QUESTIONS AND ANSWERS.

How about feeding whole corn to poultry?

When corn only is fed to fowls it serves to fatten them, but dries up their egg product; as compared with wheat, barley, rice, oats, etc., it possesses very little of the requisite qualities that go to help the creating of egg substance; therefore, for laying hens, whole corn is avoided as a continuous food, but can be given in the proportion of one-fifth corn to other grains and feed allowed. Cooked meat once or twice a week is said to be good for laying hens.

Can a poor, stony pasture be renovated?

Plowing up the ground and enriching it while cultivating two or three successive crops, and then seed it down thickly with grass seed, will greatly improve it. Or the land can be top-dressed with manure or guano and then seeded down?

Which corn brings the greatest price, white or yellow?

That depends upon circumstances, and varies in different seasons; usually white corn commands the best price, but at the present time in New York yellow corn sells some five or six cents in advance of the white corn.

How can you tell when alfalfa seed is ripe?

Alfalfa seed in proper condition presents a yellow, glossy appearance. When not ripe the seeds are white.

Which loses the most from shrinkage in drying, corn or wheat?

It has been contended that corn loses one-fifth and wheat one-fourteenth by drying.

How many pounds does a bushel of corn average?

In most States fifty-six pounds; in New York fifty-eight pounds to the bushel.

MAIZE AS A FORAGE PLANT.—Maize, or Indian corn, when growing, both in quantity of yield and richness of food, ranks favorably as a forage plant. Its yield on good land is enormous. It has been estimated, from actual experiment by one of our most practical farmers, that one acre seeded in drilled corn may be made to furnish food at the South for five horses for a whole year. At a certain stage of its growth all parts of the plant are rich in saccharine matter, and furnish excellent food, relished by stock of all kinds, and may be used with good profit in fattening pork. Its greatest drawback is that, being an annual, it requires renewed planting and cultivation every year, and it makes heavy drafts on the fertility of the soil. With a rye crop to precede clover and green corn to follow, the provident farmer need have little apprehension of a scarcity of forage for horses or other stock nearly one-half of the year.

EDUCATION AND TRANSITION IN AGRICULTURE.—In an address before the New York State agricultural society, the president of Cornell University said: "The present system of skinning lands and then running away to soils more fruitful, in the intention of robbing and running away from them in turn, cannot last. Men must get a subsistence on less and less land. We see the beginnings of this now. Already it is becoming less and less easy for the farmer's boy to be sure that the little dark office in the great city block swarming with lawyers, is, after all, so much more promising than the open fields and work of the farmer. What should this boy's education be to qualify him for the profession of agriculture?"

SAVING MANURE.

Probably but few farmers exist who have not read articles in the papers advising them to keep their stable manure under cover in a cellar under the stalls, or under a shed; but in both places dung is liable to become too dry, and the straw among it will not decompose as rapidly as it will when exposed to rains; or if it be all horse dung, it will "fire-fang," and will be greatly injured. A cellar under the stable stalls, into which all the manure and urine of the stock is received, is a good thing, but it would be a great deal better if the manure could be thoroughly wet once a month from a pump adjoining or near the cellar. The same can be said of manure under a shed when piled in deep; it must be kept moist or it had better be kept in the open barnyard. Indeed, we are of the opinion that when a barnyard is made concave, with no drain to it, manure can be kept in it from fall to spring without any loss. Some farmers think that much of the virtues of manure in open yards pass down into the soil and are lost; but such is not the case, as it will be found on removing it in the spring that the soil under it has become colored but two or three inches deep. Now we claim that if an abundance of litter be used upon the surface of the manure to retain moisture and to prevent evaporation, all that a farmer makes can be as well preserved in his open barnyard as under cover; and we would prefer to have our manure spread over the yard occasionally, and covered with straw, than to have it thrown into heaps by the stable door and through windows back of the stalls, and so remain all winter, with much of its virtue washed away and lost.

ETIQUETTE AT THE DINNER TABLE.—There are a great many families where table etiquette is almost ignored. The following impressive suggestions are copied from a recent number of *Harper's Bazar*, which is always full of good things:—We all have our various views as to what it is that constitutes fit and becoming behavior at the table. Perhaps none have quite the whole body of the law at their command; but everybody has a little manual of the chief points, and in that life where there is any material attention paid to comfort, the greater part of the people know enough to cause them to eat with their forks, to keep their arms off the cloth, not to lie sidewise on the table, to use their spoon right side up, to butter their bread on the plate instead of in the air, to put their food into their mouths in a single morsel instead of in a disappearing length like a conjuror's ribbon, to forbear the use of toothpicks, to drink their tea from their cups, to keep the plate the hostess sends them—these and other similar observances everybody knows and practices them. Yet further refinements, moreover, are in the possession of others; the knowledge of how much or how little it is proper to press a dish; the manner of speaking to a servant; the necessity, where there are servants, of letting every dish absolutely alone and keeping one's fingers off of so much as a salt cellar.

