SOLD HIS OWN BLOOD.
After Being Drained of Eighteen Ounces Gets Up and Walks.

A New York dispatch says: Handicapped physically by the fact that for days he had been stowed away in a freight car and had suffered acute hunger, on a trip from Baltimore, his home, Benjamin F. Hill, in the Presbyterian Hospital, gave an exhibition of stamina which astounded the surgeons.

"Broke," as he termed it, the young man gave for just \$10 approximately 18 ounces of his blood to be injected into the veins of a patient. Hill was told, optimistically, that perhaps in four days after his vital fluid had been extracted he would be able to walk and return to his present lodgings in the Mills Hotel. For more than an hour young Hill lay still on his back on the operating table.

Then, with an exclamation of disgust at his enforced inactivity, he arose unassisted and practically giving medical theories a slap in the face and ignoring the protests of the doctors, walked out. As Hill took his first steps in the little operating room after the tube connecting his artery with an artery in the right arm of the patient had been disconnected, the patient turned and made some incoherent remark.

Hill looked at the form on the operating table and saw a hand thrust toward him. He grasped it and pressed it warmly, though silently. Then Hill walked up to a car and rode down town, where he met a friend. Hill's home is in Baltimore. The patient's name was not given.

Despite the heroic treatment administered and the tremendous vitality of Hill's blood, the patient died. The surgeons in several other hospitals learned of Hill's getting up and walking off. They declared it was one of the most remarkable incidents they had ever heard of.

—Freshet Invaded Indian Graves.
(Charlotte News.)
Rev. J. A. Smith, co-pastor of the East Avenue A. R. P. Tabernacle, was visiting his friend, Charles Drumm, who lives on Catawba river, near Lockhart Shoals, a few days ago, and while there saw the result of the recent ruthless Catawba freshet in opening the graves of Catawba Indians.
"Mr. Smith has a little string of 'wampum' which Mr. Drumm gave him. It consists of beads, made by the Indians themselves, and used by them as money. The beads are mostly white, with four lines marked on each. Some of them are solid blue and some solid white. Though washed out of graves, they still retain a fine gloss.
Other things washed up were skeletons, cooking utensils, rude grain mills and tommyhawks. The river in its wild, ghoully mood must have invaded an Indian burying ground. This section is the well-known home of the Catawba Indians, a tribe always friendly to the whites.

CORTRIGHT METAL SHINGLES
LAST AS LONG AS THE BUILDING ITSELF

In some cases they last longer. They never need repairs. They're fire-proof, storm-proof. They reduce the cost of insurance, and they're easy to lay. They preserve the building too, by keeping out dampness: so if you want a thoroughly cozy home in winter, and a cool home in summer, you can't do better than see that Cortright Shingles are used for the covering.
