#### THE SOUTH CAROLINA-GEORGIA LINE.

Last week our Westminster correspon dent asked the question of The Courier, what is the true State line between South Carolina and Georgia? We frequently hear the statement made that the State line is "extreme low-water mark on the South Carolina shore, thus conceding to Georgia the whole of the rivers that constitute the boundary line between the two State. This is incorrect. The line as fixed by statute is the middle thread of the rivers. However, all islands are conceded entirely to Georgia, lowwater mark on the South Carolina side of the islands being the State line instead of the middle thread of the river. This provision as to low-water mark on the islands is doubtless responsible for the confusion as to the correct State line. It is only where there are islands in the river that low-water mark constitutes the line; elsewhere, as stated above, the middle thread is fixed as the boundary line between the two States.

The provision of the statute reads as follows:

From the State of Georgia, South Caro-lina is divided by the Savannah river, from its entrance into the ocean to the rivers; thence of the Tugaloo and Seneca rivers; thence by the Tugaloo river to the confluence of the Tugalo or and Chat-tooga rivers; thence by the Chattooga river to the North Carolina line, in the thirty.fifth degree of north latitude, the line being low water mark at the south-ern shore of the most northern stream of said rivers where the middle of the river is broken by islands; and the middle thread of the stream where the rivers flow in one stream or volume.

Federation of Women's Clubs.

The State Federation of Women's Clubs met in Newberry last week. The convention opened Wednesday morning with Mrs. Martha Orr Patterson, State with Mis. Marria Off Patterson, State president, in the chair. The invocation was made by Rev. G. A. Wright. Dr. George B. Cromer, in a charming and felicitous address, welcomed the Federa-tion in the name of the city of Newberry. Mrs. W. K. Sligh then extended a cordial welcome from the Newberry clubs. Mrs. Celina E. Means, one of South Carolina's most gifted women, responded in behalf of the visitors. Then followed the re-port of the various officers, approving a growing enthusiasm in club work throughout the State. The Federation has a department of demostic galaxies, which include a study

domestic science, which includes a study of hygiene, sauitation, healthful food, etc., and the women who learn these things and practice them are strong and well, their eyes are bright, their skius clean, they are animated and interested in life. Such a woman cannot be ugly nor can her children nor her home be neglected. The world is better for every

family regulated by such a woman. The great and vexing problem of domestic service was prominently discussed by this convention, and a committee ap-pointed to look into the practicability of establishing a department of domestic training, just plain everyday cooking and sewing, into both white and colored sewing, into both white and colored schools, the need being most keenly felt for more manual and less literary train-ing for the average negro girl particularly.

the office of president of the Federation for two years, the constitutional limit, and she has made her administration memorable by a great work she has be gun, that is the establishment of an industrial school for criminal, vagrant, neglected or orphan boys. This subject is very near Mrs. Patterson's heart, and she has made strong appeals to clubs and to women personally and indirectly to interest themselves in the subject. Hundreds of boys are added yearly to the sorrowful, the dreadful list of hardened criminals by the present system of herd-ing boy offenders with vicious men. An ignorant lad, in sore need, steals two bushels of oats, he is sent to the penitentiary for five years, and at the end of hi term comes out to join himself with burglars and proceed to further iniquity. There are instances, one of them being told by a Greenwood lady at the Federa

tion, of a boy of thirteen or fourteen, for an offense against the majesty of the law, was chained by the ankle to a negro, herded with negroes at night and made to labor beside them during the day. What can be expected of that boy when he is again at liberty? The reforming of these boys is not a visionary scheme. Just such a school as the club women of the State wish to establish has been in existence in Alabama for nine years, and its records show that of the lads educated and trained at that institution only two per cent revert to wicked ways upon their graduation. Many of them are fill-ing positions of honor and trust in their own and other States. That school was established through the untiring efforts of a woman, and the women of South Carolina are determined that the poor neglected lads, any one of whom, but for God's mercy might be your boy or mine, shall have a chance in life

The report of Miss Waterhouse, of Beaufort, on civics and forestry, a fine paper, was read by Miss Varina Brown, of Anderson, Miss Waterhouse being unable to attend the Federation.

At the close of the musical program a lecture on civics, illustrated by stereop-

tican views, was given. The attendance on these conventions is becoming so large that the motion was made that hereafter the delegates should not expect entertainment in private homes, but as in large bodies go to hotels and boarding houses at their own expense. This matter met with warm discussion, and the motion being put was lost.

The newly elected officers are: President, Mrs. S. K. Sligh, of Newberry; first vice president, McKissock, of of Greenwood; second vice president, Mrs. Nichols, of Chester; recording secretary, Mrs. Visanska, of Charleston; corresponding sccretary, Mrs. Andrew Moore, of Columbia; treasurer, Miss Varina D. Brown, of Anderson; auditor, Miss Frazier James, of Darlington.

The next meeting of the Federation will be held in Union.—An Anderson Delegate, in Daily Mail.

# Two Hundred Persons Drowned in Cuba.

Santiago de Cuba, June 18 .- The re cent fall of 14 inches of rain in five hours accompanied by a hurricane, has resulted in the death of more than a hundred persons. The most severe loss was at the village of El Cobre, where about 60 persons were drowned. The river rose instantly, destroying the lower the village. Bodies were carried eight miles to the bay. Thirty bodies were recovered. Six persons were drowned at Daigniri, 14 at El Caney and many in the surrounding country. The list is still incomplete. All the bridges at El Cobre, several at Daiquiri and four of the Central railroad and miles of track have been destroyed. In the wreck of the relief train at Moron two employees were killed, but all the passengers are safe. No trains arrived here from Sat urday to Tuesday, and all the telegraph lines and cables are interrupted. One hundred and fifty houses were destroyed or damaged here and fifty persons lost their lives. In and about this city the property loss is enormous at the mines, the railroad and in cattle and merchan-