ORANGE CAKE.—Three-fourths of a cup of butter, one and a half cups of sugar, four eggs (beaten separately), three and a half cups of flour, two heaping teaspoons of baking powder, one cup of milk. For frosting: One orange, grate the rind and squeeze the juice and pulp, and three-fourths of a cup of sugar, and then the orange juice. I make two cakes of three layers.

DOUGHNUTS.—Six cups of flour, one and a half cups of sugar, three teaspoons of baking powder, one teaspoon of salt, butter the size of half an egg. Mix thoroughly. Then add four eggs well beaten, and moisten with sweet milk until a soft dough. Flavor with nutmeg or cinnamon.

Egg shells form one of the best clarifiers for cider and wine. One pint of pulverized egg-shells will clarify one barrel of cider or wine in from twenty-four to forty-eight hours, according to the clearness of the weather.

CURE FOR CHICKEN CHOLERA.—Take Venetian red, dissolve it in water, giving them no other drink. It has been tried with marked success.

Swallowing the bristle of a tooth-brush has been known to cause death.

Fertilizers.

SOLUBLE PACIFIC GUANO.

The above well known

GUANO AND COMPOUND ACID PHOSPHATE,

is now offered for sale at the following places in this County. Consumers of this Guano will find it fully up to last years quality, which gave such universal satisfaction.

Newspapers & Magazines

WHAT PAYS?

IT PAYS every Manufacturer, Merchant, Mechanic, Inventor, Farmer, or Professional man, to keep informed on all the improvements and discoveries of the age.

IT PAYS the head of every family to introduce into his household a newspaper that is instructive, one that fosters a taste for investigation, and promotes thought and encourages discussion among the members.

THE SCIENTIFIC AMERICAN

which has been published weekly for the last thirty-one years does this, to an extent beyond that of any other publication; in fact it is the only weekly paper published in the United States devoted to Manufactures, Mechanics, Inventions and New Discoveries in the Arts and Sciences.

Every number is profusely illustrated and its contents embrace the latest and most interesting information pertaining to the Industrial, Mechanical, and Scientific Progress of the World; Descriptions, with Beautiful Engravings of New Inventions, New Implements, New Processes, and Improved Industries of all kinds; Useful Notes, Recipes, Suggestions and Advice by Practical Writers for Workmen and Employers, in all the various arts, forming a complete repertory of New Inventions and Discoveries; containing a weekly record, not only of the progress of the Industrial Arts in our own country, but also of New Discoveries and Inventions in every branch of Engineering, Mechanics, and Science abroad.

THE SCIENTIFIC AMERICAN has been the foremost of all industrial publications for the past thirty-one years. It is the oldest, largest, cheapest and the best weekly illustrated paper devoted to Engineering, Mechanics, Chemistry, New Inventions, Science and Industrial Progress, published in the world.

The practical recipes are well worth ten times the subscription price, and for the shop and house will save many times the cost of subscription.

Merchants, Farmers, Mechanics, Engineers, Inventors, Manufacturers, Chemists, Lovers of Science, and People of all Professions, will find the SCIENTIFIC AMERICAN useful to them. It should have a place in every Family, Library, Study, Office and Counting Room; in every Reading Room, College and School. A new volume commences January 1st, 1877.

A year's numbers contain 832 pages and several Hundred Engravings. Thousands of volumes are preserved for binding and reference. Terms, $3 20 a year by mail, including postage. Discount to Clubs. Special Circulars, giving Club rates, sent free. Single copies mailed on receipt of 10 cents. May be had of all News Dealers.

PATENTS. IN CONNECTION with the SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, and have the largest establishment in the world. More than fifty thousand applications have been made for patents through their agency.

Patents are obtained on the best terms, Models of New Inventions and Sketches examined, and advice free. A special notice is made in the Scientific American of all Inventions Patented through this Agency, with the name and residence of the Patentee. Patents are often sold in part or whole, to persons attracted to the Invention by such notice. A Pamphlet, containing full directions for obtaining Patents, sent free. The Scientific American Reference Book, a volume bound in cloth and gilt, containing the Patent Laws, Census of the U. S., and 142 engravings of mechanical movements. Price 25 cents.

Address for Paper, or concerning Patents, MUNN & CO., 37 Park Row, New York. Branch Office, Cor. F. & 7th Sts., Washington, D. C.

Dec. 6, 49—tf.

1877.

Eclectic Magazine

OF

FOREIGN LITERATURE.

THIRTY-THIRD YEAR.

THE ECLECTIC reprints from all the foreign Quarterlies, Reviews, Magazines, and Journals, their choicest contents, including ESSAYS, SCIENTIFIC PAPERS, BIOGRAPHICAL SKETCHES, REMINISCENCES OF TRAVEL AND ADVENTURE, TALES, STORIES AND POEMS. The field of selection is very large, and it is believed that the ECLECTIC presents A GREATER VARIETY AND HIGHER STANDARD OF LITERATURE than any periodical can hope to do that depends exclusively upon home talent.

A knowledge of the current literature of other countries is indispensable to all who would keep pace with the progress of the human mind; and the ECLECTIC offers the best, and, indeed, the only, opportunity for obtaining this knowledge within a reasonable compass, and at a moderate price.

