Stondon for improvements at Ciemson. [Greenville Nows, April 10.] Sixty thousand dollars is to be apeni in improving and enlarging Clemson College. A resolution making the appropriation was adopted at a special meeting of the Board of Trustees held at the collego; the Board of Trustees held at the collego; the Board of Trustees held at the collego; setorday. Senator Tillman was seen for a few moments at the Southern Railway station here yesterday afternoon on his way back to Washington. He was traveling on the northbound vestibule, with him were several other membors of the board including Trustees Tindal, Evans and Wanuamaker. Col. M. L. Donaldson also returned on the vestibule, having attended the meeting. "Yes, we have made up our minds to spond every cent we can on the collego that is on permanent improvements," said Senator Tillman. "We did not consider any small things at the meeting to any small things at the meeting to ins at the college, the trustees docided that these loys, who were being turouded and invaded by lava and one stream is closely threatening Attajano. New craters are opening in the volean. The population of the towns and villagos near the danger zone are still thouse holing addition of the streets hoping to ins at the college, the trustees docided way, had to be educated. There was anothing left for us build additional barracks, and that will be one of the big things to come out of the sixty thousand dollar appropriation. We have directed, among other things, that at least 200 hed rooms shall be provided, which will make the college large enough to a start. Boas do the the improvements, "In a start Tillman did not have time to go into details as to the improvements." Senator Tillman did not have time to go on the destroy weet. The add that the plane had to a bar how were been wiped out to a 2000 acres of vineyards, olive groves and that the stones to ban that the plane had to a bar how been boas and to a bar how

least." Senator Tillman did not have time to go into dotails as to the improvements. He said that the plans had to be made first and then a better idea could be given. One of the principal things, how-ever, outside of the new dormitory, is the erection of a new power plant and fertilizer building. The idea of the trus-tees is to reduce operating expenses by centralizing the power plant, for heating as well as for lighting purposes. This will add greatly to the efficiency of the mechanical department of the college. The fertilizer department, which is really a State department solely, will be improved and enlarged, and it is almost a certainty that the printing school will be added to the college course. This de-partment will, in a great measure, be made to pay for itself, for a great deal of literature of various sorts is distributed from the institution, and in addition the "Hill" has a quantity of job work, which is now being done elsewhere. In addition to the fund coming from the Legislature as a result of the ferti-lizer tag tax, the United States govern-ment has made arrangements to give \$5,000 annually, for six years, the money to be used in agricultural experiments under the direction of the college au-thorities. Instead of six hundred students, more or less crowded, Clemson will, in ano-ther year, accommodate eight hundred As a result of a conference in Spartan-burg Saturday, the Lucas-Milliken con-troversy for the possession of the Lau-rens Cotton Mills, at Laurens, and the Darlington Cotton Mills, at Darlington, was ended with all pending litigation, both in the United States and the State Courts. Archbishop of Naples, has ordered special prayers to be offered for the safety of those who are in danger. LATEB NEWS.
Naples, April 9.—The devastation wrought by the eruption of Vesuvius has been so widespread that 50,000 persons have been made homeless.
Dozens of villages have been wiped out and 2,000 acres of vineyards, olive groves and farm lands destroyed.
The eruption is growing worse every hour, and as a consequence a state of panie prevails throughout the country.
Refugees reaching here tell of narrow escapes from the flowing lava, and of hardships of the fleeing peasants and villagers. Earthquakes have added to the horror of the situation. **FOLECYS HONEYANDEAR**As a result of a conference in Spartanburg Saturday, the Lucas-Milliken controversy for the possession of the Laux
