As interesting Letter as to Stock Raising, Da-rying and Manufacture of Cheese. Winnaboro, November 30.—The dis-functory at this point has brought forth the following letter from Dr. Neeson, of Clemeon College, which was written in reply to a communication asking him in regard to the practicability of such en-terprizes in this social suggestions that ought to be beloful at this time when there is a search for new enterprizes for the farm as well as for the factor: "I am deligited to hear that the prospects for cheese factories in your section are good. I have frequently taken occasion to remark that the prin-cipal reason why farms all over the South are decreasing in fartility and value as they are in Fairfield county is that our system of agriculture forces the sale of field crops instead of animal products. If all that will do to feed to animals were fed on the farms where it is grown and the manure returned to the solip poor lands would soon be a thing of the past, for it should be remembered that all tay and sandy lands in this sec-tion are susceptible to the highest state of fictilisation. This is not true of prarie and lime lands. Before we can have cheese factorize we must have plouty of good dairy cattle, and before we can keep these cattle, contout the any medows and grain fields to produce all the required food on the farm. Some things produced may be exchauged for others, as the exchange of oution, cotton seec and milk for cot-farm. Some things around a firmer to pro-duce feed in abundance.
