point high enough to be breathed, and being taken into the lungs with the air and swallowed with the saliva into the stomach, all weak and empty as it day's work. is, it is greedily drank in, thrown immediately into the circulation of the blood and carried directly to correspondent sends the following: every part of the body depositing A pair of heavy, thick-soled, calfits poisonous influences at the very skin boots had been worn two

fountain head of life. If early breakfast was taken in regions where chills and fever and fever and ague prevail, and if, in addition, a brisk fire were kindled in the family room for an hour, including sunset and sunrise, these troublesome maladies would diminish in any one year, not tenfold, but a thousand fold, because the heat of the fire would rear the miasmatic air instantly and send it above the breathing point. But it is "troublesome" to be building fires night and morning all summer. It being no "trouble," requiring no effort, to shiver and shake by the hour daily weeks and months together.

WHAT PAYS?

AT PAYS every Manufacturer, Merchant, Me chanic, Inventor, Farmer, or Professional man, to keep informed on all the improvements and discoveries of the age.
IT l'AYS the head of every family to introduce into his household a newspaper that is in-structive, one that forters a taste for investiga-

tion, and promotes thought and encourages dis-cussion among the members. THE SCIENTIFIC AMERICAN which has been published weekly for the last thirty-one years does this, to an extent beyond that of any other publication; in fact it is the only weekly paper published in the United States devoted to Manufactures, Mechanics, Inventions and New Discoveries in the Arts and Sciences. Every number is profusely illustrated and its contents embrace the latest and most interesting

information pertaining to the Industrial, Mechanical, and Scientific Progress of the World; Descriptions, with Beautiful Engravings of New Inventions, New Implements, New Processes, and Improved Industries of all kinds; Useful Notes, Recipes, Suggestions and Advice by Practical Writers for Workmen and Employers, in all the various arts, forming a complete reper-tory of New Inventions and Discoveries; containing a weekly record, not only of the progress of the Industrial Arts in our own country, but also of New Discoveries and Inventions in every branch of Engineering, Mechanics, and Science abroad. THE SCIENTIFIC AMERICAN has been the

foremost of all industrial publications for the past thirty-one years. It is the claest, largest, cheapest and the best weekly illustrated paper devoted to Engineering, Mechanics, Chemistry, The above stock is all fresh, having just New Inventions, Science and Industrial Pro gress, published in the world.

The daily edition will on week days be a sheet of four pages, and on Sundays a sheet of eight pages, or 56 broad columns while the weekly edition will be a sheet of eight pages of the same dimensions and character that are already familiar to our friends. THE SUN will continue to be the strenuou advocate of reform and retrenchment, and of the substitution of statesmanship, wisdom, and infraud in the administration of public affairs. It will contend for the government of the people by the people and for the people, as opposed to government by frauds in the ballot-box and in the counting of votes, enforced by military vio-lence. It will endeavor to supply its readers—a body now not far from a million of souls-swith the most careful, complete, and trustworthy accounts of current events, and will employ for this pur-pose a numerous and carefully selected staff of reporters and correspondents. Its reports from Washington, especially, will be full, accurate, and fearless; and it will doubtless continue to deserve and enjoy the hatred of those who thrive by plundering the Treasury or by usurping what the law does not give them, while it will en-deavor to merit the confidence of the public by defending the rights of the people against the encroachments of unjustified power.

The price of the daily Sux will be 55 cents a month or \$6.50 a year, post paid, or with the Sunday edition \$7.70 a year.
