WALHALLA, S. C. :

WEDNESDAY, APRIL 20, 1904.

Four Years More of Grover.

At the campaign meeting last week at Aiken Chairman D. S. Henderson suggested that the Congressional candidates might find it opportune to talk about available Presidential candidates, and to give the audience their views upon the choice of a candidate. The suggegstion was not accepted and the choice of Presidential material was left to others.

The four candidates for Congres wisely have nothing to say on a topic that has no bearing upon their race The fact of the mater is they, like most other folks, are very much at sea as to who can best lead the Democrats to success.

It has been my lot to go out into the State a good deal within the last few weeks. I have visited the eastern as well as the western part of the State, and talked with many persons about the choice of a Presi dential candidate by the Democratic party. There is unquestionably a very strong sentiment in South Carolina in favor of the nomination of Grover Cleveland as the Democratic candidate. "Rats!" some may suggest, who remain cooped up in their offices and who have not been out in t'a State, and who have not taken the trouble to make proper

inquiry.

The people of this State are des perately in earnest in their desire to defeat Mr. Roosevelt, and they believe that Grover Cleveland is the man to defeat Roosevelt. It is not that the white people love Mr. Cleveland or his type so much, but that they love Roosevelt less and they want a winner. The Bryan wing of the Democratic party many years ago denounced Mr. Cleveland in the State Democratic Convention, and they sent a delegation to the Nominating Convention that would have bolted in all probability had Mr. Cleveland or any of his friends been nominated. Things have changed!

Why have they changed so wonderfully? The whole explanation, to my mind, is in the little dinner party between President Roosevelt and Booker T. Washington, and the appointment of Dr. Crum as collector of Charleston against the protest of the people of Charleston. It is primarily the Booker Washing-

ton incident that has worked the people of this State, as I see it, to the pitch of accepting Mr. Cleveland if need be to accomplish the defeat, not of Mr. Roosevelt, not of the Republicans, but of the man who wined and dined with a colored man. That is the whole situation. THE PARKER AND HEARST ADVOCATES.

Thomas Watson, and he is looked upon as a winner just at this time.

The Democratic party in South Carolina will vote for the nominee of the party, regardless of whom it may This State will go for Parker, or Gorman, or Cleveland, or Hearst, or X. Y. Z., should any one of them be nominated at the Democratic Convention. It might not have done so in the nineties, but it will do so now that Mr. Roosevelt's negro policy is fixed. There are many in this State who have all along believed in and admired Mr. Cleveland, but they have been in a minority in the control of the party. They are to-day as enthusiastic admirers of Mr. Cleveland as they have ever been, and, added to this leaven are those who look upon Mr. Cleveland as the most hopeful candidate against Mr. Roose-

If the Democratic Convention were held to-morrow instead of in the middle of May, my impression is that the delegation from South Carolina to the St. Louis Convention would go without instructions, to do the very best it could when it reaches the Convention. It is quite likely that such will be the programme when the State Convention is held, as the disposition seems to be strongly in favor of making sacrifices so as to get a winner and to place the negro question above all others.

THE RACE QUESTION PARAMOUNT.

The outside world has but little idea of the intensity of the feeling on the race question in this State. There are those who insist that there is no race question; those who urge that things will settle themselves. They might do so and there might be no race question if Mr. Roosevelt believe like him did not stir things up. If left alone, there is no danger, but if stirred up from the outside there is danger to both sides and those who have most to do with the colored man are the ones who are mostly impressed with this idea.

There is no purpose in this to boom Mr. Cleveland or to suggest that he would get the vote of the Board. delegation from this State, but the point is to show how greatly the feeling against him has subsided, and why there are many who want him nominated-men who, years ago would have rather voted for the devil than to have voted for Grover Cleve-

In all of my talk I heard just one man who said he would rather have Mr. Roosevelt for President than Mr. Cleveland, and his view was that four more years of Roosevelt

Not long since, in a Mississipp court, a colored man sued a neighbor for damages for killing his dog Colonel M., defendant's lawyer, called Sam Parker, a negro, to prove that the dog was a worthless cur for whose destruction no damage ought to be recovered.

"Sam, did you know this dog?" Colonel M. asked. "Yes, sah, I wer' pussonally ac quainted wid dat dog.'

Adams Must Hang.

Columbia, April 11.—The Supreme Court handed down two important decisions in the case of R. A. Adams, a white man, convicted in Colleton county for the killing of Henry Jacques, also white, in France 1002 in February, 1903, and sentenced to hang. When the verdict was rendered an appeal was taken to the Supreme Court on the ground of error in the admission of cer-tain evidence and error in the charge to the jury. The case was argued in the the Jury. The case was argued in the Supreme Court some time ago, the State being represented by the Attorney General and the Defendant by Howell & Gruber and J. M. Walker. The decision to-day simply affirms the finding of the lower Court for sentence to be propounded.