Among the writers represented in recent numbers of the ECLECTIC are: The Rt. Hon. W. E. Gladstone, James Anthony Froude, Matthew Arnold, Charles Kingsley, Robert Buchanan, Geo. McDonald, John Ruskin, Alfred Tennyson, Thomas Hughes, William Black, Mrs. Oliphant, Thos. Hardy, William Morris, Miss Thackeray, Mrs. Alexander, Profs. Huxley and Tyndall, Richard Proctor, B.A., Prof. Owen, Dr. W. B. Carpenter, Max Muller, J. Norman Lockyer, Herbert Spencer, and others equally eminent. Besides the regular articles in the body of the magazine, there are four original Editorial Departments: LITERARY NOTICES, FOREIGN LITERARY NOTES, SCIENCE AND ART and VARIETIES.

With regard to the character of the selections, the aim of the ECLECTIC is to be instructive without being dull, and entertaining without being trivial. While each number contains something to interest every member of the family circle, it addresses itself particularly to that great body of intelligent readers who seek profit as well as amusement in solid and healthful literature.

Besides the 128 pages of reading matter, each number of the magazine contains a FINE STEEL-ENGRAVING—usually a portrait—executed in the most artistic manner.

TERMS.—Single copies, 45 cents; one copy one year, $5; two copies, $9; five copies, $20. Trial subscription for three months, $1.

The ECLECTIC and any $4 Magazine to one address, $8.

Postage free to all subscribers. Address,

E. R. PELTON, Publisher,

25 Bond Street, New York.

ESTABLISHED 1865.

GILMORE & CO.,

Attorneys at Law,

Successors to Chipman, Hosmer & Co.,

629 F. Street, Washington, D. C.

American and Foreign Patents.

Patents procured in all countries. NO FEES IN ADVANCE. No charge unless the patent is granted. No fees for making preliminary examinations. No additional fees for obtaining and conducting a rehearing. Special attention given to Interference Cases before the Patent Office, Extensions before Congress, Infringement Suits in different States, and all litigation pertaining to Inventions or Patents. SEND STAMP FOR PAMPHLET OF SIXTY PAGES.

United States Courts and Departments.

Claims prosecuted in the Supreme Court of the United States, Court of Claims, Court of Commissioners of Alabama Claims, Southern Claims Commission and all sorts of war claims before the Executive Departments.

Arrears of Pay and Bounty.

OFFICERS, SOLDIERS and SAILORS of the late war, or their heirs, are in many cases entitled to money from the Government, of which they have no knowledge. Write full history of service, and state amount of pay and bounty received. Enclose stamp, and a full reply, after examination, will be given you free.

Pensions.

All OFFICERS, SOLDIERS and SAILORS wounded, ruptured or injured in the late war, however slightly, can obtain a pension, many now receiving pensions are entitled to an Increase. Send stamp and information will be furnished free.

United States General Land Office.

Contested Land Cases, Private Land Claims, Mining Pre-emption and Homestead Cases, prosecuted before the General Land Office and Department of the Interior.

Old Bounty Land Warrants.

The last Report of the Commissioners of the General Land Office shows 2,897,500 acres of Bounty Land Warrants outstanding. These were issued under acts of 1855 and prior acts. We pay cash for them. Send by registered letter. Where assignments are imperfect we give instructions to perfect them.

Each department of our business is conducted in a separate bureau, under the charge of experienced lawyers and clerks.

By reason of error or fraud many attorneys are suspended from practice before the Pension and other offices each year. Claimants whose attorneys have been thus suspended will be gratuitously furnished with full information and proper papers on application to us.

As we charge no fee unless successful, stamps for return postage should be sent us.

Liberal arrangements made with attorneys in all classes of business.

THE GREAT CAUSE

OF

HUMAN MISERY.

Just Published, in a Sealed Envelope. Price six cents.

☞ A Lecture on the Nature, Treatment, and Radical cure of Seminal Weakness, or Spermatorrhœa, induced by Self-Abuse, Involuntary Emissions, Impotency, Nervous Debility, and Impediments to Marriage generally; Consumption, Epilepsy and Fits; Mental and Physical Incapacity, &c.—By ROBERT J. CULVERWELL, M. D., author of the "Green Book," &c.

The world-renowned author, in this admirable Lecture, clearly proves from his own experience that the awful consequences of Self-Abuse may be effectually removed without medicine, and without dangerous surgical operations, bougies, instruments, rings, or cordials; pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

☞ This Lecture will prove a boon to thousands and thousands.

Sent under seal, in a plain envelope, to any address, on receipt of six cents, or two postage stamps.

Oct 9 40 tf. MARTIN HARRIS.

Fisk's Metallic Burial Cases.

THE SUBSCRIBER has constantly on hand a full assortment of the above approved cases, of different patterns, besides coffins of his own make, all of which he is prepared to furnish at very reasonable rates, with promptness and despatch.

Persons desirous of having cases sent by railroad will have them sent free of charge.

A Hearse is always on hand and will be furnished at the rate of $10 per day.

Thankful for past patronage, the subscriber respectfully asks for a continuation of the same, and assures the public that no effort on his part will be spared to render the utmost satisfaction.

R. C. CHAPMAN
