SEWING MACHINES.

THE PERFECTION OF SCIENTIFIC

arrangement and mechanical simplicity is attained by the

GROVER & BAKER

Sewing Machine Company,

IN THEIR IMPROVED

NOISELESS MACHINES.

They have the following advantages over all others: They have no pads to keep in order; no bobbing in wind; no tangling or waste of thread; no oiling the thread or work; no lot chest stocked with wrenches, pliers, screws, leather, &c., &c.

The directions are simple, easily understood and easily explained by the instructors. There is no taking apart for cleaning or oiling. They require about ten drops of oil per day, when in constant use. They make no more noise than a common clock, when making fifteen hundred stitches per minute. They run easy—a child of ten years old can work them to full speed. They run fast or slow, without any danger of altering the length or tightness of the stitch. They will IRON, FILL, GATHER, BIND, STITCH AND EMBROIDER, in so superior a manner that we challenge comparison.

The same Machine will sew pavilion goods and plantation goods. The seam is elastic as the most elastic fabric, and will not break in washing or ironing. The same Machine runs silk, linen thread and common spool cotton, with equal facility. The needles are shorter, and therefore stronger than any other high or low priced Machine. That they are superior to all others is evident from the fact of their having been thirty thousand Machines made and sold, in competition with others already in successful operation. The question is no longer which is the best maker, but which of the numerous patterns of of GROVER & BAKER shall I take.

PRICES, \$50 TO \$130.

Land and Mills in Pickens.

I OFFER FOR SALE a valuable Tract of Land in Pickens District, on both sides of Little River, at the mouth of Cane Creek, containing Twelve to Fifteen Hundred Acres, with a good MULAY SAW MILL, and a small Grist Mill, on a shoal sufficient for a Lowell Factory.

If not sold by the close of the year I intend putting up a WOOL CARDING Machine and a TANYARD, where both are greatly needed, and would take an active partner with a small capital, who would undertake to superintend the whole.