The other case was that of O. W. Buchanan, former Circuit Judge, against the State for back salary, alleged to be due. The law reducing the salary of a Circuit Judge from \$3,500 to \$3,000 went into effect about the time of the election of Mr. Buchanan, and the Plaintiff claimed that as the law was passed after his election he was due \$500 a year, it being unconstitutional to reduce the salary of a man while in office. The Court, however, rules that the law took effect before the Plaintiff was elected. It also rules that the Legislature refused to approve the claim, it having been before that body and that therefore it was not within the powers of the Court to order it paid and also that the case was a direct one against the State and that the State could not be sued under the aircumstances. Therefore the amenal the circumstances. Therefore, the appeal

Convention Points.

Now that delegates are being elected to the Republican and Democratic Na-tional Conventions, the following facts will probably give many persons a better understanding of the political situation: Republican State Conventions elect nly delegates at large-four from each State—the remaining delegates being chosen by Congressional District Conventions—two from each district. Demo-cratic State Conventions elect both the delegates at large and the Congressional District delegates, only the latter delegates usually named by the delegates to State Conventions from their respective

Congressional Districts.

Republican State Conventions are not allowed to instruct delegates from their States to vote as a unit. The unit rule in Republican State Conventions was smashed about the time of the "stalwart half-breed fight." Democratic State Conventions have the right to instruct delegates to vote as a unit, but they do not always exercise this right. They often prefer that delegates shall be left The candidates for President and Vice President are chosen in Republican Na-tional Conventions by a majority vote of the delegates. In Democratic National

the delegates. In Democratic National Conventions a two-thirds vote is necessary to the nomination of these candidates. Democratic candidates for President and Vice President were chosen by National Convention, although it is in the power of a majority of delegates to rescind this rule at any time it sees fit. In both Republican and Democratic National Conventions platforms are adopted by a majority vote.

The coming Republican National Convention will meet in Chicago on June 21. The next Democratic National Convention will meet at St. Louis on July 6,

- By an act of the South Carolina Legislature, which went into effect on Februay 20, there was created in the State a Department of Agriculture, Commerce and Immigration. E. J. Watson, of Columbia, a representative of the new generation of energetic young business men, who are the impelling force back of the recent awakening of Southern industries and commercial activity, has been selected by Governor Heyward as the first commissioner of the new department.

the first commissioner of the new department.

Mr. Watson has been in New York for several days on business connected with his office. This summer he will make a trip to Den mark, Norway, Sweden and Germany, with a view to presenting the advantages of South Carolina as a field for the desirable class of immigrants who come from those countries. Speaking of his visit to New York and of the circumstances which led to the creation of the department of which he is the head, Mr. Watson said:

"My presence in New York at this time is due to the new conditions that have arisen in the Middle South, and it is no unmeaning errand, considered in the light of the development of the country. The rapid development of Southern manufacturing and the consequent 10bbing of the fields of the white tenant farmer class, the demonstration given last fall of the dependency of the cotton manufacturing interests on the South for raw material, not alone in this country, but abroad—these and the tendency of the negro to move to the centers of population and thence to the East are the the negro to move to the centers of population and thence to the East are the three essentials to be considered. "It is perhaps a strange, and yet not unexpected, condition that the very rapid development of the manufacturing industry in the South—particularly in my State—should result in injury to agricul-

State—should result in injury to agricultural interests. The explanation, however, is easy. When we went ahead and put nearly \$40,000,000 into cotton mills, which could only be operated with white labor, for reasons it is not necessary to discuss, we simply robbed our fields of the white tenant farmer class and left the agricultural interests in such a condition as to demand the attention of the State government. Then came a move of Sully and Brown, which has revealed of Sully and Brown, which has revealed to the whole cotton manufacturing world its dependency upon the cotton growing States of this country, accentuating the scutenesss of a situation already seen and realized. The farmers fared well and they have profited. Now they realize their power and their opportunity. and they have profited. Now they realize their power and their opportunity, but they find themselves without the necessary labor, and intelligent labor they must have. They consequently want something and want it quickly. want something and want it quickly.

"Another phase of this situation is the negro question. Our farmers have always had plenty of negro labor on their places. To-day they are crying for labor with which to work their crops. Having lost the white tenant farmer for the reasons assigned, they have suffered the additional partial loss of the negro farm laborer. This is due to the fact that the negro's tendency in our State at least in negro's tendency, in our State at least, in the last few years has been, first, to seek natural victim of immorality—the consequent sufferer from diseases which tend to balance the death and birth rate. to balance the death and birth rate.

