A Word to the Public.

We learn from our County Commis-sioners that they are having the public roads of the county worked out and put in good condition as rapidly as possible. They are endeavoring, too, to widen the roads so that there will be no further complaint along that line. There are three classes of public roads provided for in our statute law, the width of which are twenty, eighteen and sixteen feet. In this respect our Commissioners are trying to comply with the law as far as practicable.

The Commissioners desire also to call

special attention to the farmers along the public highways not to trespass too near the public roads, as ample room must be given the road hands to do their work in widening the roads. They desire, too, that the sand in the ditches long the highways be not disturbedthat is, hauled away. There are two crews in the county working the public roads—one on the eastern side of the county and the other

on the western side, under the manage-ment of E. P. Wood and J. M. Kelley, road builders. Since they began opera tions, about six weeks ago, they have worked out and put in good and satisfactory condition sixty-five miles of roads, notwithstanding the bad weather we have had during a great deal of the

Taking everything into consideration our County Commissioners deserve the well done of our people in their efforts to give us good roads and the management of the county affairs generally.
