John W. Cannon, of Salem, has left at The Courier office several bunches of a peculiar herb or grass. Lately a lot of chickens belonging to W. M. Kelley have been missed and no trace of them could be found. As Mr. Kelley drove along the public road Sunday the cries of young chickens were heard a short distance away. Thinking he would run into some small animal in the act of killing the chickens Mr. Kelley followed the sound, and soon a strange sight met his gaze. Four young chickens were fluttering and floundering in the meshes of this herb or grass, and were unable to extricate themselves. A close examination showed that they were stuck fast and could not get away. One of the bunches of this grass brought to us is pretty well filled with downy feathers. The grass is about 18 inches high, and toward the top a peculiar brown sticky substance oozes out. The chickens, running at large in the grass, were caught by this gluey substance. The grass has dried out considerably, still the sticking qualities remain, and the bunches have served as fly-catchers in The Courier office for a few days. We do not know what the herb or grass is, but it is doubtless one of some medicinal properties. Neither Mr. Kelley nor Mr. Cannon had ever noticed it before their attention was attracted to it by the cries of the chicks.