Again, this tendency is to seek railroad construction camps and to move North and East. The exemplification of this can be most strikingly found in Wash.

"All of these things have combined together with the appearance of the boll reevil in Texas to awaken the agricultural interests of the South to a realiza-tion of the fact that something must be The great need is white settlers from this country and abroad. My State has seen the situation, and that is why I am here. Our farmers know that the boll wevil, unless an insect to destroy him is discovered, is likely to cross the am here. Our farmers know that the boll wevil, unless an insect to destroy him is discovered, is likely to cross the Mississippi river at any moment and do what Sully has done this year, with the additional feature that the effect on prices will be permanent. They know that if the weevil does come prices will remain high, and that the danger of the pest is an element in the situation. They realize that they want diversified and intensified farming, and, knowing this, they have succeeded in establishing, near the heart of the State, diversification farm No. 1, by the Federal government, under the boll weevil appropriation.

"Further, knowing the need of intelligent labor, the State has established its

"Further, knowing the need of intelligent labor, the State has established its Department of Agriculture, Commerce and Immigration, at the head of which I have been placed for four years, with the view of inducing desirable investments and settlers from North European and American points to come to South Carolina—the real garden spot of the world, possessing a soil and climate producing some crop the year round. We have thousands of acres of land lying idle at this time, and it is the province of the 'Green man who can certainly carry the country. Judge Parker may carry it. "Mr. Cleveland in my opinion, can carry the States of New York, New Jorsey, Connecticut, Delaware and Illinois, beyond a doubt, and probably also the States he can carry are necessary to use if we are to win. "There are many Democrats in New York and the country at large I think thousands of acres of land lying idle at this time, and it is the province of the York and the country at large, I think, new department to bring about their development.

be prolific of genuine results. I am dealing with all having any interest in the situation that is attracting attention to the Middle South—the Southern France of America—and thus far effectively. I am trying to see all who are interested in any way, for I feel that those who invest or settle in South Caroina have a bright future awaiting them. When the waste places have been populated the act under which we are operating is so constructed that we can turn our attention to other plans of development as the necessity for them arises."—

"The department has been fashioned upon the best features of national and State departments of like nature, and the scope is broad enough to admit of its handling any conditions that may arise affecting industrial development.

"I am here now to set the ball in motion toward getting that which we so greatly need—intelligent white labor of Saxon origin. The work, so far, is of constructive character, but I trust it will be prolific of genuine results. I am dealing with all having any interest in nominated, another great party victory can be won, and of that the fruits would be enjoyed by all good Democrats.

"Thus it is plain that in supporting

Those who want Mr. Cleveland assume that attitude in the Cleveland assume that attitude in the interest of the party at large. They want the De nocrats, in power and they believe Mr. Cleveland is the only means by which Democrats can secure that power.

"I have no idea that Mr. Cleveland is a candidate. I do not know whether he would accent the reminister if it.

Former Queen Isabella, grandmother of King Alfonso, died at Paris last Saturday morning of influenza, with complications. The Queen had been affected with grip for two months, which affected her lungs. She had been one of the most conspicuous figures in Paris since she left Spain. After her abdication in 1870, she continued to live with queenly magnificance in Paris, giving largely to magnificence in Paris, giving largely to

Some weeks ago, one zero morning, Mrs. Robinson W. Dean, aged 26, of North Cornwall, Conn., while chopping wood accidentally cut off the fourth finger of her left hand with an ax. She sent for Dr. J. W. Ives and insisted that the several that the replaced. The dector severed part be replaced. The doctor went out to the wood pile where he found the finger frozen to the ax. He took the finger into the house and bandaged it where it belonged. The finger has grown together and a new nail is appearing in place of the old one. Dr. Ives and the medical fraternity are surprised at the result.

TROUBLES "I find Thedford's Black-Draught

a good medicine for liver disease, it cured my son after he had spent \$100 with doctors. It is all the medicine I take."—MRS. CAROLINE MARTIN, Parkersburg, W. Va.

If your liver does not act regularly go to your druggist and secure a package of Thedford's Black-Draught and take a dose tonight. This great family medicine frees the constipated bowels, stirs up the torpid liver and causes a healthy secretion of bile. Thedford's Black - Draught

will cleanse the bowels of im-purities and strengthen the kidneys. A torpid liver invites colds, biliousness, chills and fever and all manner of sick-ness and contagion. Weak kid-neys result in Bright's disease which claims as many victims as consumption. A 25-cent package of Thedford's Black-Draught should always be kept in the house.
